Join Larry, Bob, and all the other VeggieTales® characters as they learn how to help others in these four exciting adventures Each story in this collection uses humor and heart to convey important lessons about having good manners,

helping others, listening, and sharing. This handy case with a sturdy handle includes the 4 books shown here.

Reconceptualizing STEM Education University of Oklahoma Press

The contribution of this book is to synthesize important common themes and highlight the unique features, findings, and lessons learned from three systematic, ongoing research and professional learning projects for

supporting English learners in science. Each project, based in a different region of the U.S. and focused on different age ranges and target populations, actively grapples with the linguistic implications of the three-dimensional learning required by the Framework for K-12 Science Education and the Next Generation Science Standards. Each chapter provides research-based recommendations for

improving the teaching of science to English learners. Offering insights into teacher professional learning as well as strategies for measuring and monitoring how well English learners are learning science and language, this book tells a compelling and inclusive story of the challenges and the opportunities of teaching science to English learners.

Veggie Values Michael O'Mara Books
Sheds new light on Native Life appearing at a critical historical juncture, and

reflects on how to read it in South Africa's heightened challenges today. First published in 1916, Sol Plaatje's *Native Life in South Africa* was written by one of the South Africa's most talented early twentieth-century black leaders and journalists. Plaatje's pioneering book arose out of an early African National Congress campaign to protest against the discriminatory 1913 Natives Land Act. *Native Life* vividly narrates Plaatje's investigative journeying

into South Africa's rural heartlands to report on the effects of the Act and his involvement in the deputation to the British imperial government. At the same time it tells the bigger story of the assault on black rights and opportunities in the newly consolidated Union of South Africa - and the resistance to it. Originally published in war-time London, but about South Africa and its place in the world, *Native Life* travelled far and wide, being distributed in the United States under the

auspices of prominent African-American W E B Du Bois. South African editions were to follow only in the late apartheid period and beyond. The aim of this multi-authored volume is to shed new light on how and why Native Life came into being at a critical historical juncture, and to reflect on how it can be read in relation to South Africa's heightened challenges today. Crucial areas that come under the spotlight in this collection include land, race, history, mobility,

belonging, war, the press, law, literature, language, gender, politics, and the state.

Confidential Informants and Police Investigations

Little, Brown

' These] vignettes of Brownsville people, part real and part fiction, capture the character of our border community. The reader becomes involved with the characters and the stories. It's as though the essence of our society and culture had been opened to view through a historical prism. And the

stories are just plain pleasurable to read.' -Dr. Anthony Knopp, Ph.D, Professor of History at the University of Texas at Brownsville, Texas

Speaking Truth to Power NYU Press

The X-Men are back in the cinema. Wolverine, Professor X, Cyclops, Jean Grey and the rest of the team return in X2, facing a new threat so dangerous that former enemy Magneto must join their ranks to defeat it. *Policing Black Bodies* CRC Press

In the past fifty years, the

study of indigenous and pre-Columbian art has evolved from a groundbreaking area of inquiry in the mid-1960s to an established field of research. This period also spans the career of art historian Esther Pasztory. Few scholars have made such a broad and lasting impact as Pasztory, both in terms of our understanding of specific facets of ancient American art as well as in our appreciation of the evolving analytical tendencies related to the broader field of study as it

developed and matured. The essays collected in this volume reflect scholarly rigor and new perspectives on ancient American art and are contributed by many of Pasztory's former students and colleagues. A testament to the sheer breadth of Pasztory's accomplishments, *Visual Culture of the Ancient Americas* covers a wide range of topics, from Aztec picture-writing to nineteenth-century European scientific illustration of Andean sites in Peru. The essays,

written by both established and rising scholars from across the field, focus on three areas: the ancient Andes, including its representation by European explorers and scholars of the nineteenth century; Classic period Mesoamerica and its uses within the cultural heritage debate of the twentieth and twenty-first centuries; and Postclassic Mesoamerica, particularly the deeper and heretofore often hidden meanings of its cultural production. Figures, maps, and color

plates demonstrate the vibrancy and continued allure of indigenous artworks from the ancient Americas. "Pre-Columbian art can give more," Pasztory declares, and the scholars featured here make a compelling case for its incorporation into art theory as a whole. The result is a collection of essays that celebrates Pasztory's central role in the development of the field of Ancient American visual studies, even as it looks toward the future of the discipline.

