 4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. Concise yet comprehensive chapters in a modern design present content in an engaging and accessible format, while Tear-Out Review Cards give students a portable study tool containing all of the pertinent information for class and test preparation. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

An International Perspective Academic Press

Practical and applications (rather than theory) based, this book focuses on the needs of individuals interested in starting a small business -- primarily those organized as sole proprietorships, partnerships, or small Subchapter S corporations. It emphasizes small businesses exclusively -- with specific examples of the non-corporate market. The book is mathematically accessible to those with limited mathematical background (formulas are explained rather than derived, and only basic math is used in illustrations and solutions). A full case study is referred to throughout narrative and an accompanying CD-ROM includes all tables in Excel format.

Project Management in Practice Cambridge University Press

This text provides a comprehensive yet accessible introduction to the economics of innovation, written for those with some basic knowledge of economics.

Entrepreneurial Finance Cengage Learning

Global financial markets might seem as if they increasingly resemble each other, but a lot of peculiar aspects qualify different markets with different levels of development. Private equity investors can take advantage of these variations. Structured to provide a taxonomy of the business, *Private Equity and Venture Capital in Europe*, Second Edition, introduces private equity and venture capital markets while presenting new information about the core of private equity: secondary markets, private debt, PPP within private equity, crowdfunding, venture philanthropy, impact investing, and more. Every chapter has been updated, and new data, cases, examples, sections, and chapters illuminate elements unique to the European model. With the help of new pedagogical materials, this Second Edition provides marketable insights about valuation and deal-making not available elsewhere. Covers new regulations and legal frameworks (in Europe and the US) described by data and tax rates. Features overhauled and expanded pedagogical supplements to increase the versatility of the Second Edition. Focuses on Europe. Includes balanced presentations throughout the book.

A Managerial Approach for Developing Markets John Wiley & Sons

An emerging area of study in today's society is the increasing number of crowdfunding platforms across the world. Crowdfunding plays an integral role in global economic development as they are continuing to multiply throughout various professional disciplines. Empirical research is needed that covers the recent growth of crowdfunding projects and assists researchers and experts in providing knowledge on the economic impact of this trend. *Multidisciplinary Approaches to Crowdfunding Platforms* is a pivotal reference source that provides vital research on the emerging programs of crowdfunding in the global digital economy and its numerous applications in professional industries. While highlighting topics such as digital entrepreneurship, business intelligence, and e-commerce, this publication explores the latest findings as well as the risks and limitations of crowdfunding. This book is ideally designed for researchers, managers, practitioners, economists, academicians, instructors, sociologists, developers, consultants, policymakers, and students seeking developing

research on crowdfunding platforms and the latest trends in various disciplines.

International Financial Management Cengage Learning

Entrepreneurial Finance: Venture Capital, Deal Structure & Valuation, Second Edition illustrates how the theory and methods of finance and economics can be used to guide strategic decision-making. This text prepares readers for a variety of situations that confront stakeholders in the rapidly evolving fields of entrepreneurial finance and venture capital, outlining ways to think from the investor's and entrepreneur's perspectives. Readers will find a unique and direct focus on value creation as the objective of each strategic and financial choice. The authors specifically address the influences of risk and uncertainty on new venture success and investment performance, devoting substantial attention to methods of financial modeling and contract design. Finally, they provide a comprehensive survey of approaches to new venture valuation, with an emphasis on applications. The second edition is thoroughly revised to reflect new data, research, and changes in practice in this fast-moving field. It has an increased focus on venture capital, while maintaining its hallmark coverage of the financial aspects of entrepreneurship. Updates throughout address technological changes that have the potential to dramatically change the landscape for finance, such as recent innovations in contracting for early-stage ventures, artificial intelligence and machine learning, and Internet connectivity. Lastly, the book offers a companion website with a useful suite of resources for students and instructors alike, including spreadsheets, templates, simulation applications, and interactive cases and tutorials.

The Art and Science of Growing Ventures Harvard Business Review Press

One of the main reasons to name this book as *Financial Management from an Emerging Market Perspective* is to show the main differences of financial theory and practice in emerging markets other than the developed ones. Our many years of learning, teaching, and consulting experience have taught us that the theory of finance differs in developed and emerging markets. It is a well-known fact that emerging markets do not always share the same financial management problems with the developed ones. This book intends to show these differences, which could be traced to several characteristics unique to emerging markets, and these unique characteristics could generate a different view of finance theory in a different manner. As a consequence, different financial decisions, arrangements, institutions, and practices may evolve in emerging markets over time. The purpose of this book is to provide practitioners and academicians with a working knowledge of the different financial management applications and their use in an emerging market setting. Six main topics regarding the financial management applications in emerging markets are covered, and the context of these topics are "Capital Structure," "Market Efficiency and Market Models," "Merger and Acquisitions and Corporate Governance," "Working Capital Management," "Financial Economics and Digital Currency," and "Real Estate and Health Finance."

