All Roads Lead to Blood Simon and Schuster
 NEW YORK TIMES BESTSELLER • Once in a great while, a book comes along that changes our view of the world. This magnificent novel from the Nobel laureate and author of *Never Let Me Go* is “an intriguing take on how artificial intelligence might play a role in our futures ... a poignant meditation on love and loneliness” (The Associated Press). • A GOOD MORNING AMERICA Book Club Pick! Here is the story of Klara, an Artificial Friend with outstanding observational

qualities, who, from her place in the store, watches carefully the behavior of those who come in to browse, and of those who pass on the street outside. She remains hopeful that a customer will soon choose her. *Klara and the Sun* is a thrilling book that offers a look at our changing world through the eyes of an unforgettable narrator, and one that explores the fundamental question: what does it mean to love?

Mark C. Taylor explores the many variations of silence by considering the work of leading visual artists, philosophers, theologians, writers, and composers. “To hear silence is to find stillness in the midst of the restlessness

that makes creative life possible and the inescapability of death acceptable.” So writes Mark C. Taylor in his latest book, a philosophy of silence for our nervous, chattering age. How do we find silence—and more importantly, how do we understand it—amid the incessant buzz of the networks that enmesh us? Have we forgotten how to listen to each other, to recognize the virtues of modesty and reticence, and to appreciate the resonance of silence? Are we less prepared than ever for the ultimate silence that awaits us all? Taylor wants us to pause long enough to hear what is not said and to attend to what remains unsayable. In his account, our way to hearing silence is, paradoxically, to see it. He explores the

many variations of silence by considering the work of leading modern and postmodern visual artists, including Barnett Newman, Ad Reinhardt, James Turrell, and Anish Kapoor. Developing the insights of philosophers, theologians, writers, and composers, Taylor weaves a rich narrative modeled on the Stations of the Cross. His chapter titles suggest our positions toward silence: Without. Before. From. Beyond. Against. Within. Between. Toward. Around. With. In. Recasting Hegel's phenomenology of spirit and Kierkegaard's stages on life's way, Taylor translates the traditional Via Dolorosa into a Nietzschean Via Jubilosa that affirms light in the midst of darkness. *Seeing Silence* is a thoughtful meditation that invites readers to linger long enough to see silence, and, in this way, perhaps to hear once again the wordless Word that once was named "God."

The queer recluse, the shambling farmer, the clannish hill folk—white rural populations have long disturbed the American imagination, alternately revered as moral, healthy, and hardworking, and feared as antisocial or socially uncouth. In *Peculiar Places*, Ryan Lee Cartwright examines the deep archive of these contrary formations, mapping racialized queer and disability histories of white social nonconformity across the rural twentieth-century United States. Sensationalized accounts of white rural communities' aberrant sexualities, racial intermingling, gender transgressions, and anomalous bodies and minds, which proliferated from the turn of the century, created a national view of the perversity of white rural poverty for the American public. Cartwright contends that these accounts, extracted and estranged from their own ambivalent forum of community gossip, must be read in kind: through a racialized, materialist queercrip optic of the deeply familiar and mundane. Taking in popular science, documentary photography, news media, documentaries, and horror films, *Peculiar Places* orients itself at the intersections of disability studies, queer studies, and gender studies to illuminate a racialized landscape both profoundly ordinary and familiar.

In today's fast-food world, Christianity can seem outdated or archaic. The temptation

becomes to pick up the pace and play the game. But Chris Smith and John Pattison invites us to leave franchise faith behind and enter the kingdom of God, where people know each other well and love one another as Christ loves the church.

A questioning of the belief in the power of LGBTQ visibility through the lives of queer women in the rural Midwest Today most LGBTQ rights supporters take for granted the virtue of being "out, loud, and proud." Most also assume that it would be terrible to be LGBTQ in a rural place. By considering moments in which queerness and rurality come into contact, *Visibility Interrupted* argues that both positions are wrong. In the first monograph on LGBTQ women in the rural Midwest, Carly Thomsen deconstructs the image of the rural as a flat, homogenous, and anachronistic place where LGBTQ people necessarily suffer. And she suggests that visibility is not liberation and will not lead to liberation. Far from being an unambiguous good, argues Thomsen, visibility politics can, in fact, preclude collective action. They also advance metronormativity, postraciality, and capitalism. To make these interventions, Thomsen develops the theory of unbecoming: interrogating the relationship between that which we celebrate and that which we find disdainful—the past, the rural, politics—is crucial for developing alternative subjectivities and politics. Unbecoming precedes becoming. Drawing from critical race studies, disability studies, and queer Marxism, in addition to feminist and queer studies, the insights of this book will be useful to scholars theorizing issues far beyond sexuality and place and to social justice activists who want to move beyond visibility.

