When faced with 'new' and 'different', are we really open-minded - or wary and suspicious? In a world obsessed with the latest tech or trend, where groupthink dominates, it's easy to close down our thinking; to mentally inhabit a space that is both comfortable and familiar. Yet what if we've become stuck in our ways? Or stopped having an opinion that was truly our own? Do Agile is about resetting our minds and moving forward. Tim Drake shows us that to work effectively in any organisation - and in life in general, we require a mindset that is open, alert, engaged and positive. And importantly, aligned with our core principles. You will: Define your values, as they change over time Find out how 'giving back' leads to a positive mindset Reignite a desire to learn Retrain your mind to think more autonomously Today's world requires a new type of toolkit. One that helps build mental resilience, a growth mindset, and a positive outlook. Once that's in place, you can do practically anything.

This book is an open access. Media forensics has never been more relevant to societal life. Not only media content represents an ever-increasing share of the data traveling on the net and the preferred communications means for most users, it has also become integral part of most innovative applications in the digital information ecosystem that serves various sectors of society, from the entertainment, to journalism, to politics. Undoubtedly, the advances in deep learning and computational imaging contributed significantly to this outcome. The underlying technologies that drive this trend, however, also pose a profound challenge in establishing trust in what we see, hear, and read, and make media content the preferred target of malicious attacks. In this new threat landscape powered by innovative imaging technologies and sophisticated tools, based on autoencoders and generative adversarial networks, this book fills an important gap. It presents a comprehensive review of state-of-the-art forensics capabilities that relate to media attribution, integrity and authenticity verification, and counter forensics. Its content is developed to provide practitioners, researchers, photo and video enthusiasts, and students a holistic view of the field.

Wanted: Dating coach to help hot nerd win back the woman of his dreams...

Picture this - I'm ready to win back the love of my life, and I'm going big this time. We're talking boom box, sing her name in the rain, let the whole damn neighborhood know I'm good and ready this time around. After all, if you're going

to grand gesture the ever-loving hell out of a second chance, you need to pull out all the stops. There's only one little problem. My college girlfriend isn't the one who shows up when I play my "I'll do anything to win you back" tune. The woman who flings open the second-floor window tells me my ex doesn't live here anymore. But she'll help me win her back. Anything for romance, anything for a guy so willing to go big for love. And that's what I want at first. Until I get to know my new "romance coach" and discover she's funny, clever, and keeps me on my toes. And boy, do I ever need that. Now I don't want to win anyone else's heart. I want the woman who's been helping me all along. Trouble is - she thinks I'm in love with someone else, and when we take off on a road trip, everything I think I know about women is about to be unzipped and turned inside out. \*Unzipped is a standalone spinoff in the Lucky in Love series of standalones\* Austin MacAuley
