revealing Ayahuasca's mind-expanding impact on human consciousness. Explore the mesmerizing world of Ayahuasca in this classic volume. Featuring the visionary art of Pablo Amaringo and the anthropological expertise of Luis Eduardo Luna, *Ayahuasca Visions* presents nearly 50 vibrant, full-color pieces of artwork. The "water engine" is an invention

unfortunately invented many times. Hydrogen from water is very abundant, renewable and can be used in both energy poor and rich countries. Crude oil and natural gas are limited energy resources. But there are many people who think that certain promising technologies have been suppressed by various political or economic powers, usually with the purpose of protecting their investments and interests and, at the already more absurd extremes of the conspiracy illogical, for sinister motivations of much greater scope. In this new work, the versatile composer and writer Van Jaag, accompanies us on an exciting journey through the history of this unknown invention and its invented inventors.
