This book offers a unique blend of reports on both theoretical models and their applications in the area of Intelligent Information and Database Systems. The reports cover a broad range of research topics, including advanced learning techniques, knowledge engineering, Natural Language Processing (NLP), decision support systems, Internet of things (IoT), computer vision, and tools and techniques for Intelligent Information Systems. They are extended versions of papers presented at the ACIIDS 2018 conference (10th Asian Conference on Intelligent Information and Database Systems), which was held in Dong Hoi City, Vietnam on 19–21 March 2018. What all researchers and students of computer science need is a state-of-the-art report on the latest trends in their respective areas of interest. Over the years, researchers have proposed increasingly complex theoretical models, which provide the theoretical basis for numerous applications. The applications, in turn, have a profound influence on virtually every aspect of human activities, while also allowing us to validate the underlying theoretical concepts.

The old saying goes, "To the man with a hammer, everything looks like a nail." But anyone who has done any kind of project knows a hammer often isn't enough. The more tools you have at your disposal, the more likely you'll use the right tool for the job - and get it done right. The same is true when it comes to your thinking. The quality of your outcomes depends on the mental models in your head. And most people are going through life with little more than a hammer. Until now. The Great Mental Models: General Thinking Concepts is the first book in The Great Mental Models series designed to upgrade your thinking with the best, most useful and powerful tools so you always have the right one on hand. This volume details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making, productivity, and how clearly you see the world. You will discover what forces govern the universe and how to focus your efforts so you can harness them to your advantage, rather than fight with them or worse yet- ignore them. Upgrade your

mental toolbox and get the first volume today. AUTHOR BIOGRAPHY Farnam Street (FS) is one of the world's fastest growing websites, dedicated to helping our readers master the best of what other people have already figured out. We curate, examine and explore the timeless ideas and mental models that history's brightest minds have used to live lives of purpose. Our readers include students, teachers, CEOs, coaches, athletes, artists, leaders, followers, politicians and more. They're not defined by gender, age, income, or politics but rather by a shared passion for avoiding problems, making better decisions, and lifelong learning. AUTHOR HOME Ottawa, Ontario, Canada

Vietnam is currently undergoing a metamorphosis from a relatively closed society with a centrally planned economy, to a rapidly urbanising one with a global outlook. These changes have been the

catalyst for an exciting ferment of activity in popular culture. This volume contains contributions from scholars engaged in the most up-to-date social research in Vietnam, as well as some of Vietnam's most popular cultural producers who are forging new ways of imagining the present whilst at the same time engaging actively in reinterpreting the past. The diverse ways that Vietnam is culturally and socially negotiating the future are examined as the book addresses issues of indigenisation of cultural influences, ambivalence surrounding change, and the consistent blurring of boundaries between informal, non-state cultural activities and formal institutional structures in the evolution of a civil society in Vietnam. The Alchemy of Sexual Energy Springer Nature

Shawn McHale explores why the communist-led resistance in Vietnam won the anticolonial war against France (1945–54), except in the south. He shows how broad swaths of Vietnamese people were uneasily united in 1945 under the Viet Minh Resistance banner, all opposing the French attempt to reclaim control of the country. By 1947, resistance unity had shattered and Khmer-Vietnamese ethnic violence had divided the Mekong delta. From this point on, the war in the south turned into an overt civil war wrapped up in a war against France. Based on extensive archival research in four countries and in three languages, this is the first substantive English-language book focused on southern Vietnam's transition from colonialism to independence.

Son objectif est de développer un support pour renforcer l'uniformité technique au niveau mondial et préserver ainsi l'authenticité et la qualité de l'enseignement. Près de 500 illustrations techniques : 21 positions, 21 coups de pieds, 14 coups de poings, 8 techniques du tranchants des mains, 8 techniques de parades, 8 coups de coudes, 8 coups de genoux... les techniques de roulades, de chutes, de sauts, d'échauffements, etc. Les connaissances essentielles : historique du maitre fondateur, la signification du Vovinam-Viet Vo Dao, du salut, de l'écusson, des couleurs des grades, du code d'honneur, etc. International : Rédigé sous un seul livre 8 langues, dont Français, Anglais, Allemand, Italien, Espagnol, Russe, Arabe et Vietnamien. "Introduction to Vovinam-Viet Vo Dao" is the 1st book in a series of Vovinam-Viet Vo Dao Technical Documentation, based on the international curriculum. Its objectives are to support and strengthen technical standardization across the global, and preserve the