Things I'm Seeing Without You Running Press Kids

In the twenty-first century we are confronted with a rapidly changing world full of social, economic and environmental uncertainties. We are all inherently connected to this changing world and in order to create the best possible conditions for life to thrive, we must each develop an inner capacity to respond and adapt to life in new, creative and innovative ways. The author of this visionary book argues that the path to a happy, healthy and peaceful world begins with the individual. By learning to recognize our cognitive habits of interrupting and defining life through our fixed ideas, labels and judgements, we can begin to develop a dynamic way of seeing that enables us to perceive and respond to

life with greater attentiveness. *First Steps* in *Seeing* reveals a practical set of stepping stones that guide the reader into this dynamic way of seeing and relating. Using personal stories, practical exercises and real-world case studies in development, education and business, the author takes the reader on a journey to explore how to give our full attention to life, and how to enliven the world that we each co-create. An inspiring guide for all those working for social change in youth work, business, education or research, or simply seeking fresh paths in life.

"Chau's voice is strong, the stories tense. Readers should snatch this collection up."

— Mat Johnson, author of *Loving Day*

Unflinching portrayals of desire and alienation fill Bonnie Chau's award-winning story collection. Chau's short fiction explores the lives of young women navigating love, failure, heritage, and memory, and presents a fresh perspective of second-generation Chinese-Americans. Moving back and forth between California and New York, and ranging as far away as Paris, Chau's exquisitely written stories are bold, highly imaginative, and haunting, featuring characters who defiantly exert their individuality.

The beloved New York Times bestselling author tells the poignant love story of caring for her parents in their final years in this beautifully written memoir. "I'll Be Seeing You moved me and broadened my understanding of the human condition."—Wally Lamb, author of *I Know This Much Is True* Elizabeth Berg's father was an Army veteran who was a tough man in every way but one: He showed a great deal of love and tenderness to his wife. Berg describes her parents' marriage as a romance that lasted for nearly seventy years; she grew up watching her father kiss her mother upon leaving home, and kiss her again the instant he came back. His idea of when he should spend time away from her was never. But then Berg's father developed Alzheimer's disease, and her parents were forced to leave the home they loved and move into a facility that could offer them help. It was time for the couple's children to offer, to the best of their abilities, practical advice, emotional support, and direction—to, in effect, parent the people who had for so long parented them. It was a hard transition, mitigated at least by flashes of humor and joy. The mix of emotions on everyone's part could make every day feel like walking through a minefield. Then came redemption. *I'll Be Seeing You* charts the passage from the anguish of loss to

the understanding that even in the most fractious times, love can heal, transform, and lead to graceful—and grateful—acceptance.

Images have always stirred ambivalent reactions. Yet whether eliciting fascinated gazes or iconoclastic repulsion from their beholders, they have hardly ever been seen as true sources of knowledge. They were long viewed as mere appearances, placeholders for the things themselves or deceptive illusions. Today, the traditional critique of the spectacle has given way to an unconditional embrace of the visual. However, we still lack a persuasive theoretical account of how images work. Emmanuel Alloa retraces the history of Western attitudes toward the visual to propose a major rethinking of images as irreplaceable agents of our everyday engagement with the world. He examines how ideas of images and their powers have been constructed in Western humanities, art theory, and philosophy, developing a novel genealogy of both visual studies and the concept of the medium. Alloa reconstructs the earliest Western media theory—Aristotle's concept of the diaphanous milieu of vision—and the significance of its subsequent erasure in the history of science. Ultimately, he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions, windows onto the world. Instead, images constantly reactivate the power of appearing. As media of visualization, they allow things to appear that could not be visible except in and through these very material devices.

Seeing Like a State Penguin Books

This engagingly written, jargon-free challenge to the misguided and dangerous global obsession with cultural difference critiques the popular notion that world affairs are determined by civilizations with immutable and conflicting cultures. Culture is too often understood as a straightjacket of values that make people act in a certain way. A more accurate and constructive approach is to see culture as a changing system of meaning, which individuals deploy selectively to make sense of the world.