August Vollmer Texas

A&M University Press
Long known as a place of cross-border intrigue, the Rio Grande's unique role in the history of the American Civil War has been largely forgotten or overlooked. Few know of the dramatic events that took place here or the complex history of ethnic tensions and international intrigue and the clash of colorful characters that marked the unfolding and aftermath of the Civil War in the Lone Star State. To understand the American Civil War in Texas also requires an understanding

of the history of Mexico. The Civil War on the Rio Grande focuses on the region's forced annexation from Mexico in 1848 through the Civil War and Reconstruction. In a very real sense, the Lower Rio Grande Valley was a microcosm not only of the United States but also of increasing globalization as revealed by the intersections of races, cultures, economic forces, historical dynamics, and individual destinies. As a companion to *Blue and Gray on the Border: The Rio Grande*

Valley Civil War Trail, this volume provides the scholarly backbone to a larger public history project exploring three decades of ethnic conflict, shifting international alliances, and competing economic proxies at the border. The Civil War on the Rio Grande, 1846–1876 makes a groundbreaking contribution not only to the history of a Texas region in transition but also to the larger history of a nation at war with itself.

Publishing
 Issues in Criminal Justice: A Reader for Critical Thought provides students with scholarly articles that address a variety of challenges within the criminal justice system. The anthology exposes readers to a spectrum of diverse perspectives and is intended to inspire thoughtful consideration and lively debate regarding aspects, concepts, and viewpoints related to criminal justice. The text is organized into six units that address

topics often discussed in introductory criminal justice courses. Each unit addresses a major element associated with the criminal justice system and features an introduction, readings, and discussion questions. The units explore the structure and management of the criminal justice system, policing and law enforcement, the judicial system, punishment and corrections, juvenile justice, and victimology. Specific issues include the prison industrial complex,

the use of police body cameras, mental health courts, reform and retrenchment in juvenile justice, elder abuse, and more. Designed to foster critical thinking skills, Issues in Criminal Justice is ideal for senior-level capstones or seminars and upper-division or graduate-level courses with focus on contemporary issues in the discipline. M.L. Dantzker holds doctoral degrees in urban studies/administration/criminal justice and clinical psychology from the

University of Texas-Arlington and Walden University, respectively. He is a professor of criminal justice at The University of Texas Rio Grande Valley. Dr. Dantzker is a licensed professional counselor and has over 30 years of experience within the criminal justice system. Rosalva Resendiz holds a Ph.D. in sociology/social (dis)organization/theory from Texas Woman's University. She is an associate professor of criminal justice at The University of Texas Rio

Grande Valley. Dr. Resendiz is a critical criminologist with a focus on gender, intersectionality, identity politics, border studies, and social justice.

Pygmy Kitabu Springer Nature

Persuasion in the Media Age addresses the impact of electronic media on the practice of persuasion and reviews constantly evolving digital strategies. Today's world demands a new perspective on persuasion—one that is grounded in the assumption that human

consciousness and culture have been forever altered by communication technology. The fourth edition provides timely examples of persuasion in political campaigns, social movements, marketing, and interpersonal relationships—and the role of social media and media technologies in all of the contexts. From advertisers to politicians to influencers to friends, persuaders use increasingly sophisticated strategies to sway behavior. Borchers skillfully weaves theory,

research, and engaging examples to help readers understand the practice of social influence—and to apply critical-thinking skills to the persuasion they encounter daily. The text takes an interdisciplinary approach to provide the latest thinking on persuasion while also drawing on a broad theoretical base for foundational concepts, such as attitudes, rhetoric, and human motivation. Throughout, Borchers emphasizes audience, storytelling, visual images, and ethics.

