The "Europe against Cancer" programme has, from its inception, emphasised the key role which general practitioners must play in the actions necessary to achieve its aim of reducing the incidence and the mortality from cancer in the European Community. General practitioners, because of their day-to-day direct and continuing contact with patients, play a role not only in primary prevention and education of patients, but also in motivating their patients to accept secondary prevention and screening, some of it carried out by general practitioners themselves. These preventive activities are in addition to their traditional role in the care and management of patients with cancer at home, and increasingly, their role in active treatment. In view of the importance of the general practitioner in the "Europe against Cancer" programme, the European Commission, with a view to providing general practitioners with up-to-date useful information, has sponsored the production of this series of publications on organ based cancers, especially written for general practitioners. MICHEL RICHONNIER Coordinator of the "Europe against Cancer" programme, Commission of the European Communities, Brussels Preface The present textbook is the second in the series published by the Commission of the European Communities within the context of the "Europe Against Cancer" Programme. After lung cancer, it was felt that priority should be given to breast cancer, the most frequent neoplastic disease among European women.

Collins Easy Learning Preschool - ABC Ages 3-5: New Edition Springer Science & Business Media How does anyone get to the top of their field? We all know it takes hard work, dedication, and the occasional dose of luck, but what separates a wannabe from a winner? The Art of Doing brings together an incredible cross-section of individuals who are at the top of their respective fields, from actor Alec Baldwin to New York Times crossword puzzle editor Will Shortz, to and asks them each one question: how do you succeed at what you do? The advice that they share is illuminating, and occasionally surprising, providing their top ten strategies on how to achieve greatness in a variety of ways. From the practical ("How to Open a Restaurant and Stay in Business," by restaurateur David Chang) to the zany ("How to Live Life on the High Wire," by infamous World Trade Center tightrope walker Philippe Petit), each interview is a testament to the knowledge and experiences that these risk-taking, barrier-breaking individuals have used to achieve their own success. With its diverse perspectives and variety of opinions about how to be the best in any field, this book will shape readers' views of success and inspire them to carve out their own niche.

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Extraordinary Stories from Ordinary Visitors to the Kruger National Park Edition Axel Menges

Published to mark the centenary of the sinking, this book tells the story of the Titanic from a new angle: the role of wireless in the disaster. Drawing on the Marconi Archives in the Bodleian Library, the most extensive record of wireless communications, the book recounts the fateful events of April 1912 using complete transcripts of the messages to re-tell this well-known story from a different perspective. The narrative begins with warnings of ice, including one sent from the S.S. Californian, the closest ship to the Titanic, just hours before the fatal collision. It follows Jack Phillips, the senior operator on board the R.M.S. Titanic, as he begins sending the 'CQD' Marconi distress signals late on the night of April 14th. We see how these urgent calls were received by nearby ships and how news was passed rapidly across the Atlantic, in a desperate attempt to save the lives of the passengers and crew. The story ends with messages from the few lucky survivors safely on their way to New York. The directness and brevity of the messages gives the narrative a compelling impact and immediacy. Titanic Calling brings to life the voices of the individuals in this drama, retelling this legendary story as it was first heard.