"In her raw, unflinching memoir . . . she tells the impassioned, wrenching story of the mental health crisis within her own family and community . . . A searing cry." —New York Times Book Review

The Mohawk phrase for depression can be roughly translated to "a mind spread out on the ground." In this urgent and visceral work, Alicia Elliott explores how apt a description that is for the ongoing effects of personal, intergenerational, and colonial traumas she and so many Native people have experienced. Elliott's deeply personal writing details a life spent between Indigenous and white communities, a divide reflected in her own family, and engages with such wide-ranging topics as race, parenthood, love, art, mental illness, poverty, sexual assault, gentrification, and representation. Throughout, she makes thrilling connections both large and small between the past and present, the personal and political. A national bestseller in Canada, this updated and expanded American edition helps us better understand legacy, oppression, and racism throughout North America, and offers us a profound new way to decolonize our minds.

In her debut collection of short stories, *Islands of Decolonial Love*, renowned writer and activist Leanne Simpson vividly explores the lives of contemporary Indigenous Peoples and communities, especially those of her own Nishnaabeg nation. Found on reserves, in cities and small towns, in bars and curling rinks, canoes and community centres, doctors offices and pickup trucks, Simpson's characters confront the often heartbreaking challenge of pairing the desire to live loving and observant lives with a constant struggle to simply survive the historical and ongoing injustices of racism and colonialism. Told with voices that are rarely recorded but need to be heard, and incorporating the language and history of her people, Leanne Simpson's *Islands of Decolonial Love* is a profound, important, and beautiful book of fiction.

Like *The Man Who Mistook His Wife for a Hat*, this is a fascinating voyage into a strange and wonderful land, a provocative meditation on communication, biology, adaptation, and culture. In *Seeing Voices*,

Oliver Sacks turns his attention to the subject of deafness, and the result is a deeply felt portrait of a minority struggling for recognition and respect — a minority with its own rich, sometimes astonishing, culture and unique visual language, an extraordinary mode of communication that tells us much about the basis of language in hearing people as well. *Seeing Voices* is, as Studs Terkel has written, "an exquisite, as well as revelatory, work."

Insights -- like Darwin's understanding of the way evolution actually works, and Watson and Crick's breakthrough discoveries about the structure of DNA -- can change the world. We also need insights into the everyday things that frustrate and confuse us so that we can more effectively solve problems and get things done. Yet we know very little about when, why, or how insights are formed -- or what blocks them. In *Seeing What Others Don't*, renowned cognitive psychologist Gary Klein unravels the mystery. Klein is a keen observer of people in their natural settings -- scientists, businesspeople, firefighters, police officers, soldiers, family members, friends, himself -- and uses a marvelous variety of stories to illuminate his research into what insights are and how they happen. What, for example, enabled Harry Markopolos to put the finger on Bernie Madoff? How did Dr. Michael Gottlieb make the connections between different patients that allowed him to publish the first announcement of the AIDS epidemic? What did Admiral Yamamoto see (and what did the Americans miss) in a 1940 British attack on the Italian fleet that enabled him to develop the strategy of attack at Pearl Harbor? How did a "smokejumper" see that setting another fire would save his life, while those who ignored his insight perished? How did Martin Chalfie come up with a million-dollar idea (and a Nobel Prize) for a natural flashlight that enabled researchers to look inside living organisms to watch biological processes in action? Klein also dissects impediments to insight, such as when organizations claim to value employee creativity and to encourage breakthroughs but in reality block disruptive ideas and prioritize avoidance of mistakes. Or when information technology systems are

"dumb by design" and block potential discoveries. Both scientifically sophisticated and fun to read, *Seeing What Others Don't* shows that insight is not just a "eureka!" moment but a whole new way of understanding.

Seeing and Savoring Jesus Christ (Revised Edition) Melville House

Who is Jesus Christ? You've never met him in person, and you don't know anyone who

has. But there is a way to know who he is. How? Jesus Christ-the divine Person revealed in the Bible-has a unique excellence and a spiritual beauty that speaks directly to our souls and says, "Yes, this is truth." It's like seeing the sun and knowing that it is light, or tasting honey and knowing that it is sweet. The depth and complexity of Jesus shatter our simple mental frameworks. He baffled proud scribes with his wisdom but was understood and loved by children. He calmed a raging storm with a word but would not get himself down from the cross. Look at the Jesus of the Bible. Keep

your eyes open, and fill them with the portrait of Jesus in God's Word. Jesus said, "If anyone's will is to do God's will, he will know whether the teaching is from God or whether I am speaking on my own authority." Ask God for the grace to do his will, and you will see the truth of his Son. John Piper has written this book in the hope that all will see Jesus for who he really is and will come to enjoy him above all else.

The Many Ways of Seeing Random House Contains seven essays. Three of them use only pictures. Examines the relationship between what we see and what we know.
