Electric Machinery Company, Inc. 800 Central Ave. NE ... Synchronous Machines Like other electrical machines, synchronous machines can be operated as either generators or motors. We will concentrate on synchronous generators, then adapt the theory for synchronous machines. Electrical Machines - Fundamentals Synchronous generators. usually operate together (or in parallel), forming a large power system supplying electrical

energy to the loads or consumers. Synchronous generators. are built in large units, their rating ranging from tens to hundreds of megawatts. Synchronous generator . converts mechanical power to ac electric power. The source of mechanical power, the prime mover. Synchronous Generators Synchronous generators can be readily operated in parallel, and, in fact, the electricity supply systems of industrialized countries typically have scores or even hundreds of them operating in parallel, interconnected by thousands of miles of Synchronous Machines About WEG Electric Machinery Company (WEM) WEM was founded as a service shop in 1891. Manufacturing began in 1897. For over 100 years, WEM has earned its reputation for designing, manufacturing, and servicing large, custom-engineered electrical motors and generators in the U.S. and worldwide. Synchronous Generator, that is, an alternator (AC generator) with the same rotor speed as the rotating magnetic field of the stator. According to the structure, it can be divided into two types: rotating armature and rotating magnetic field.

What Is Synchronous Generator (Asynchronous Generator)

A synchronous electric motor is an AC motor in which, at steady state, the rotation of the shaft is synchronized with the frequency of the supply current; the rotation period is exactly equal to an integral number of AC cycles. Synchronous motors contain multiphase AC electromagnets on the stator of the motor that create a magnetic field which rotates in time with the oscillations of the line current. The rotor with permanent magnets or electromagnets turns in step with the stator field at the
