**Mysterious World:** Ireland represents the next generation of travel guides. More than just a listing of names, numbers, and dates, *Mysterious World* takes readers behind the scenes to help them understand the history and the mystery of this sacred isle. The book delves deep into Ireland's legendary past, looking especially at the mysterious people who invaded Ireland time and time again in search of their destinies. The book also covers Ireland's known history up to the time of Cromwell, providing a thorough understanding of what it is to be Irish. In addition, the book presents one man's quest to rediscover mysterious Ireland as he travels throughout the four ancient provinces of Ireland.

*How to Integrate Solar Shading in Sustainable Buildings* Random House Books for Young Readers  
 In its thirtieth session the Commission reviewed the intersessional activities of its Scientific Advisory Committee (SAC) and its Committee on Aquaculture (CAQ). Based on the advice emanating from SAC and proposals by Members, the GFCM adopted respectively: three binding recommendations on fisheries management measures, including on fishing effort and on the protection of sensitive habitats; two recommendations on illegal, unreported and unregulated (IUU) fishing, including on the establishment of a black list of vessels and on data confidentiality procedure. It also endorsed three recommendations from the International Commission for the Conservation of Atlantic Tunas (ICCAT), including on the establishment of a programme for transshipment by large-scale longliners. The GFCM reiterated its satisfaction with progress made in the implementation of the five regional projects executed by FAO in support of the Commission. The Commission ascertained its financial situation and agreed to use arrears to build a Working Capital Fund. In the Secretariat, it established a post of Statistician and a post of Programmer/System Analyst. Work progress related to the new headquarters of the Commission was reviewed. The Commission decided to postpone the adjustments to its Rules of Procedure to its next plenary. The Commission established a Compliance Committee. It formalized the Environment Aquaculture Mediterranean Network (EAM) and the Statistical Information System on Aquaculture (SIPAM) as subsidiary bodies of CAQ, and endorsed the guidelines prepared by the Joint GFCM/ICCAT Working Group on Sustainable Tuna Farming. The Commission agreed on its programme of work and adopted its autonomous budget for the year 2006. The GFCM elected its new Bureau

**Positive Psychology: Theory, Research And Applications** Penguin Books

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the *European Journal of Social Work*.

Topology is a branch of pure mathematics that deals with the abstract relationships found in geometry and analysis. Written with the mature student in mind, *Foundations of Topology*, Second Edition, provides a user-friendly, clear, and concise introduction to this fascinating area of mathematics. The author introduces topics that are well-motivated with thorough proofs, that make them easy to follow. Historical comments are dispersed throughout the text, and exercises, varying in degree of difficulty, are found at the end of each chapter. *Foundations of Topology* is an excellent text for teaching students how to develop the skills for writing clear and precise proofs.

This text is listed on the Course of Reading for SOA Exam P. *Probability and Statistics with Applications* is an introductory textbook designed to make the subject accessible to college freshmen and sophomores concurrent with Calc II and III, with a prerequisite of just one semester of calculus. It is organized specifically to meet the needs of students who are preparing for the Society of Actuaries qualifying Examination P and Casualty Actuarial Society's new Exam S. Sample actuarial exam problems are integrated throughout the text along with an abundance of illustrative examples and 870 exercises. The book provides the content to serve as the primary text for a standard two-semester advanced undergraduate course in mathematical probability and statistics. 2nd Edition Highlights Expansion of statistics portion to cover CAS ST and all of the statistics portion of CAS SAbundance of examples and sample exam problems for both Exams SOA P and CAS SCombines best attributes of a solid text and an actuarial exam study manual in one volumeWidely used by college freshmen and sophomores to pass SOA Exam P early in their college careersMay be used concurrently with calculus coursesNew or rewritten sections cover topics such as discrete and continuous mixture distributions, non-homogeneous Poisson processes, conjugate pairs in Bayesian estimation, statistical sufficiency, non-parametric statistics, and other topics also relevant to SOA Exam C.

