"This dynamic text comprehensively examines dimensions of Women's health. The 1990s have identified women's health as a critical new frontier in health education. This book takes neither a traditional nor feminist approach to women's health. It is a data driven, contemporary combination of both approaches with an emphasis on informed personal decision making. The book offers a scientific review of women's health issues from epidemiological, historical, legal, social and clinical perspectives. The concept of "Consumerism" is stressed throughout the spectrum of women's health issues. Based on scientific data and clinical findings, this book is referenced with the most current information and data available. The text is ideal for courses focusing on women's studies in health education, nursing, allied health, and psychology." "Special Features: clinically accurate assessment of the issues; sensitivity to, and discussion of, the full spectrum of factors that contribute to the issues (ethnic, psycho-social, political, legal, etc.); format helps structure students' analytical and personal decision making skills."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. As the first examination of women's foremost contributions to Jerzy Grotowski's cross-cultural investigation of performance, this book complements and broadens existing literature by offering a more diverse and inclusive re-assessment of Grotowski's legacy, thereby probing its significance for contemporary performance practice and research. Although the particularly strenuous physical training emblematic of Grotowski's approach is not gender specific, it has historically been associated with a masculine conception of the performer incarnated by Ryszard Cieslak in *The Constant Prince*, thus overlooking the work of Rena

Mirecka, Maja Komorowska, and Elizabeth Albahaca, to name only the leading women performers identified with the period of theatre productions. This book therefore redresses this imbalance by focusing on key women from different cultures and generations who share a direct connection to Grotowski's legacy while clearly asserting their artistic independence. These women actively participated in all phases of the Polish director's practical research, and continue to play a vital role in today's transnational community of artists whose work reflects Grotowski's enduring influence. Grounding her inquiry in her embodied research and on-going collaboration with these artists, Magnat explores the interrelation of creativity, embodiment, agency, and spirituality within their performing and teaching. Building on current debates in performance studies, experimental ethnography, Indigenous research, global gender studies, and ecocriticism, the author maps out interconnections between these women's distinct artistic practices across the boundaries that once delineated Grotowski's theatrical and post-theatrical experiments. Motherhood in Contemporary International Perspective Blackwell
Publishing

This one-of-a-kind compendium serves as a reminder of women's strength in the contemporary art market place, and acts as testament to the innovation, power, and necessity of women's art and its influence. Featuring a select group of living women artists and architects who have made significant and groundbreaking contributions to contemporary art, the volume profiles an international cross-section of women artists--from emerging to established--who address critical, social, environmental, psychological, historical, and social issues through their art. Included are works by five MacArthur Foundation Fellows. Ultimately, this book promotes women artists in an ongoing dialogue through the exploration of their work and process, while offering fresh perspectives on feminism and notions of cultural power. Readers receive a unique glimpse of seminal works such

as Judy Chicago's *The Dinner Party*, as well as brand new pieces inspired by The Women's March on Washington in 2017. Complete with a foreword by Elizabeth Sackler, PhD, this compilation is ideal for educators, students, curators, collectors, and all those who support the arts.

Contemporary Women's Movements in Hungary Jones & Bartlett
Publishers

As the first and only book in any language on contemporary women's movements in Hungary, this groundbreaking study focuses on the role of women's activism in a society where women are not yet adequately represented by established parties and political institutions. Drawing on eyewitness accounts of meetings and protests, as well as first-person interviews with leading female activists, Katalin Fábíán examines the interactions between women's groups in Hungary and studies the unique brand of democracy they have forged in postcommunist Eastern Europe. Through her analysis, she demonstrates how democratization and globalization—with their attendant range of challenges and opportunities—have led women to redefine public-private divides.

Prevention Issues for Women's Health in the New Millenium
Routledge

Health issues significant to women are finding more focus in science and medicine and in popular literature. This book investigates some of the leading issues in women's health, including women and weight, women and mental illness, women and reproductive health, and international women's health issues by providing a variety of readings from government reports to magazine articles to personal narratives written by women struggling with such conditions.

Counseling the Contemporary Woman Saunders

The book begins by raising a thoughtful question, "Can women have it all, family, work and everything in between?" If yes, then are women 'superwomen'? More importantly, what or who is a 'superwoman'? In other words, this book discusses the role of contemporary women in today's modern career world and its myriad of challenges, and in turn explores the nuanced role of millennial women and provides insights into how women juggle demands at home and at work; family and career management. Using case studies from interviews with two hundred women, the authors draw on data from women themselves to explore how they navigate their daily lives to achieve work-life balance. This book will motivate readers to reframe their roles at home and in the workplace and hopefully help them reclaim control in their career/family journeys. This book is also an essential guide to thought leadership for women in leadership positions or aspiring to be in leadership positions. Finally, this book will demystify gender roles in the workplace and at home, enabling women of all ages and backgrounds to embark on their career with confidence. This book will motivate younger women who are embarking on their first career and looking to develop the inner leadership that helps them thrive in life.

