Spatial and Spatio-
Temporal Epidemiology is
a peer-reviewed scientific
journal that provides a
home for high quality
work which straddles the
areas of GIS,
epidemiology, exposure
science, and spatial
statistics. The journal
focuses on answering
epidemiological questions
where spatial and spatio-
temporal approaches are
appropriate. The methods

should help to advance
our understanding of
infectious and non-
infectious diseases in
humans.

Handbook of Spatial
Epidemiology - 1st Edition
- Andrew B ...

"Spatial Epidemiology"
mixes practical
application with theory to
provide a critical review of
methods, challenges,
issues, strengths, and
limitations of spatial
analysis in epidemiology.
Subsections of the book
progress from types of
data, to statistical
methods, to disease

mapping and clustering,
then end with exposures
and links to health.

Spatial Epidemiology: Methods and Applications (Oxford ...

The second part presents
basic statistical methods
used in spatial
epidemiology, including
fundamental likelihood
principles, Bayesian
methods, and testing and
nonparametric
approaches. With a focus
on special methods, the
third part describes
geostatistical models,
splines, quantile
regression, focused

clustering, mixtures, multivariate methods, and much more.