authenticity and quality of the training program of Vovinam-Viet Vo Dao. Nearly 250 pages, 500 illustrations: 21 positions, 21 kicks, 14 punches, 8 Knife-Hand Strike (Chém), 8 Block techniques (Gạt), 8 elbows (Chỏ), 8 knees (Gổi)... rolling techniques, falling technique, jumping technique, Warm-up technique, etc. Essential knowledge: history of the master founder, the meaning of Vovinam-Viet Vo Dao, salute, crest, colors of ranks, codes of honor, etc International: Written under one book: 8 languages, including French, English, German, Italian, Spanish, Russian, Arabic and Vietnamese
Shaolin Long Fist Kung Fu TheBookEdition
Following the end of World War II, France attempted to reassert control over its colonies in Indochina. In Vietnam, this was resisted by the Viet Minh leading to the First Indochina War. By 1954, the French army was on the defensive and determined to force the Viet Minh into a decisive set-piece battle at Dien Bien Phu. Over the past five decades, Western authors have generally followed a standard narrative of the siege of Dien Bien Phu, depicting the Viet Minh besiegers as a faceless horde which

overwhelmed the intrepid garrison by sheer weight of numbers, superior firepower, and logistics. However, a wealth of new Vietnamese-language sources tell a very different story, revealing for the first time the true Viet Minh order of battle and the details of the severe logistical constraints within which the besiegers had to operate. Using these sources, complemented by interviews with French veterans and research in the French Army and French Foreign Legion archives, this book, now publishing in paperback, provides a new telling of the climactic battle in the Indochina War, the conflict that set the stage for the Vietnam War a decade later.

Taoist techniques for replenishing our internal energy with universal cosmic energy • Shows how to transform excess sexual energy (Ching Chi) into self-healing energy • Presents advanced Cosmic Healing Chi Kung practices, which gather the limitless resources of Cosmic Chi for healing • Explains how opening of the three tan tiens to the six directions allows personal consciousness to connect directly

to higher sources of energy Taoists consider our sexual energy to be the creative force that we can use to regenerate the body's internal energy, but we must learn how to harness excess sexual energy and transform it into chi, or life-force energy. When we circulate the sexual energy in the Microcosmic Orbit--a continuous energy loop that runs up the spine and down the front of the body--we transform it into self-healing energy that can be stored in the organs and the three tan tiens: energy centers in the brain, the heart center, and the lower abdomen. The *Alchemy of Sexual Energy* builds upon Microcosmic Orbit practices discussed in *Healing Light of the Tao*. The more we open the flow of our internal energy the more capable we are of connecting to the cosmic energy that exists outside ourselves in the universe. By learning to open the three tan tiens to the six directions, the Taoist practitioner combines mind power with extension of chi to draw cosmic energy into the body. This energy, too, can be stored in the three tan tiens and used as needed for healing. When we learn to flow in this way with the energy of the Tao, life ceases to

be a struggle.

The Report examines the education impact of migration and displacement across all population movements: within and across borders, voluntary and forced, for employment and education. It also reviews progress on education in the 2030 Agenda for Sustainable Development. In view of increasing diversity, the report analyses how education can build inclusive

societies and help people move beyond tolerance and learn to live together.

This book provides a comprehensive and self-contained introduction to federated learning, ranging from the basic knowledge and theories to various key applications. Privacy and incentive issues are the focus of this book. It is timely as federated learning is becoming popular after the release of the General Data Protection Regulation (GDPR). Since federated learning aims to enable a machine model to be collaboratively trained without each party exposing private data to others. This setting adheres to regulatory requirements of data privacy protection such as GDPR. This book contains three main parts. Firstly, it

introduces different privacy-preserving methods for protecting a federated learning model against different types of attacks such as data leakage and/or data poisoning. Secondly, the book presents incentive mechanisms which aim to encourage individuals to participate in the federated learning ecosystems. Last but not least, this book also describes how federated learning can be applied in industry and business to address data silo and privacy-preserving problems. The book is intended for readers from both the academia and the industry, who would like to learn about federated learning, practice its implementation, and apply it in their own business. Readers are expected to have some basic understanding of linear algebra, calculus, and neural network. Additionally, domain knowledge in FinTech and marketing would be helpful.”
