The Indian subcontinent, or, sometimes simply called the subcontinent, is a physiographical region in southern Asia, situated on the Indian Plate and projecting southwards into the Indian Ocean from the Himalayas. Geologically, the Indian subcontinent is related to the landmass that rifted from Gondwana and merged with the Eurasian landmass nearly 55 million years ago. Geographically, it is the peninsular region in south-central Asia, delineated by the Himalayas in the north, the Hindu Kush in t

**Asia - Wikipedia**

A continent is one of several very large landmasses.Generally identified by convention rather than any strict criteria, up to seven regions are commonly regarded as continents. Ordered from largest in area to smallest, these seven regions are: Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Variations with fewer continents may merge some of these, for example ...

Kumari Kandam is a mythical continent, and therefore, the attempts to mix this myth with Tamil history have attracted criticism since the late 19th century. One of the earliest criticisms came from M Seshagiri Sastri (1897), who described the claims of ante-diluvial sangams as "a mere fiction originated by the prolific imagination of Tamil poets."
