(Astrophysically Speaking)
 Springer Science & Business Media

This updated and revised edition outlines strategies and models for how to use technology and knowledge to improve performance, create jobs and increase income. It shows what skills will be required to produce, sell and manage performance over time, and how manual jobs can contribute to reduce the consumption of non-renewable resources.

From Anxiety to Method in the Behavioral Sciences
 Hachette Books

Presents a brief overview of all elements of science, including physics, acoustics, chemistry, structural engineering, biology, ecology, astronomy, and space exploration.

Isaac Newton and His Falling Apple Infobase Publishing

The Edge calls Trigger Happy a "seminal piece of work." For the first time ever, an aficionado with a knowledge of art, culture, and a real love of gaming takes a critical look at the future of our videogames, and compares their

aesthetic and economic impact on society to that of film. Thirty years after the invention of the simplest of games, more videogames are played by adults than children. This revolutionary book is the first-ever academically worthy and deeply engaging critique of one of today's most popular forms of play: videogames are on track to supersede movies as the most innovative form of entertainment in the new century.

Trigger Happy

Macmillan

Imagine, if you can, the world of business - without corporate strategy. Remarkably, fifty years ago that's the way it was. Businesses made plans, certainly, but without understanding the underlying dynamics of competition, costs, and customers. It was like trying to design a large-scale engineering project without knowing the laws of physics. But in the 1960s, four mavericks and their poses instigated a profound shift in thinking that turbocharged business as never before, with implications far beyond what even they imagined. In *The Lords of Strategy*, renowned business journalist and editor Walter Kiechel tells,

for the first time, the story of the four men who invented corporate strategy as we know it and set in motion the modern, multibillion-dollar consulting industry: Bruce Henderson, founder of Boston Consulting Group Bill Bain, creator of Bain & Company Fred Gluck, longtime Managing Director of McKinsey & Company Michael Porter, Harvard Business School professor Providing a window into how to think about strategy today, Kiechel tells their story with novelistic flair. At times inspiring, at times nearly terrifying, this book is a revealing account of how these iconoclasts and the organizations they led revolutionized the way we think about business, changed the very soul of the corporation, and transformed the way we work.

Eureka! Penguin

A creative and fun approach to math (and problem solving) for children who love hands-on learning

This Book Thinks You're a Math Genius

Hippo

Describes how some of the most important scientific discoveries and theories came about and offers insights into the lives of the scientists who

made the contributions.
The Power of Now
 HarperCollins
 Everyone knows that William Shakespeare is famous for having a way with words and creating characters such as Romeo and murderous Macbeth. But in this Horribly Famous title, readers can find out everything they didn't know, including how he did a seven-year vanishing act and how he nearly had his head chopped off by Queen Elizabeth I!

A Guide to Spiritual Enlightenment Quercus
 A Publishers Weekly best book of 1995! Dr. Michael Guillen, known to millions as the science editor of ABC's Good Morning America, tells the fascinating stories behind five mathematical equations. As a regular contributor to daytime's most popular morning news show and an instructor at Harvard University, Dr. Michael Guillen has earned the respect of millions as a clear and entertaining guide to the exhilarating world of science and mathematics. Now Dr. Guillen unravels the equations that have led to the inventions and events that characterize the modern world, one of which -- Albert Einstein's

famous energy equation, $E=mc^2$ -- enabled the creation of the nuclear bomb. Also revealed are the mathematical foundations for the moon landing, airplane travel, the electric generator -- and even life itself. Praised by Publishers Weekly as "a wholly accessible, beautifully written exploration of the potent mathematical imagination," and named a Best Nonfiction Book of 1995, the stories behind *The Five Equations That Changed the World*, as told by Dr. Guillen, are not only chronicles of science, but also gripping dramas of jealousy, fame, war, and discovery.

Bewilderment: A Novel
 Scholastic
 Shortlisted for the 2021 Booker Prize Longlisted for the 2021 National Book Award for Fiction A heartrending new novel from the Pulitzer Prize-winning and #1 New York Times best-selling author of *The Overstory*. Named one of the Most Anticipated Books of 2021 by Newsweek, Los Angeles Times, New York Magazine, Chicago Tribune, BuzzFeed, BookPage, Goodreads, Literary Hub, The Millions, New Statesman, and Times of London The astrobiologist Theo Byrne

searches for life throughout the cosmos while single-handedly raising his unusual nine-year-old, Robin, following the death of his wife. Robin is a warm, kind boy who spends hours painting elaborate pictures of endangered animals. He's also about to be expelled from third grade for smashing his friend in the face. As his son grows more troubled, Theo hopes to keep him off psychoactive drugs. He learns of an experimental neurofeedback treatment to bolster Robin's emotional control, one that involves training the boy on the recorded patterns of his mother's brain... With its soaring descriptions of the natural world, its tantalizing vision of life beyond, and its account of a father and son's ferocious love, *Bewilderment* marks Richard Powers's most intimate and moving novel. At its heart lies the question: How can we tell our children the truth about this beautiful, imperiled planet?

Amazing Space Q&A explores the final frontier, from cosmic dust to supergiant stars. Bursting with eye-opening questions and revealing answers, the book tells you everything you ever wanted to know about the universe (but were afraid to ask!).