**Summary A** hands-on guide that will teach how to design and implement scalable, flexible, and open IoT solutions using web technologies. This book focuses on providing the right balance of theory, code samples, and practical examples to enable you to successfully connect all sorts of devices to the web and to expose their services and data over REST APIs. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Because the Internet of Things is still new, there is no universal application protocol. Fortunately, the IoT can take advantage of the web, where IoT protocols connect applications thanks to universal and open APIs. About the Book *Building the Web of Things* is a guide to using cutting-edge web technologies to build the IoT. This step-by-step book teaches you how to use web protocols to connect real-world devices to the web, including the Semantic and Social Webs. Along the way you'll gain vital concepts as you follow instructions for making Web of Things devices. By the end, you'll have the practical skills you need to implement your own web-connected products and services. What's Inside Introduction to IoT protocols and devices Connect electronic actuators and sensors (GPIO) to a Raspberry Pi Implement standard REST and Pub/Sub APIs with Node.js on embedded systems Learn about IoT protocols like MQTT and CoAP and integrate them to the Web of Things Use the Semantic Web (JSON-LD, RDFa, etc.) to discover and find Web Things Share Things via Social Networks to create the Social Web of Things Build a web-based smart home with HTTP and WebSocket Compose physical mashups with EVRYTHNG, Node-RED, and IFTTT About the Reader For

both seasoned programmers and those with only basic programming skills. About the Authors Dominique Guinard and Vlad Trifa pioneered the Web of Things and cofounded EVRYTHNG, a large-scale IoT cloud powering billions of Web Things. Table of Contents PART 1 BASICS OF THE IOT AND THE WOT From the Internet of Things to the Web of Things Hello, World Wide Web of Things Node.js for the Web of Things Getting started with embedded systems Building networks of Things PART 2 BUILDING THE WOT Access: Web APIs for Things Implementing Web Things Find: Describe and discover Web Things Share: Securing and sharing Web Things

This Guide is primarily intended for applicants and holders of international registrations of marks, as well as officials of the competent administrations of the Member States of the Madrid Union. It leads them through the various steps of the international registration procedure and explains the essential provisions of the Madrid Agreement, the Madrid Protocol and the Common Regulations.

**Storytelling: il potere delle storie d'impresa. Dal prodotto alla Storytelling Organization** WIPO

Some say all love stories are the same. A boy meets a girl and they fall in love eventually. But is that where the story ends? What about the journey they make together, the feelings they share, and the moments they live? Aarush is a reticent boy who has dreams of making it to a premier engineering college. Staying away from home and working hard towards his dreams, he falls in love under strange circumstances. That too, truly, madly, deeply. Can love happen at sixteen, or is it just a passing infatuation? A true yet unusual emotional love saga, In Course of True Love explores the reality of puppy love, and plumbs its depth, its warmth, and its true meaning.

Adopted internationally by business schools and MBA programmes, The New Strategic Brand Management is simply the reference source for senior strategists, positioning professionals and postgraduate students. Over the years it has not only established a reputation as one of the leading works on brand strategy, but also has become synonymous with the topic itself. Using an array of international case studies, Jean-Noël Kapferer covers all the leading issues faced by brand strategists today. With both gravitas and intelligent insight, the book reveals new thinking on topics such as putting culture and content into brands, the impact of private labels and the comeback of local brands. This updated fifth edition of The New Strategic Brand Management builds on its impressive reputation, including new information to enable students and practitioners to stay up to date with targeting, adding recent research and market knowledge to the discipline. With dedicated sections for specific types of brands (luxury, corporate and retail), international examples and case studies from companies such as Audi, Nivea, Toyota and Absolut Vodka; plus models and frameworks such as the Brand Identity Prism; it remains at the forefront of strategic brand thinking.

