This report focuses on the
civic aspects of video
game play among youth.
According to a 2006
survey, 58 percent of
young people aged 15 to
25 were civically

"disengaged," meaning
that they participated in
fewer than two types of
either electoral activities
(defined as voting,
campaigning, etc.) or civic
activities (for example,
volunteering). Kahne and
his coauthors are
interested in what role
video games may or may

not play in this disengagement. Until now, most research in the field has considered how video games relate to children's aggression and to academic learning. Digital media scholars suggest, however, that other social outcomes also deserve attention. For example, as games become more social, some scholars argue that they can be important spheres in which to foster civic development. Others disagree, suggesting that games, along with other forms of Internet

involvement, may in fact take time away from civic and political engagement. Drawing on data from the 2006 survey, the authors examine the relationship between video game play and civic development. They call for further research on teen gaming experiences so that we can understand and promote civic engagement through video games. *The Civic Potential of Video Games* MIT Press Eye Movement Desensitization

Reprocessing (EMDR) therapy is an evidence-based psychotherapy which has been recognized by the World Health Organization (WHO) as a first-choice treatment for Posttraumatic Stress Disorder (PTSD). Beyond PTSD, there has been increasing research into its mechanism of action and in the efficacy of EMDR in other psychiatric and somatic disorders with comorbid psychological trauma. The motivation of this research topic was to

offer new and innovative research on EMDR across the globe to an increasing number of clinicians and researchers with an interest in this trauma-focused intervention.

At once funny, wistful and unsettling, Sum is a dazzling exploration of unexpected afterlives—each presented as a vignette that offers a stunning lens through which to see ourselves in the here and now. In one afterlife, you

may find that God is the size of a microbe and unaware of your existence. In another version, you work as a background character in other people's dreams. Or you may find that God is a married couple, or that the universe is running backward, or that you are forced to live out your afterlife with annoying versions of who you could have been. With a probing imagination and deep understanding of the human condition, acclaimed neuroscientist David Eagleman offers

wonderfully imagined tales that shine a brilliant light on the here and now. *The humanities and social sciences.* A Packt

Working Paper Series Proceedings of the Social Statistics Section Investigation of the Assassination of President John F. Kennedy Hearings Before the President's Commission on the Assassination of President Kennedy William Morrow & Company Deborah Tannen's #1 New York Times bestseller You Just Don't Understand revolutionized communication between women and men. Now, in her most provocative and

engaging book to date, she takes on what is potentially the most fraught and passionate connection of women's lives: the mother-daughter relationship. It was Tannen who first showed us that men and women speak different languages. Mothers and daughters speak the same language—but still often misunderstand each other, as they struggle to find the right balance between closeness and independence. Both mothers and daughters want to be seen for who

they are, but tend to see the other as falling short of who she should be. Each overestimates the other's power and underestimates her own. Why do daughters complain that their mothers always criticize, while mothers feel hurt that their daughters shut them out? Why do mothers and daughters critique each other on the Big Three—hair, clothes, and weight—while longing for approval and understanding? And why do they scrutinize each other for reflections of

themselves? Deborah Tannen answers these and many other questions as she explains why a remark that would be harmless coming from anyone else can cause an explosion when it comes from your mother or your daughter. She examines every aspect of this complex dynamic, from the dark side that can shadow a woman throughout her life, to the new technologies like e-mail and instant messaging that are transforming mother-daughter communication.

Most important, she helps mothers and daughters understand each other, the key to improving their relationship. With groundbreaking insights, pitch-perfect dialogues, and deeply moving memories of her own mother, Tannen untangles the knots daughters and mothers can get tied up in. Readers will appreciate Tannen's humor as they see themselves on every page and come away with real hope for breaking down barriers and opening new lines of communication. Eye-

opening and heartfelt, *You're Wearing That?* illuminates and enriches one of the most important relationships in our lives. "Tannen analyzes and decodes scores of conversations between moms and daughters. These exchanges are so real they can make you squirm as you relive the last fraught conversation you had with your own mother or daughter. But Tannen doesn't just point out the pitfalls of the mother-daughter relationship, she also provides guidance for

changing the conversations (or the way that we feel about the conversations) before they degenerate into what Tannen calls a mutually aggravating spiral, a "self-perpetuating cycle of escalating responses that become provocations." - The San Francisco Chronicle