Amazing Space Q&A

Albert Einstein and His Inflatable Universe
Join award-winning science writer Seymour Simon in this completely updated edition of Our Solar System, as he takes young readers on a fascinating tour through space! With beautiful full-color photographs and spacecraft images, including many taken by the Mars rovers and Hubble Space Telescope, this nonfiction picture book teaches young readers all about the solar system, including the sun, the eight planets, and their moons. Covering all the latest discoveries in space, young astronomers will be over the moon about the fun facts, fascinating science, and incredible photographs. A must-have for every child interested in outer space! This book includes an author's note, a glossary, an index, and further reading suggestions. An excellent choice for

classrooms and homeschooling, Our Solar System supports the Common Core State Standards. Yes, even though he's dead, Al's still full of surprises. You can get the mind-blowing inside story with Albert's lost notebook, read the earth-shattering headlines in The News of the Universe, and find out about the theories that changed the entire cosmos - without making your brain hurt.

Encyclopedia of Space and Astronomy Walter de Gruyter GmbH & Co KG
Everybody knows that Roald Dahl wrote brilliant books for children and created a fantastic chocolate factory. But did you know that Roald was a fighter pilot, and a spy in the Second World War? Everything you ever wanted to know about the man with the chocolate Factory.

A Story of Jacques Cousteau Scholastic Limited

Laurel Daneau has moved on to a new life, in a new town, but inside she's still reeling from the loss of her beloved mother and grandmother after Hurricane Katrina washed away their home. Laurel's new life is going well, with a new best friend, a place on the cheerleading squad and T-Boom, co-captain of the basketball team, for a boyfriend. Yet Laurel is haunted by voices and memories from her past. When T-Boom introduces Laurel to meth, she immediately falls under its spell, loving the way it erases, even if only briefly, her past. But as she becomes alienated from her friends and family, she becomes a shell of her former self, and longs to be whole again. With help from an artist named Moses and her friend Kaylee, she's able to begin to rewrite her story and start to move on from her addiction. Incorporating Laurel's bittersweet memories of life before and during the hurricane, this is a stunning novel by one of our finest writers. Jacqueline Woodson's haunting - but ultimately hopeful - story is beautifully told and one readers will not want to miss.

The Ethan I Was Before

Penn State University Press

A colorfully illustrated biography of a little French boy who would become an internationally known oceanographer and champion of the seas. Once upon a time in France, a baby was born under the summer sun. His parents named him Jacques. As he grew, Jacques fell in love with the sea. He dreamed of breathing beneath the waves and swimming as gracefully as a fish. In fact, he longed to become a manfish. Jacques Cousteau grew up to become a champion of the seas and one of the best-known oceanographers in the world. In this lovely biography, poetic text and gorgeous paintings come together to create a portrait of Cousteau that is as magical as it is inspiring. Praise for *Manfish* "Berne offers a luminous picture-book biography about Jacques Cousteau . . . Puybaret's smooth-looking acrylic paintings extend the words' elegant simplicity and beautifully convey the sense of infinite, underwater space."

—Booklist (starred review)
"This moving tribute to the great nautical observer and filmmaker is

shot through with an authentically childlike sense of adventure and the thrill of discovery . . .

This poetic profile of a doer and a dreamer is certain to inspire fresh interest in discovering, and in caring for, our world's wonders."

—Kirkus Reviews (starred review) "A new generation of children is introduced to the pioneering oceanographer and filmmaker. Beginning with Cousteau's childhood in France where he marveled at the sea and dreamed of breathing underwater, Berne reveals the unique mix of curiosity, ingenuity, and passion that drove Cousteau to make underwater exploration possible." —School Library Journal

Writers and Their Tall

Tales Simon and Schuster Even though they're dead, the great inventors in this book are still full of surprises! Everybody thinks that Thomas Edison invented the light bulb and that John Logie Baird's TV took the world by storm. But in this *Horribly Famous* title, readers will discover that Edison didn't invent the first light bulb (although he invented a thousand other things) and that Baird's TV was useless.

Albert Einstein and His Inflatable Universe

W. Norton & Company

As of May 2013, 93

children previously diagnosed with regressive autism were able to shed their autism diagnosis, their symptoms, and return to an overall state of health and vitality using the protocols revealed in this book.

Kerri Rivera has outlined a very complete approach to autism recovery that includes an understanding of the importance of Biofilm theory and protocol. She recommends safe interventions that do no harm, and are helping to confront a growing epidemic. Kerri Rivera's approach includes common sense dietary recommendations, the use of supplements to restore balance to the body and immune system, as well as mild oxidative therapies to address chronic infection and inflammation. She has taken children who were in the throes of autism (meaning chronic illness) to healing. The symptoms being labeled as autism are fading away, the children are talking and socializing, and their ATEC scores prove beyond a shadow of a doubt what their parents are claiming:

their children no longer have autism. Kerri Rivera's grasp of a biomedical approach to Autism recovery, paired with her passion for service has allowed families of all socioeconomic backgrounds to have what they might never have otherwise found: a means by which to help their children. This book contains over 120 testimonials from parents (and some of the children themselves) describing their journey and resulting success.

Chronicle Books
Everybody knows that Albert Einstein was the smartest scientist in the universe and that he also had some very bad hair days. But in this Horribly Famous title readers can find out everything they didn't know, including how Albert was actually expelled from school, and how he was spied on by the Nazis and the FBI. With Albert's lost notebook readers can at last get inside his super-brain, and in 'The News of the Universe' they can get

to grips with all his amazing theories without making their brains hurt! *Fantastic Future* Springer
Everybody's heard of Isaac Newtown. He is horribly famous for discovering gravity, being clever and getting hit on the head with an apple. But not everyone knows that Isaac came from the bottom of the class at school, poked sticks in his eye and nearly blinded himself, and nearly got himself executed. Everything you ever wanted to know about the man with the apple.