**New Approaches to Creating and Evaluating Brand Equity** John Benjamins Publishing

Recent decades have seen significant changes in the biota of the Mediterranean and the Black Sea due to the introduction of non-indigenous species. Reliable scientific data on the dynamics of their distribution and abundance are essential to understand their ecological and economic effects. This review - in addition to providing images and descriptions of relevant species to aid in identification - presents a unique historical and regional perspective on these species' impacts, based on many years' worth of research. The Black Sea's primary invaders come from the Mediterranean. Species like the comb jelly Mnemiopsis leidyi have caused major declines in biodiversity in the region by crippling key segments of the food chain. Similar results have been noted in the Marmara Sea, a crucial water exchange point located between the Aegean Sea and the Black Sea. Infiltration into the Mediterranean comes from both the east and west - with Lessepsian species passing through the Suez Canal and fish and invertebrate species originating from the Atlantic expanding their ranges. As of the publication of this review, over 900 non-indigenous species have been reported in the Mediterranean and almost 300 in the Black Sea, with these numbers expected to rise in the future. Numerous Lessepsian fishes are commercially relevant and have been absorbed into local markets, particularly in the eastern Mediterranean region. While these species are targeted through various fishing techniques, many others are simply discarded due to a lack of value and there are even some, such as lionfishes, pufferfishes and several species of jellyfishes, that present immediate dangers to human health. Stewardship of native species, regional cooperation on the enforcement of legal measures, increased public awareness and the creation of marine protected areas are thus essential to minimize and reduce the impacts of non-indigenous species both in the Mediterranean and the Black Sea.

**The New Strategic Brand Management** Andersen Press Limited

"Kate Hefferon and Ilona Boniwell have done an excellent job on this introduction to Positive Psychology! I encourage educators, students and everyone else interested in an updated, well-written and culturally balanced approach to the scientific study of human flourishing, to read this highly accessible, yet rigorously crafted text; and to get it under your skin by ways of carefully chosen tests and exercises." Hans Henrik Knoop, Aarhus University, Denmark and President, European Network for Positive Psychology "This accessible, yet comprehensive, book provides an excellent new resource in the area of positive psychology. Students, researchers and practitioners alike will benefit from the skilful and lively integration of theory, research and application. The authors are prominent members of the international positive psychology movement and as such are able to deliver a confident, practical and overarching assessment of the area, integrated into psychology more widely." Angela Clow, University of Westminster, UK "This is an exceptional book that synthesizes more than a decade of positive psychology research into chapters that are engaging, accessible, and educational. Hefferon and Boniwell demonstrate a mastery of the literature through the ways in which they have marshaled the evidence from research and practice into this invaluable resource. This book will become an essential reference guide for researchers, educators and practitioners of positive psychology around the world." Professor Alex Linley, Founding Director, Capp "This book is a valuable resource for students looking for an introduction to Positive Psychology, but also wanting to get a comprehensive and updated overview of this innovative approach to the study of human behaviour and experience. It provides a broad coverage of the most relevant theories and constructs developed within Positive Psychology, and of their relevance for intervention and application in the most diverse life domains. Hefferon and Boniwell use a rigorous though accessible and friendly style of presentation. By means of effective learning supports, they stimulate readers' active engagement in critical reflections on each topic. The

authors address the several issues and open questions which still characterize Positive Psychology as a relatively recent domain through a balanced and objective approach." Antonella Delle Fave, University of Milano, Italy "Kate Hefferon and Ilona Boniwell have produced the first textbook which has set out purposefully to support students and teachers in higher education in the exciting new area of positive psychology. The authors have experience of teaching the lectures described in each chapter and the book is written in a way that students will find engaging and fun. Each chapter has clear learning objectives, mock essay questions, measurement tools, summaries and a guide to further resources. The content has been well researched and the early chapters cover the main concepts of positive psychology such as emotions, happiness, wellbeing, optimism, and resilience. The later chapters are more novel and cover interventions and applications all with a critical eye. Of particular note is the chapter on the body in positive psychology - a topic which is frequently omitted from the 'thoughts and feelings' approach of other texts in this area. I would strongly recommend this book to all students and teachers of psychology." Nanette Mutrie, Professor of Exercise and Sport Psychology, Strathclyde University, UK Discover the latest research findings and thinking on the topics of happiness, flow, optimism, motivation, character strengths, love and more! Find out how happiness levels can be increased, what stops us from flourishing and how positive psychology can be applied to many professional disciplines. This new textbook combines a breadth of information about positive psychology with reflective questions, critical commentary and up to date research. It is written in a witty, engaging and contemporary manner and includes: Personal development exercises to help you meld together research and application Mock essay questions to get essay writing going Think about it boxes to get you thinking about the concepts and theories discussed Experiments boxes giving you most influential positive psychology experiments to date Suggested resources guiding you where to go next Measurement tools presenting popular positive psychology tools Time out boxes on key issues, concepts and thinkers Chapter summaries to help you check their understanding Review questions to enhance your learning Positive Psychology is key reading for students taking modules in positive psychology and well-being, and will also be of interest to students of applied, coaching and sports psychology, as well as psychologists, coaches, counsellors and researchers interested in this burgeoning field.

