RHODES GORDON

Analyzing English in a Global Context Springer Nature

Explores categories, constructions, and change in the syntax of English, both past and present, methodologically and theoretically.

The Routledge Handbook of English Language Teaching Universidad de Sevilla

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners

teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. Advisory board: Guy Cook, Diane Larsen-Freeman, Amy Tsui, and Steve Walsh

New Directions in English Language Corpora Bloomsbury Publishing

This book constitutes the refereed post-conference proceedings of the IFIP TC 3 Open Conference on Computers in Education, OCCE 2018, held in Linz, Austria, in June 2018. The 24 revised full papers and 3 short papers included in this volume were carefully reviewed and selected from 63 submissions during two rounds of reviewing. The papers discuss key emerging topics and evolving practices in the area of educational computing research. They are organized in the following

topical sections: computational thinking; programming and computer science education; teachers' education and professional development; games-based learning and gamification; learning in specific and disciplinary contexts; learning in social networking environments; and self-assessment, e-assessment and e-examinations.

Computing Attitude and Affect in Text: Theory and Applications AuthorHouse

Analysis of the scroll fragments of the Qumran Aramaic scrolls has been plentiful to date. Their shared characteristics of being written in Aramaic, the common language of the region, not focused on the Qumran Community, and dating from the 3rd century BCE to the 1st century CE have enabled the creation of a shared identity, distinguishing them from other fragments found in the same place at the same time. This classification, however, could yet be too simplistic as here, for the first time, John Starr applies sophisticated statistical analyses to newly available electronic versions of these fragments. In so doing, Starr presents a potential new classification which comprises six different text types which bear distinctive textual features, and thus is able to narrow down the classification both temporally and geographically. Starr's re-visited classification

presents fresh insights into the Aramaic texts at Qumran, with important implications for our understanding of the many strands that made up Judaism in the period leading to the writing of the New Testament.

"Papers from the 29th International Conference on English Language Research on Computerized Corpora (ICAME 29). Ascona, Switzerland, 14-18 May 2008" Routledge

This book offers the first in-depth corpus-based description of written Sri Lankan English. In comparison to British and Indian English, lexical and lexicogrammatical features of Sri Lankan English are analysed in a complex corpus environment comprising data from the respective components of the International Corpus of English, newspapers and online sources to explore the status of Sri Lankan English as a variety in its own right. The evolution of Sri Lankan English is depicted against the background of historical as well as sociolinguistic considerations and allows deriving a fine-grained model of the emergence of distinctive structural profiles of postcolonial Englishes developing in a multitude of norm orientations. This book is highly relevant to readers interested in Sri Lankan English and South Asian Englishes. It also offers more general sociolinguistic perspectives on the dynamics of postcolonial Englishes world-wide and on the inextricable link between language and identity.

AQA AS English Language (B).Categorising texts workbook/AS Level English Language and Literature for AQA Student Book/Cambridge University Press

Global Pedagogies and Policies Philip Allan

Devised in collaboration with the Open University and Macquarie University, Australia, *Analysing English in a Global Context* is specifically designed for the postgraduate student market, as well as for teachers of English as a second or foreign language throughout the world. This is a groundbreaking Reader which includes specially commissioned pieces as well as classic texts and provides a global perspective on the changing uses and forms of English and its impact on language teaching contexts. Students' skills in analysing these forms will be developed through an examination of the major functional models and their strengths and weaknesses.

Categorization in the History of English Routledge

This two-volume set CCIS 751 and CCIS 752 constitutes the proceedings of the 17th Asia Simulation Conference, AsiaSim 2017, held in Malacca, Malaysia, in August/September 2017. The 124 revised full papers presented in this two-volume set were carefully reviewed and selected from 267 submissions. The papers contained in these proceedings address challenging issues in modeling and simulation in various fields such as embedded systems; symbiotic simulation; agent-based simulation; parallel and distributed simulation; high performance computing; biomedical engineering; big data; energy, society and economics; medical processes; simulation language and software; visualization; virtual reality; modeling and Simulation for IoT; machine learning; as well as the fundamentals and applications of computing.

Deep Learning Approaches for Spoken and Natural Language Processing Springer

Intermediate grade readers don't need to be guided as much as they need to be engaged—and authors Julie Wright and Barry Hoonan have solutions for doing just that using small groups. You'll get practical tools, classroom examples, and actionable steps essential for starting, sustaining, and mastering the management of small groups. This book explains the five teacher moves that work together to support students' reading independence through small group learning—kidwatching, pivoting, assessing, curating, and planning—and provides examples to guide you and your students toward success. This resource will empower you with tools to ensure that readers are doing the reading, thinking, and doing—not you.

