This book pinpoints the impact of new technologies on language and communication, highlights the evolution and changes undergone by humanities in conjunction with technological innovation, and looks at how language has adapted to the challenges of today's digitized world.

Language in the Digital Era. Challenges and Perspectives
University Press of America

This book represents a selection of papers presented by academics and researchers at the 12th Conference on British and American Studies. They are grouped in two main theme clusters, corresponding to the two chapters of the book: Languages in Contact and Languages in Use and Multidisciplinarity and Multiculturalism in Literary Studies. In the first section, language is described, in turn, as subject to influence by other language systems, as an object of learning and acquisition, and as an instrument enabling users to bridge between cultures, disciplinary domains, and people. The second part of the volume is mainly concerned with such notions as hybridity, tolerance,

identity, subversion and deconstruction, as reflected in classical and contemporary Anglo-American literary texts.

Flavours and Endeavours Hunter Publishing (NJ)

This collected volume brings together the contributions of several humanities scholars who focus on the evolution of language in the digital era. The first part of the volume explores general aspects of humanities and linguistics in the digital environment. The second part focuses on language and translation and includes topics that discuss the digital translation policy, new technologies and specialised translation, online resources for terminology management, translation of online advertising, or subtitling. The last part of the book focuses on language teaching and learning and addresses the changes, challenges and perspectives of didactics in the age of technology. Each contribution is divided into several sections that present the state of the art and the methodology used, and discuss the results and perspectives of the authors. The book is recommended to scholars, professionals, students and anyone interested in the changes within the humanities in conjunction with technological innovation or in the ways language is adapting to the challenges of today's digitized world.

Constructing Suitable Devices for Preservation of the Young Adults' English Vernacular into the Romanian Translation of Catcall is an applied research that proposes innovative linguistics devices to assist the professional in the task of translating exceptional genera which appear in children books, including scientific extracts and mixtures of foreign words. The findings are proposed as recommendations to translators of children's literature who are expected to make informed decisions when challenged by the new features in the genre, such as Web pages, word games, reconstruction of imageries, and much more. The task of creating each one of the six devices into Romanian is tackled step by step, taking into account the language particularities and cultural implications for both contexts. The representation of how each device contributes toward the proper incorporation of the English vernacular element into Romanian is conducted in a suitable and careful manner taking into account relevant opinions and scholarly approaches to translating children's literature. This scientific linguistic study provides innovative and effective tools for all professionals in the field.

Technology has revolutionized the field of translation, bringing drastic changes to the way translation is studied and done. To an average user, technology is simply about clicking buttons and storing data. What we need to do is to look beyond a system's interface to see what is at work and what should be done to make it work more efficiently. This book is both macroscopic and microscopic in approach: macroscopic as it adopts a holistic orientation when outlining the development of translation technology in the last forty years, organizing concepts in a coherent and logical way with a theoretical framework, and predicting what is to come in the years ahead; microscopic as it examines in detail the five stages of technology-oriented translation procedure and the strengths and weaknesses of the free and paid systems available to users. The Future of Translation Technology studies, among other issues: The Development of Translation Technology Major Concepts in Computer-aided Translation Functions in Computer-aided

Translation Systems A Theoretical Framework for Computer-Aided Translation Studies The Future of Translation Technology This book is an essential read for scholars and researchers of translational studies and computational linguistics, and a guide to system users and professionals.

Translating Across Cultures is a collection of nine papers given at the 21st BAS/British and American Studies conference, held in Timișoara in May 2011. They focus on translation problems that may arise at various levels, from word to translation unit, when rendering a literary, legal, economic or hybrid text genre into a second language, as well as on some of the methodological issues raised by this process. The papers attempt to give answers to questions including: why or what cultural elements are important when mediating between languages or cultures? What equivalence can be found for certain cultural lexical items, for certain collocations or for business metaphors in the target language? The book also investigates the translation of 21st century 'Newspeak', as well as cases of lexical gaps; reveals similarities and differences in the linguistic expression of various concepts; and suggests possible ways of dealing with certain difficult translation problems.

This volume includes thirteen papers presented at the 16th Conference on British and American Studies held at Transilvania University of Brașov, Romania. It consists of three main parts, the first of which includes contributions falling within the scope of

communication and meaning-making. The articles gathered here consider issues such as social identity and the construction of gender both in and through language, and the rendition of cultural content across languages. The second section takes a closer look at language in context: the contributions included here approach language as a means to encode and decode the reality around us, whether in media discourse, academic contexts, fictional literature or bilingual dictionaries. The research strand in the third part of the volume relates to the lexicogrammatical specificities of natural languages. The focus of attention here is Romanian, with some of its structural particularities set against those present in other languages. *Problems of Post-communism* Cambridge Scholars Publishing 8.9 x 5.9 x 1 Inches

This book is concerned with dictionary-making and dictionary-

research carried out in Romania. The outcome of extensive, hands-on experience in dictionary making and dictionary research, the volume addresses a range of culture-specific topics related to both dictionary-as-process and dictionary-as-product. It reflects the interests and concerns of all the stakeholders on the lexicographic continuum: theorists, practitioners, and dictionary users. The topics covered here encompass a number of macro- and micro-structural aspects relating to paper and online, monolingual and bilingual, general and specialized reference works. They create a composite picture of the lexicographic landscape in Romania set against a wider sociocultural backdrop. It is this ecology of dictionary making that helps explain the priorities, influences, pressures, and challenges that have shaped the local dictionary culture. The book will also provide researchers, practitioners, teachers and students with a clearer view of the peculiarities of the dictionary.

This volume seeks to investigate how humour translation has developed since the beginning of the 21st century, focusing in particular on new ways of communication. The authors, drawn from a range of countries, cultures and academic traditions, address and debate how today's globalised communication, media and new technologies are influencing and shaping the translation of humour. Examining both how humour translation exploits new means of communication and how the processes of humour translation may be challenged and enhanced by technologies, the chapters cover theoretical foundations and implications, and methodological practices and challenges. They include a description of current research or practice, and comments on possible future developments. The contributions interconnect around the issue of humour creation and translation in the 21st century, which can truly be labelled as the age of multimedia. Accessible and engaging, this is essential reading for advanced students and researchers in Translation Studies and Humour Studies.