**Prehistoric Maya Community and Settlement at Nohmul, Belize** If You Come Softly

The book Constructions in French is the first collected volume to focus on French syntax from a constructionist perspective. It has been written with two kinds of readers in mind: for readers interested in the relationship between the French linguistic tradition and cognitive linguistics, and for readers who would like to examine how constructional analysis can be applied to a variety of French language phenomena. The eleven papers illustrate the insights generated by combining lexicalist and constructionist approaches, focusing on syntax as a dynamic system and using corpus data from a variety of speech genres. The contributions provide new findings about French usage trends (in linguistics and in psycholinguistics), including insights into new, nonstandard and poorly studied constructions.

**Probability and Statistics with Applications: A Problem Solving Text** Kogan Page Publishers

How to make the innovation process more stimulating and playful? How to represent your challenge in a tangible and manipulated form? How can you imagine new offers for your organisation or new trajectories for yourself? What if, instead of writing down your ideas, you put them into game? This book proposes an original and operational method to gamify the innovation process, to promote the teams' involvement and to bring out many feasible, original or even disruptive ideas. The method will allow you to generate ideas based on 6 dimensions -one dimension for each side of the cube- representing the essential components of your new product or service offer: • Users: For which types of customers (people or organisations) do you create the product or service? • Places: Where will you deliver your offer? What type of space is most suitable to use it? • Resources: What are your key resources to build your offer? • Game changers: What scenarios could change or differentiate your offer? • Advantages: What is the advantage that your product or service provides to the user? • Revenue stream: How will you make your business model sustainable? Bringing together gaming, creativity and storytelling, the Cubification Method has already been used by thousands of people: Engie, Suez, BnF, Maped, Caggemini, Somfy, etc. Used in personal development, entrepreneurship, business development or training, the method has been tested on extremely varied playgrounds: incubators, universities, small and major enterprises, as well as large international organisations and NGOs. Playful and richly illustrated, the book sets out the principles of the method and many tips to apply it. The real cases -The Playgrounds- proposed at the end of the book are a source of inspiration and make the best practices accessible to all. With this book, you will identify the mechanisms of the game that promote creativity and learn, step by step, to set up the Cubification Method in the context that interests you.

**Innovation is a game!** Scholastic Inc.

A la fois très pédagogique et actuel, cet ouvrage est une excellente introduction à la physique des semi-conducteurs. Il s'adresse à des étudiants a priori non physiciens, de l'étudiant à l'autodidacte. Une iconographie très soignée, un langage d'une grande clarté et un support mathématique réduit à l'essentiel rendent sa lecture agréable et témoignent d'un réel effort de vulgarisation, au sens le plus noble de ce terme. (La Recherche n° 193 novembre 1987 - 1364 volume 18)

**With examples in Node.js and Raspberry Pi** FrancoAngeli

Ambrose Bukowski is a twelve-year-old with a talent for mismatching his clothes, for saying the wrong thing at the worst possible time, and for words. In short, he's a self-described nerd. Making friends is especially hard because he and his overprotective mother, Irene, have had to move so often. And when bullies at his latest school almost kill him by deliberately slipping a peanut into his sandwich to set off his allergy, it's his mother who has the extreme reaction. From now on, Ambrose has to be home-schooled. Then Ambrose strikes up an unlikely friendship with the landlord's son, Cosmo, an ex-con who's been in prison. They have nothing in common except for Scrabble. But a small deception grows out of control when Ambrose convinces a reluctant Cosmo to take him to a Scrabble club. Could this spell disaster for Ambrose?

**Adapter les principes du lean à la 4e révolution industrielle** Abrams

"The art of building sales is, to a large extent, the art of building brands. After reading Kapferer's book, you'll never again think of a brand as just a name. Several exciting new ideas and perspectives on brand building are offered that have been absent from our literature".--Philip Kotler".An invaluable reference for designers, marketing managers and brand managers alike".-- Design magazine.