Entrepreneurial Small Business + BusinessWeek Sub Card Cengage Learning

"Anyone who comes to pitch on Shark Tank should read this book first!" —Barbara Corcoran, ABC's Shark Tank "I have seen literally thousands of companies trying to raise capital and know that a great pitch deck is critical. This book gives you the playbook for creating yours." —Naval Ravikant, cofounder and CEO, AngelList "I raised twice the amount of money I set out to in a mere five weeks. I'm naming my firstborn child after the Evans." —Slava Menn, cofounder and CEO, Fortified Bicycle
HOW DO YOU LAUNCH THE VENTURE OF YOUR DREAMS? Get Backed isn't just about startup fundraising. It's a handbook for anyone who has an idea and needs to build relationships to get it off the ground. Over the last 3 years, entrepreneurs Evan Loomis and Evan Baehr have raised \$45 million for their own ventures, including the second largest round on the fundraising platform AngelList. In *Get Backed*, they show you exactly what they and dozens of others did to raise money—even the mistakes they made—while sharing the secrets of the world's best storytellers, fundraisers, and startup accelerators. They'll also teach you how to use "the friendship loop", a step-

by-step process that can be used to initiate and build relationships with anyone, from investors to potential cofounders. And, most of all, they'll help you create a pitch deck, building on the real-life examples of 15 ventures that have raised over \$150 million. What's in the book? • The original pitch decks and fundraising strategies of 15 ventures that raised over \$150 million • Email scripts that will get you a meeting with angel investors, venture capitalists, and potential board members • Pitching exercises developed by startup talent beds like Stanford University's d.school and Techstars • A breakdown of the 10 essential pitch deck slides, how to create them, and what questions you should answer with each • An overview of the 5 main funding sources for startups, the pros and cons of each, and who the big players are • A crash-course in visual and presentation design that will make any deck beautiful • Templates for 4 stories every entrepreneur should know how to tell • The story of one entrepreneur who showed up in Silicon Valley with no network and six months later had investments from Fred Anderson, Bono, and Peter Thiel Get Backed will show you exactly what it takes to get funded and will give you the tools to make any idea a reality.

CFIN Cram101

The decision to diversify lies at the core of corporate strategy and is one of the most important decisions for top management. Matthias Knecht introduces a new perspective on corporate diversification that extends the academic discussion and reveals substantial new insights with regards to one of the most pressing questions in strategic management: what makes a diversification strategy successful? The author introduces the dynamism of industries as the dominant force in the firm's environment that influences the organization on all levels. Due to strategic, organizational, and managerial similarities of businesses competing in similar dynamic environments, synergistic benefits and superior economic performance can be realized through the combination of dynamic-related businesses in the corporate portfolio. This study provides a quantitative, multidimensional operationalization of industry dynamism and an in-depth assessment of the dynamism of a wide range of industries. At the core of the study lies the investigation of the performance impact of dynamic-related diversification strategies. The results provide new insights into successful portfolio construction strategies in the face of today's dynamic environments.

Technology Entrepreneurship Stanford University Press

"Entrepreneurial Small Business (ESB) " provides students with a clear vision of small business as it really is today: Katz focuses on the distinctive nature of small businesses that students might actually start versus high growth firms. The goal of the companies described in this textbook is personal independence with financial security; not market dominance with extreme wealth. Traditional beliefs and models in small business are discussed, as well as the latest findings and best practices from academic and consulting arenas. Katz and Green recognize the distinction between entrepreneurs who aim to start the successor to Amazon.com or the pizza place around the corner. They discuss the challenges facing entrepreneurs, while keeping focused on the small businesses students plan to start.

Studyguide for Entrepreneurial Finance Springer Science & Business Media

This book provides a framework for understanding micro, small and medium sized enterprises (MSMEs) as important contributors to economic growth. By examining the economic and investment decisions behind these businesses, the author shows how managers of MSMEs can add value to the firm by applying managerial finance tools. Early chapters establish the basic tenets of new venture development and financing and explore the economic environment that business-owners inhabit, focusing on venture capital, microfinance intervention, and public sector interventions. Later chapters guide the reader through the process of financial planning and forecasting, and valuation, finishing with insights into how to harvest investments and make sound financial decisions. The book has interdisciplinary appeal and offers a timely consideration of MSMEs in developing economies. It will be valuable reading for all interested in the management and development of small businesses, the finance of entrepreneurship and policy affecting small and medium sized enterprises.

Entrepreneurial Finance: Finance and Business Strategies for the Serious Entrepreneur Cambridge Scholars Publishing

For prospective and existing "high-growth" entrepreneurs and students. "A company's finances dictate success or failure" There are plenty of books on entrepreneurial finance with exhaustive scope and coverage however the basics understanding of information related to the management of COST, RISK, and CONTROL for accessing and evaluating the impact of entrepreneurial financial decisions is missing. This book is the first of its kind that examines and explains entrepreneurial financial decisions from these perspectives and aims to bridge the gap by specifically addressing and developing the financial understanding for effective management of financial resources. This book will help prospective and existing "high-growth" entrepreneurs who are not financially literate in developing a conceptual understanding of the fundamentals of financial decisions and enable them to better manage their financial resources and create economic value.

