Support Maintenance Manual (including  
Repair Parts and Special Tools List)

Elsevier Health Sciences  
One of the hallmarks of a master

surgeon is the ability to navigate a wide variety of inevitable difficult situations in surgery, whether errors in judgment, technical mistakes, or unavoidable outcomes. Complications in Orthopaedic Surgery is a new series designed to provide real-world guidance on recognizing and avoiding errors, as well as how to “course-correct during surgery. In this inaugural volume dedicated to sports medicine surgery, series editor Dr. Stephen R. Thompson and Dr. Matthew Schmitz describe and demonstrate practical solutions that are integral to improving patient outcomes. Covers a wide variety of procedures, including meniscus repair and transplantation, revision ACL reconstruction, pediatric ACL surgery, cartilage surgery in adults and children,

knee osteotomies, acromioclavicular surgery, hip arthroscopy, and much more. Describes and offers solutions to the most common or most devastating errors and complications in the practice of sports medicine surgery, combining the breadth of knowledge of academic surgeons with the in-the-trenches skills of community surgeons. Uses an easy-to-follow, standardized chapter format that covers preoperative errors, intraoperative issues, and postoperative complications. Includes procedural video clips to reinforce discussions in the text. Features a full-color design with numerous photographs, radiographs, and illustrations.

Ideal for hand surgeons, residents in a hand surgery rotation, and therapists interested in a review of surgical principles, Principles of Hand Surgery and Therapy, 3rd Edition, by Drs. Thomas E. Trumble, Ghazi M. Rayan, Mark E. Baratz, Jeffrey E. Budoff, and David J. Slutsky, is a practical source of essential, up-to-date information in this specialized area. This single-volume, highly illustrated manual covers all areas

of adult and pediatric hand surgery and therapy, including the elbow. You'll find state-of-the-art basic science combined with step-by-step techniques and therapeutic protocols, helping you hone your skills and prescribe effective long-term care for every patient. An expanded therapy section with more than 50 diagnosis-specific rehabilitation protocols and more than 100 full-color photographs. New chapters on pediatric fractures; expanded coverage of carpal injuries, including fractures and ligament injuries and perilunate instability; a new chapter on diagnostic and therapeutic arthroscopy for wrist injuries; and expanded treatment of arthritis. New information on pediatric surgery with detailed surgical images. The latest information on pain management, as

well as nerve physiology and nerve transfers. Core knowledge needed for the boards—including tumors, free tissue transfer, and thumb reconstruction. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability.

This report provides interim guidelines for the layaway and periodic inspection, maintenance, and repair of historic buildings on U.S. Army installations. It builds on previous facility layaway research by the U.S. Army Construction Engineering Research Laboratory (CERL)

documented in CERL Technical Report M-91/23 (July 1991). This report describes the specific requirements for laying away historic buildings, providing guidelines for inspection and periodic maintenance and repair (M&R) for key building systems, components, and subcomponents. Topics discussed include definitions of historic buildings, Federal guidelines for laying away historic buildings, inspection purposes and guidelines, and categories of required M&R for laid away historic facilities. Appendixes to this report include eight extensive checklists to help guide the inspection and M&R of major building systems and components.
