A Hollywood screenwriting and movie-making icon, Ernest Lehman penned some of the most memorable scenes to ever grace the silver screen. Hailed by *Vanity Fair* as "perhaps the greatest screenwriter in history," Lehman's work on films such as

North by Northwest, *The King and I*, *Sabrina*, *West Side Story*, and *The Sound of Music* helped define a generation of movie making. But while his talent took center stage, the public knew little of Lehman himself, a native of Manhattan's Upper West Side and the Five Towns of Long Island devoted to his wife of 50 years. His relentless perfectionism, hypochondria and all-night writing sessions fueled by tequila and grilled cheese sandwiches were some of the quirks that made Lehman a legend in the Hollywood community. In *Ernest Lehman: The Sweet Smell of Success*, author Jon Krampner lays bare the life of this lauded yet elusive character. Moving seamlessly from post-production meetings to sound stages and onto the locations of Lehman's greatest films, Krampner's extensive biography brings to life the genius and singularity of the revered screenwriter's personality and the

contributions he made to the world of cinema. Find out more at ernestlehmanbio.com

The emergence of "male-centered serials" such as *The Shield*, *Rescue Me*, and *Sons Of Anarchy* and the challenges these characters face in negotiating modern masculinities. From the meth-dealing but devoted family man Walter White of AMC's *Breaking Bad*, to the part-time basketball coach, part-time gigolo Ray Drecker of HBO's *Hung*, depictions of male characters perplexed by societal expectations of men and anxious about changing American masculinity have become standard across the television landscape. Engaging with a wide variety of shows, including *The League*, *Dexter*, and *Nip/Tuck*, among many others, Amanda D. Lotz identifies the gradual incorporation of second-wave feminism into prevailing gender norms as the catalyst for the contested masculinities on display in contemporary cable dramas. Examining the emergence of "male-centered serials" such as *The Shield*, *Rescue Me*, and *Sons of Anarchy* and the challenges these characters face in negotiating modern

masculinities, Lotz analyzes how these shows combine feminist approaches to fatherhood and marriage with more traditional constructions of masculine identity that emphasize men's role as providers. She explores the dynamics of close male friendships both in groups, as in *Entourage* and *Men of a Certain Age*, wherein characters test the boundaries between the homosocial and homosexual in their relationships with each other, and in the dyadic intimacy depicted in *Boston Legal* and *Scrubs*. *Cable Guys* provides a much needed look into the under-considered subject of how constructions of masculinity continue to evolve on television.

Extensive account of the cameo's production history and how audiences affirm their mastery of celebrity culture. *Stars and Silhouettes: The History of the Cameo Role in Hollywood* traces the history of the cameo as it emerged in twentieth-century cinema. Although the cameo has existed in film culture for over a century, Joceline Andersen explains that this role cannot be strictly defined because it exists as a constellation of interactions between duration and recognition, dependent on who is watching and when. Even audiences of the twenty-first century who are

inundated by the lives of movie stars and habituated to images of their personal friends on screens continue to find cameos surprising and engaging. Cameos reveal the links between our obsession with celebrity and our desire to participate in the powerful cultural industries within contemporary society. Chapter 1 begins with the cameo's precedents in visual culture and the portrait in particular—from the Vitagraph executives in the 1910s to the emergence of actors as movie stars shortly after. Chapter 2 explores the fan-centric desire for behind-the-scenes visions of Hollywood that accounted for the success of cameo-laden, Hollywood-set films that autocratic studios used to make their glamorous line-up of stars as visible as possible. Chapter 3 traces the development of the cameo in comedy, where cameos began to show not only glimpses of celebrities at their best but also of celebrities at their worst. Chapter 4 examines how the television guest spot became an important way for stars and studios to market both their films and stars from other media in trades that reflected an increasingly integrated mediascape. In Chapter 5, Andersen examines auteur cameos and the cameo as a sign of authorship. Director cameos reaffirm the fan's interest in the film not just as a stage for actors but as a forum for the visibility of the director. Cameos create a participatory space for viewers, where recognizing those singled out among extras and small roles allows fans to demonstrate their knowledge. *Stars and Silhouettes* belongs on the shelf of every scholar, student, and reader interested in film history and star studies.

The United States Military Academy at West Point is one of America's oldest and most revered institutions. Founded in 1802,

its first and only mission is to prepare young men—and, since 1976, young women—to be leaders of character for service as commissioned officers in the United States Army. West Point's success in accomplishing that mission has secured its reputation as the foremost leadership-development institution in the world. An Academy promotional poster says it this way: "At West Point, much of the history we teach was made by people we taught." Carved from Granite is the story of how West Point goes about producing military leaders of character. An opening chapter on the Academy's nineteenth-century history provides context for the topic of each subsequent chapter. As scholar and Academy graduate Lance Betros shows, West Point's early history is interesting and colorful, but its history since then is far more relevant to the issues—and problems—that face the Academy today. Drawing from oral histories, archival sources, and his own experiences as a cadet and, later, a faculty member, Betros describes and assesses how well West Point has accomplished its mission. And, while West Point is an impressive institution in many ways, Betros does not hesitate to expose problems and challenge long-held assumptions. In a concluding chapter that is both subjective and interpretive, the author offers his prescriptions for improving the institution, focusing particularly on the areas of governance, admissions, and intercollegiate athletics. Photographs, tables, charts, and other graphics aid the clarity of the discussion and lend visual and historical interest. *Carved from Granite: West Point since 1902* is the most authoritative history of the modern United States Military Academy written to date. There will be lively debate over some of the observations made in this book, but if they are followed, the

author asserts that the Academy will emerge stronger and better able to accomplish its vital mission in the new century and beyond.

New York Supreme Court

New York Times and *Wall Street Journal* bestseller A step-by-step plan clinically proven to break the cycle of worry and fear that drives anxiety and addictive habits We are living through one of the most anxious periods any of us can remember. Whether facing issues as public as a pandemic or as personal as having kids at home and fighting the urge to reach for the wine bottle every night, we are feeling overwhelmed and out of control. But in this timely book, Judson Brewer explains how to uproot anxiety at its source using brain-based techniques and small hacks accessible to anyone. We think of anxiety as everything from mild unease to full-blown panic. But it's also what drives the addictive behaviors and bad habits we use to cope (e.g. stress eating, procrastination, doom scrolling and social media). Plus, anxiety lives in a part of the brain that resists rational thought. So we get stuck in anxiety habit loops that we can't think our way out of or use willpower to overcome. Dr. Brewer teaches us to map our brains to discover our triggers, defuse them with the simple but powerful practice of curiosity, and to train our brains using mindfulness and other practices that his lab has proven can work. Distilling more than 20 years of research and hands-on work with thousands of patients, including Olympic athletes and coaches, and leaders in government and business, Dr. Brewer has created

a clear, solution-oriented program that anyone can use to feel better - no matter how anxious they feel.