The Politics of Women's Health Care in the United States

Jones & Bartlett Publishers

Complementary and integrative medicine (CIM) has become big business internationally, in particular with regards to a range of women's health issues. With this context in mind, Women's Health and Complementary and Integrative Medicine constitutes a valuable and timely resource for those looking to understand, initiate and expand CIM research and evidence-based debate with regards to a wide range of women's health care issues. The collection brings together leading international CIM researchers from Australia, the USA, the UK, Germany and Canada, with backgrounds and expertise in health social science, statistics, qualitative methodology, clinical trial design, clinical pharmacology, health services research and public health. Contributors draw upon their own CIM research work and experience to explain and review core research and practice issues pertinent to the contemporary field of CIM and its future development with regards to women's health. The book outlines the core issues, challenges and opportunities facing the CIM-women's health field and its study and will provide insight and inspiration for those practising, studying and/or researching the contemporary relations between CIM and women's health and health care.

Contemporary Women of Pop and Rock (Songbook) Universe Publishing(NY)

In a social and political environment that has become more accepting of gender equity, women's health issues have emerged in the forefront of the social policy agenda of the United States. The organized women's movement has been successful in many of its endeavors to improve opportunities for women in society in areas such as education, business, sports and the professions. As this book shows, they also have been successful in changing the definition of women's health and placing many elements of health care needs on the nation's policy agenda. During the late 1960s and early 1970s, abortion rights emerged as a central concern for many women's rights activists, some of whom took on women's other health issues. The Politics of Women's Health Care in the United States shows how the evolution of the women's health agenda has been a reaction to the empowerment of women in the years after the emergence of the contemporary women's movement in 1966 and the subsequent 'social reconstruction' of women from dependent to advantaged population.

Contemporary Topics in Women's Mental Health: Global Perspectives in a Changing Society considers both the mental health and psychiatric disorders of women in relation to global social change. The book addresses the current themes in psychiatric disorders among women: reproduction and mental health, service delivery and ethics, impact of violence, disasters and migration, women's mental health promotion and social policy, and concludes each section with a commentary discussing important themes emerging from each chapter. Psychiatrists, sociologists and students of women's studies will all benefit from this textbook. With a Foreword by Sir Michael Marmot, Professor of Epidemiology and Public Health, University College London; Chair, Commission on Social Determinants of Health
Understanding Women's Health Issues Bloomsbury Publishing
Two generations ago, most essayists were men, but in recent decades, women writers have claimed the personal essay, using its freedom to explore contemporary life in all its diversity. Wendy Martin has gathered a wide range of writing, from classics by Maya Angelou and Joan Didion to new voices of younger writers, many appearing here for the first time in book form.

Contemporary Women's Health with PowerWeb Woodrow Wilson Center Press

This book is an historical survey of women's sport from 1850-1960. It looks at some of the more recent methodological approaches to writing sports history and raises questions about how the history of women's sport has so far been shaped by academic writers. Questions explored in this text include: What are the fresh perspectives and newly available sources for the historian of women's sport? How do these take forward established debates on women's place in sporting culture and what novel approaches do they suggest? How can our appreciation of fashion, travel, food and medical history be advanced by looking at women's involvement in sport? How can we use some of the current ideas and methodologies in the recent literature on the history and sociology of sport in order to look afresh at women's participation? Jean Williams's original research on these topics and more will be a useful resource for scholars in the fields of sports, women's studies, history and sociology.

Japanese women, singled out for their commitment to the role of housewife and mother, are now postponing marriage and bearing fewer children. Japan has become one of the least fertile and fastest aging countries in the world. Why are so many Japanese women opting out of family life? To answer this question, the

author draws on in-depth interviews and extensive survey data to examine Japanese mothers' perspectives and experiences of marriage, parenting, and family life. The goal is to understand how, as introspective, self-aware individuals, these women interpret and respond to the barriers and opportunities afforded within the structural and ideological contexts of contemporary Japan. The findings suggest a need for changes in the structure of the workplace and the education system to provide women with the opportunity to find a fulfilling balance of work and family life.

Grotowski, Women, and Contemporary Performance Bloomsbury Publishing

Divided into 15 chapters, this book provides the reader with an insight into certain representations of mothers and motherhood in history and today's societies in some areas of the world, notably in Britain and Asia. Key facts about the history of motherhood are

presented, together with the use of very recent notions and phrases portraying 'good' and 'bad' mothers. An analysis of the concepts of naming and blaming, along with regret with respect to mothers in 21st century societies, provides food for thought. Other issues addressed are varied and numerous: the politics of early intervention, feminist critique, mothers with disabilities and mothers of disabled children, incarcerated mothers, surrogate mothers, teenage mothers, lesbian mothers, and mothering in Eastern Asia, namely in China, Japan, and Korea. Interestingly, both visual arts and literature play a crucial role in this analysis. The publication will appeal to students, academics, researchers, and the general public interested in and seeking to comprehend the shifts that have occurred over time in connection with the vast and inexhaustible subject of motherhood and mothers - a private and public matter. Readers are also provided with a rich reference section dealing with the latest publications on the issues tackled by prominent academics and researchers in human geography, women's studies, sociology, gender studies, contemporary history, and the arts.