Successfully Launching New Ventures South Western Educational Publishing

Merging theory and practice into a comprehensive, highly-anticipated text Corporate Finance continues its legacy as one of the most popular financial textbooks, with well-established content from a diverse and highly respected author team. Unique in its features, this valuable text blends theory and practice with a direct, succinct style and commonsense presentation. Blockchain in Data Analytics BoD - Books on Demand

"Many interesting developments have occurred in the world of venture capital since the publication of the first edition of this book in 2006, which prompted us to revise the book for the second edition. While the organization of the book remains unchanged, many of the chapters are substantially rewritten. For example, in Chapter 5, we re-ranked top VC firms, incorporating the latest performance statistics, fundraising and investment activities, notable exits, and (as always) our subjective opinions. In Chapter 6, we examine further evidence of the deepening globalization of the industry. In Chapters 3, 4, and 7, we analyze the impact of the 1999-2000 Internet bubble years on the VC risk and returns, as investments made in those years are finally mature and thus now a part of the performance evaluation analysis. We also incorporated expositional improvements throughout the book based on reader feedback on the first edition. Another feature of the new edition is that the VCV model, used extensively in Part III of the book, is now available as a Web-based application available on <http://VCVtools.com>. Significant collaborative efforts went into developing this tool, which we believe will be of interest to a broad audience, including practitioners interested in valuing VC-backed company stocks and employee stock options"

Financial Management from an Emerging Market Perspective Stanford University Press

More extensive regulations, new technologies, and new means of communication have significantly changed the financing landscape for startups and small to medium-sized companies (SMEs). This volume provides a contemporary research-based overview of the latest trends in entrepreneurial finance and outlines expected future developments. Starting with the status quo in market regulations and the financing structure of SMEs, it addresses a broad range of new financing alternatives for innovative startups (e.g. business angel financing, venture capital and corporate venture capital), as well as recent social phenomena (e.g. crowdfunding and initial coin offerings (ICOs)). Incorporating qualitative, quantitative and mixed analytical methods, the book contributes to a better understanding of the financing world by reflecting both the researcher's and the practitioner's perspective.

Entrepreneurial Finance Yale University Press

Written by teachers and successful entrepreneurs, this textbook includes guidance, instruction and practical lessons for the prospective entrepreneur.

Entrepreneurial Finance BFC Publications

Other books present corporate finance approaches to the venture capital and private equity industry, but many key decisions require an understanding of the ways that law and economics work together. This revised and updated 2e offers broad perspectives and principles not found in other course books, enabling readers to deduce the economic implications of specific contract terms. This approach avoids the common pitfalls of implying that contractual terms apply equally to firms in any industry anywhere in the world. In the 2e, datasets from over 40 countries are used to analyze and consider limited partnership contracts, compensation agreements, and differences in the structure of limited partnership venture capital funds, corporate venture capital funds, and government venture capital funds. There is also an in-depth study of contracts between different types of venture capital funds and entrepreneurial firms, including security design, and detailed cash flow, control and veto rights. The implications of such contracts for value-added effort and for performance are examined with reference to data from an international perspective. With seven new or completely revised chapters covering a range of topics from Fund Size and Diseconomies of Scale to Fundraising and Regulation, this new edition will be essential for financial and legal students and researchers considering international venture capital and private equity. An analysis of the structure and governance features of venture capital contracts In-depth study of contracts between different types of venture capital funds and entrepreneurial firms Presents international datasets from over 40 countries around the world Additional references on a companion website Contains sample contracts, including limited partnership agreements, term sheets, shareholder agreements, and subscription agreements

Multidisciplinary Approaches to Crowdfunding Platforms Pearson College Division

Timely, practical, comprehensive manual for financing entrepreneurial ventures, with a strong European perspective.

Entrepreneurial Finance Bloomsbury Publishing

This second edition of the critically acclaimed core textbook provides students from technology and science based backgrounds with the theoretical knowledge and practical skills required to transform innovative ideas into commercially viable businesses for profit or social ends. Blending theory, policy and practice in a manner that is accessible to readers with little prior knowledge of business commercialisation, it offers a framework for understanding the entrepreneurial process for technological ideas. The book provides students with comprehensive guidance on the specialized field of 'technopreneurship'. It provides the tools and frameworks required for managing, commercialising and marketing technological innovation. With real life examples and case studies from a range of countries and industries, it will equip students with the understanding required to successfully launch their product. This text caters for undergraduate and postgraduate students studying technology entrepreneurship modules on engineering, science and computing technology programmes. New to this edition: -All chapters updated to reflect the evolution of theory and practice in the field -New cases on digital entrepreneurship, growth and scaling -Extended geographical coverage of case studies -Entrepreneurial practices updated to include recent research -Strategic context of business models, business growth and scaling, digital entrepreneurship, entrepreneurial marketing, organization design and crowdfunding developed and updated.
