"This book will be an invaluable aid for any teacher who is teaching K-8 math online or may be called upon to teach either wholly online or in blended classrooms with student in physical classrooms part time and learning from home part time to limit physical class

sizes. This new book will feature Marian's special brand of lucid explanation of difficult concepts, engaging teaching examples, guidance for teachers about what to expect, troubleshooting tips, and formative assessments. This book will be a wonderful supplement to Marian's Differentiating text, and a stand-alone aid for new readers. It can be used with any program that schools may be using. This resource will show how materials teachers already have might be appropriately adapted to help enrich mathematics instruction in the virtual environment. It shows how teachers can have students use their home environment and materials as the basis

for engaging open questions and tasks. It shows teachers how to build and maintain community with students online, explores the logistics of independent meetings with students and parents, and setting up "office hours" for individual help. It provides samples and directions for duplicating or creating tools like number lines and manipulatives at home. It provides exemplar videos available either on the TCP website or a YouTube channel, that teachers can use or recreate for communicating with parents about goals, methods, and materials, or to provide students spoken instruction that they can save and replay"--

I have no doubt that many of you who read this book will be captivated by it, just as I have been captivated.

This book is woven through evocative stories told by masterful educators who came together to explore the meanings of learning, teaching, and life. For those who have read *Speaking of Teaching*, it is not a surprise to hear, again, the profoundly touching, humane, and

imaginative voices of these authors. This book draws me in, touches my heart, and refreshes my mind.
—Hongyu Wang, Professor, Oklahoma State University, Tulsa, OK, US

The authors invite us to join them in asking, “What else can learning be?” What else indeed? What is beyond the recipes, rubrics, formulas, and credentials of contemporary education? Deep in the heart of their own personal stories, told and untold, spoken and unspoken, the authors search and tell. With an artful admixture of stories, poems, artwork, and reflections, this book is a rare opportunity to listen in on an eight-year extended conversation amongst these gifted educators

as they become increasingly present in their learning journeys.
—Arden Henley, Professor and Principal, Canadian Programs, City University of Seattle, Vancouver, BC, Canada

Teach Well, Live Well
Pearson Scott Foresman

This textbook offers practical guidelines for integrating science, technology, engineering, and mathematics into the

elementary classroom in the context of addressing real-world problems, and cultivating in students high-level thinking and problem-solving skills. Designed to equip teachers and future teachers with tools to create and implement standards-based STEM curriculum and cognitively demanding tasks, author Sherri Cianca offers hands-on, easily implemented strategies that foster student reasoning, autonomy, and humanity. This fresh approach to STEM teaching empowers teachers (preservice and inservice) and other leaders to better understand the standards and better design effective instructional practices. The chapters work together to advance

teachers' abilities to achieve mastery-level understanding of content, translate standards into student-friendly curriculum, and create a robust learning environment. Each chapter contains "probes" to uncover incomplete and inaccurate conceptions and to focus attention on key learning elements. Chapter summaries and "Reflect and Apply" sections reinforce professional development, and appendices expand on chapter content and provide rich examples of STEM units, curriculum, and assessment criteria. Dr. Cianca's vision is that teachers serve as well-equipped change agents that will empower their students to transfer

STEM learning into applications that will impart a positive impact on our future world.

 Vocabulary Links for English Language Development for grade 3, the updated edition of the original book, features motivating lessons designed for ELLs and other students who need to

strengthen their vocabulary skills. Workbooks reinforce knowledge of grade-level content words in science and social studies. Lessons focus on tier 2 and tier 3 vocabulary as identified by the Common Core State Standards. Vocabulary is taught using various modes of instruction, allowing for multiple exposures. Taught words are presented in language that students are familiar with, avoiding formal definitions. Teacher's guides are sold separately and identify tier 2 and tier 3 vocabulary, Lexile® measures, and more. [Journal for Research in Mathematics Education](#) IAP

The central issue of this volume is how to meet the linguistic and

academic needs of the increasing numbers of English learners (ELs). At the center of educational turns is the role of school professionals in this Common Core Standards era. Teacher education programs and professional development, or pre-service and in-service programs for teachers of ELs, are currently being reframed to reflect the new demands placed on all teachers in light of the new standards. The expectation is that ELs can learn, and their teachers possess the expertise to teach, both discipline content and academic English at the same time. The large numbers of ELs across the country have created a wide gap between what teachers have been

trained to do and the skills they need to teach and reach them effectively. This practical handbook brings together research, policy and practice on teacher effectiveness, pre-service and in-service programs in the context of student linguistic and cultural diversity. Key features include:

- Clearly

articulated teacher training and professional development programs; • Coverage of Common Core curriculum and a variety of instructional programs and practices with research-based tools to implement them; and,

- Policies to equitably and effectively prepare ELs academically and linguistically.
