The Medical Missionary Springer Publishing Company Eastern Kentucky University (EKU) in Richmond, Kentucky, celebrated its centennial in 2006. EKU has had a colorful history, from the political quandaries surrounding the inception of its predecessor institutions to its financial difficulties during the Depression to its maturing as a leading regional university. Reflecting on the social, economic, and cultural changes in the region over the last century, William E. Ellis follows each university president's administration in the context of the times. Interviews of alumni, faculty, staff, and political figures add to

the story. A History of Eas.

### Encyclopedia of Medicinal Plants

Springer Science & Business Media  
 In anesthesiology, pain medicine, and critical care, practitioners at all levels need help to stay current with the continually evolving drug knowledge-base and trainees need tools to prepare for in-training and board exams that increasingly test their knowledge of pharmacology. This practical book is aimed at both readerships. It features a unique and practical chapter on the United States Food and Drug Administration (FDA) "black box" warnings that describe what safety precautions should be taken with commonly used drugs. The editors and contributors are pharmacology experts representing a cross-section of clinical specialties and institutions in the United States and include pharmacologists,

pharmacists, as well as physicians.

*Llewellyn's Book of Natural Remedies* New Age International

The beloved best-selling classic for the modern herbalist—a definitive guide to 250 safe and effective herbal medicines, preparations, and single-herb remedies to make at home. This comprehensive, full-color guide offers detailed and easy-to-follow instructions for making and using approximately 250 all-natural DIY herbal medicines. With practical tips, in-depth preparation techniques, and an inside look at some of the authors' own favorite formulas, *The Modern Herbal Dispensatory* walks beginners and advanced herbalists alike through:

- The 12 major categories of herbs, from aromatic to sweet
- Herbal preparations: the many ways to prepare and use herbs, from capsules and tinctures to standardized extracts and essential oils
- Choosing the best dosage form for each category of herb
- How to harvest, dry, and use fresh herbs
- Extractions: terms, equipment, solvents, and calculations, plus how to extract herbs in water, alcohol, glycerin, and vinegar
- Advanced techniques: like percolation extracts, fluid extracts, and soxhlet extracts
- Preparations like oil-based extractions, topical applications, concentrates, lozenges, traditional Chinese methods, and more
- Formulas and dosages: how to design herbal formulas and use herbs safely and effectively
- Herbal insights and need-to-know wisdom, like why different preparations of the same herb affect the body differently; which herbs are medicinal when dry, but could be toxic when fresh; and why beginners typically see more potent results with formulations versus single-herb preparations

The text includes multiple appendices, recommendations for further reading, in-depth full-color photo guides, and a helpful index. With advice on herbal preparations for 100+ illnesses and conditions and a comprehensive materia medica, *The Modern Herbal Dispensatory* is an enduring classic and beloved plant-medicine reference manual for herbalists, natural medicine practitioners, and anyone seeking safe, holistic, at-home care and inexpensive all-natural remedies.

An overview of emerging topics, theories, methods, and practices in sonic interactive design, with a focus on the multisensory aspects of sonic experience. Sound is an integral part of every user experience but a neglected medium in design disciplines. Design of an artifact's sonic qualities is often limited to the shaping of functional, representational, and signaling roles of sound. The interdisciplinary field of sonic interaction design (SID) challenges these prevalent approaches by considering sound as an active medium that can enable novel sensory and social experiences through interactive technologies. This book offers an overview of the emerging SID research, discussing theories, methods, and practices, with a focus on the multisensory aspects of sonic experience. Sonic Interaction Design gathers contributions from scholars, artists, and designers working at the intersections of fields ranging from electronic music to cognitive science. They offer both theoretical considerations of key themes and case studies of products and systems created for such contexts as mobile music, sensorimotor learning, rehabilitation, and gaming. The goal is not only to extend the existing research and pedagogical approaches to SID but also to foster domains of practice for sound designers, architects, interaction designers, media artists, product designers, and urban planners. Taken together, the chapters provide a foundation for a still-emerging field, affording a new generation of designers a fresh perspective on interactive sound as a situated and multisensory experience. Corruption and poor governance are acknowledged as major impediments to realizing the right to education and to reaching the Millennium Development Goal of universal primary education by 2015. Corruption not only distorts access to education, but affects the quality of education and the reliability of research findings. From corruption in the procurement of school resources and nepotism in the hiring of teachers, to the buying and selling of academic titles and the skewing of research results, major corruption risks can be identified at every level of the education and research systems. Conversely, education serves as a means to strengthen personal integrity and is a critical tool to address corruption effectively. The Global Corruption Report (GCR) is Transparency International's flagship publication, bringing the expertise of the anti-corruption movement to bear on a specific corruption issue or sector. The Global Corruption Report on education consists of more than 70 articles commissioned from experts in the fields of corruption and education, from universities, think-tanks, business, civil society and international organisations. The Global Corruption Report on education and academic research will provide essential analysis for understanding the corruption risks in the sector and highlight

the significant work that has already been done in the field to improve governance and educational outcomes. This will be an opportunity to pull together cutting edge knowledge on lessons learnt, innovative tools and solutions that exist in order to fight corruption in the education sector.

Dr. Agatha Thrash has spent her career helping people improve their wellbeing thanks to her practical and natural approach to health. A board specialist in pathology, Dr. Thrash has written numerous books about the benefits of charcoal, hydrotherapy, and other home remedies and natural therapies. "Nature's Healing Practices" is an extensive volume that contains a wealth of information drawn from Dr. Thrash's books and her and her associates' years of clinical experience. The book is divided into six sections: Conditions and Diseases, Home Emergencies, Natural Remedies, Herbal Remedies, Dietary Information, Supplemental Information. The first section-Conditions and Diseases-makes up the largest portion of the book and serves as a reference guide for a host of ailments from allergies, Alzheimer's diseases, cancer, and cataracts to headaches, skin diseases, thyroid issues, and women's conditions. Listed in alphabetical order, the various conditions feature case studies, background information, causes, and treatments, including herbal, hydrotherapy, exercise, and dietary suggestions. The rest of the sections provide valuable information how to treat bee stings and other minor home emergencies, how to administer

hydrotherapy treatments, what herbs treat what ailments, and what foods to avoid and what foods to eat based on the condition you are battling.