Classifying the Aramaic Texts from Qumran Springer Nature

This book is designed to help students and other interested readers approach research in English Language studies. Its concerns include project, dissertation and thesis research and writing.

17th Asia Simulation Conference, AsiaSim 2017, Melaka, Malaysia, August 27 - 29, 2017,

Proceedings, Part II Peter Lang

This is a groundbreaking Reader which includes specially commissioned pieces as well as classic texts and provides a global perspective on the changing uses and forms of English and its impact on language teaching contexts.

Meeting the Standards in Secondary English BRILL

Meeting the Standards in Secondary English provides detailed subject knowledge, including the detailed pedagogical knowledge needed to teach English in secondary schools, support activities

for work in schools and self-study and information on professional development for secondary schools. This practical, comprehensive and accessible book should prove invaluable for students on secondary initial teacher training courses, PGCE students, lecturers on English programmes and newly qualified secondary teachers.

Advances in Information Retrieval Routledge

This fully updated second edition of *Teaching English, Language and Literacy* is an essential introduction for anyone learning to teach English at primary school level. Designed for students on initial teacher training courses, but also of great use to those teachers wanting to keep pace with the latest developments in their specialist subject. The book covers the theory and practice of teaching English, language and literacy and includes comprehensive analysis of the Primary National Strategy (PNS) Literacy Framework. Each chapter has a specific glossary to explain terms and gives suggestions for further reading. This second edition covers key areas that students, teachers and English co-ordinators have to manage, and includes advice on: developing reading, including advice on choosing texts, and the role of phonics improving writing skills, including advice on grammar and punctuation planning and assessing speaking and listening lessons working effectively with pupils who are multilingual understanding historical developments in the subject the latest thinking in educational policy and practice, the use of multimedia maintaining good home-school links. gender and the teaching of English language and literacy All these chapters include clear examples of practice, coverage of key issues, analysis of research, and reflections on national policy to encourage the best possible response to the demands of the National Curriculum.

Actas del XXI congreso internacional de A.E.D.E.A.N., Asociación Española de Estudios Anglo-Norteamericanos Routledge

Electronic texts and text analysis tools have opened up a wealth of opportunities to higher education and language service providers, but learning to use these resources continues to pose challenges to scholars and professionals alike. *Translation-Driven Corpora* aims to introduce readers to corpus tools and methods which may be used in translation research and practice. Each chapter focuses on specific aspects of corpus creation and use. An introduction to corpora and overview of applications of corpus linguistics methodologies to translation studies is followed by a discussion of corpus design and acquisition. Different stages and tools involved in corpus compilation and use are outlined, from corpus encoding and annotation to indexing and data retrieval, and the various methods and techniques that allow end users to make sense of corpus data are described. The volume also offers detailed guidelines for the construction and analysis of multilingual corpora. Corpus creation and use are illustrated through practical examples and case studies, with each chapter outlining a set of tasks aimed at guiding researchers, students and translators to practice some of the methods and use some of the resources discussed. These tasks are meant as hands-on activities to be carried out using the materials and links available in an accompanying DVD. Suggested further readings at the end of each chapter are complemented by an extensive bibliography at the end of the volume. *Translation-Driven Corpora* is designed for use by teachers and students in the classroom or by researchers and professionals for self-learning. It is an invaluable resource for anyone interested in this fast growing area of scholarly and professional activity.

Metaphor and Intercultural Communication Springer Science & Business Media

Builds students' understanding and provides ready-prepared revision solutions to develop confidence and exam skills. This new Workbook for AQA B AS English Language Unit 1 will help build your understanding by addressing questions on all key topics. For use either in class or for homework, this A4 full colour Workbook allows you to answer short, focused responses to stimulus texts, similar to those in the examination, before leading you towards longer and more detailed responses. The questions are designed to build your skills against the three Assessment Objectives helping you to apply language methods and terms, understand key language concepts and analyse and evaluate contextual factors. Additional exam-style questions will help you put what you have learned into practice. Answers are available online at www.hodderplus.co.uk/philipallan/workbooks so you can check and assess your responses. Special school prices are available for multiple purchases. For details go to:

www.hoddereducation.co.uk/Schools/philipallan/Student-Workbooks.aspx

Exploring Methodological and Theoretical Concepts A&C Black

Human Language Technology (HLT) and Natural Language Processing (NLP) systems have typically focused on the "factual" aspect of content analysis. Other aspects, including pragmatics, opinion,

and style, have received much less attention. However, to achieve an adequate understanding of a text, these aspects cannot be ignored. The chapters in this book address the aspect of subjective opinion, which includes identifying different points of view, identifying different emotive dimensions, and classifying text by opinion. Various conceptual models and computational methods are presented. The models explored in this book include the following: distinguishing attitudes from simple factual assertions; distinguishing between the author's reports from reports of other people's opinions; and distinguishing between explicitly and implicitly stated attitudes. In addition, many applications are described that promise to benefit from the ability to understand attitudes and affect, including indexing and retrieval of documents by opinion; automatic question answering about opinions; analysis of sentiment in the media and in discussion groups about consumer products, political issues, etc. ; brand and reputation management; discovering and predicting consumer and voting trends; analyzing client discourse in therapy and counseling; determining relations between scientific texts by finding reasons for citations; generating more appropriate texts and making agents more believable; and creating writers' aids. The studies reported here are carried out on different languages such as English, French, Japanese, and Portuguese. Difficult challenges remain, however. It can be argued that analyzing attitude and affect in text is an "NLP"-complete problem.

How to Guide Small Groups Based on Readers - Not the Book Elsevier

The English language in its complex shapes and forms changes fast. This thoroughly revised edition has been refreshed with current examples of change and has been updated regarding archeological research. Most suggestions brought up by users and reviewers have been incorporated, for instance, a family tree for Germanic has been added, Celtic influence is highlighted much more, there is more on the origin of Chancery English, and internal and external change are discussed in much greater detail. The philosophy of the revised book remains the same with an emphasis on the linguistic history and on using authentic texts. My audience remains undergraduates (and beginning graduates). The goals of the class and the book are to come to recognize English from various time periods, to be able to read each stage with a glossary, to get an understanding of typical language change, internal and external, and to understand something about language typology through the emphasis on the change from synthetic to analytic. This book has a companion website: <http://dx.doi.org/10.1075/z.183.website>

Teaching and Learning by Doing Corpus Analysis NUS Press

Metaphor and Intercultural Communication examines in detail the dynamics of metaphor in interlingual contact, translation and globalization processes. Its case-studies, which combine methods of cognitive metaphor theory with those of corpus-based and discourse-oriented research, cover contact linguistic and cultural contacts between Chinese, English including Translational English and Aboriginal English, Greek, Kabyle, Romanian, Russian, Serbian, and Spanish. Part I introduces readers to practical and methodological problems of the intercultural transfer of metaphor through empirical (corpus-based and experimental) studies of translators' experiences and strategies in dealing with figurative language in a variety of contexts. Part II explores the universality-relativity dimension of cross- and intercultural metaphor on the basis of empirical data from various European and non-European cultures. Part III investigates the socio-economic and political consequences of figurative language use through case studies of communication between aboriginal and mainstream cultures, in the media, in political discourse and gender-related discourses. Special attention is paid to cases of miscommunication and of deliberate re- and counter-conceptualisation of clichés from one culture into another. The results open new perspectives on some of the basic assumptions of the 'classic' cognitive paradigm, e.g. regarding metaphor understanding, linguistic relativity and concept-construction.

What Are You Grouping For?, Grades 3-8 Psychology Press

How do you approach teaching English in the contemporary classroom? What is expected of a would-be English teacher? The fourth edition of this best-selling text combines theory and practice to present an indispensable introduction to the opportunities and challenges of teaching English in the secondary classroom. It offers insight into the history, policies and definitions surrounding the subject, together with innovative and practical strategies which can be used for effective teaching and learning. Already a major text for many university teacher education courses, the new edition reflects the extent and impact of current reforms whilst retaining its focus on what is of enduring value for English teaching. With an emphasis on developing your own values and on stimulating approaches that underpin English teaching, it will help you navigate your way through changing curriculum requirements, assessment practice and the demands of professional development. Key

topics explored include: Reading, writing and speaking and listening Teaching language and grammar Drama in English teaching Poetry Working with digital technologies Post-16 English language and literature Developing as a critically reflective practitioner. Written particularly with the new and student teacher in mind, Learning to Teach English in the Secondary School aims to

equip readers with the tools to make critically informed judgements about how to teach, develop principled practice and most importantly, be mindful of pupils and their experience of English in the secondary classroom.

Translation-Driven Corpora Routledge

The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in

empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand, and comparative linguistics on the other. The TiEL series features volumes that present interesting new data and analyses, and above all fresh approaches that contribute to the overall aim of the series, which is to further outstanding research in English linguistics.