This comprehensive, insightful, and accessible overview of persuasive communication teaches readers how to be skilled creators of persuasive messages—as well as critical consumers. The Lower Rio Grande Valley of Texas Routledge Dorks, Dweebs, Debutantes, and Jocks—Where would you fit in? Being the new girl is tough—just ask sixteen-year-old Rio Jones. A New York transplant, Rio has no clue how she's going to fit in at her fancy new private school in Southern

California. Plus, being late, overdressed, and named after a Duran Duran song doesn't make the first day any easier for her. Then Rio meets Kristi. Beautiful, rich, and a cheerleader, Kristi is the queen bee of Newport Beach. And Kristi isn't friends with just anyone, so Rio is thrilled when she's invited to be part of the most exclusive, popular clique. Of course, like any club, Kristi and her friends have rules: Always smile (even if you don't mean it), always dress cute (and never

repeat outfits), and always flirt (but only with jocks, preps, and rich college guys). At first Rio is having a great time, but as she becomes more immersed in this jet-set crowd, she figures out there is one last rule that her new friends forgot to mention: Don't cross Kristi . . . in Alyson Noël's Art Geeks and Prom Queens. Saving Sri Lanka's Street Dogs Springer Science & Business Media
Most general histories of the Civil War pay scant attention to the many important military events

that took place in the Lower Rio Grande Valley along the Texas-Mexico border. It was here, for example, that many of the South's cotton exports, all-important to its funding for the war effort, were shuttled across the Rio Grande into Mexico for shipment to markets across the Atlantic. It was here that the Union blockade was felt perhaps most keenly. And it was here where longstanding cross-border rivalries and shifting political fortunes on both sides of the river made for a constant

undercurrent of intrigue. And yet, most accounts of this long and bloody conflict give short shrift to the complexities of the ethnic tensions, political maneuvering, and international diplomacy that vividly colored the Civil War in this region. Now, Christopher L. Miller, Russell K. Skowronek, and Roseann Bacha-Garza have woven together the history and archaeology of the Lower Rio Grande Valley into a densely illustrated travel guide featuring important historical and military

sites of the Civil War period. *Blue and Gray on the Border* integrates the sites, colorful personalities, cross-border conflicts, and intriguing historical vignettes that outline the story of the Civil War along the Texas-Mexico border. This resource-packed book will aid heritage travelers, students, and history buffs in their discovery of the rich history of the Civil War in the Rio Grande Valley.

 In its traditional form, Clifford analysis provides the function theory for solutions of the Dirac equation. From the

beginning, however, the theory was used and applied to problems in other fields of mathematics, numerical analysis, and mathematical physics. recently, the theory has enlarged its scope considerably by incorporating geometrical methods from global analysis on manifolds and methods from representation theory. New, interesting branches of the theory are based on conformally invariant, first-order systems other than the Dirac equation,

or systems that are invariant with respect to a group other than the conformal group. This book represents an up-to-date review of Clifford analysis in its present form, its applications, and directions for future research. Readership: Mathematicians and theoretical physicists interested in Clifford analysis itself, or in its applications to other fields.

A Contemporary Introduction Marion Koogler McNay Art Museum

Key features: Presents a contemporary snapshot of the mechanisms underlying the evolution and adaptation of behavior Explores how genetics, epigenetics, development, and environment shape behavior Discusses a broad range of behavioral repertoires and responses, including those related to thermoregulatory, foraging, predatory, displaying, social and escape strategies. Examines physiological and sensory mechanisms

Covers the effects of various aspects of global change on behavior, with chapters that focus on the impacts of climate change on hydroregulatory behavior and behavioral responses to the effects of habitat alteration resulting from human-mediated change and colonization by invasive species. Lizards serve as focal organisms for many of biological questions related to evolution, ecology, physiology, and morphology. They are studied at multiple spatial and temporal scales, from

the individual to the community level. This book, authored by expert contributors from around the world, explores behaviors underlying the evolution and adaptation of these organisms. It covers conceptual, empirical, and methodological approaches to the understanding of the role that natural and sexual selection play in molding the behavioral traits of lizards. This thorough, illustrated reference should stimulate discussion of the

conceptual and methodological approaches for studying the behavioral traits of these fascinating and highly diverse vertebrates. Blue and Gray on the Border Guilford Publications Making and maintaining lasting changes in nutrition and fitness is not easy for anyone. Yet the communication style of a health professional can make a huge difference. This book presents the proven counseling approach known as

motivational interviewing (MI) and shows exactly how to use it in day-to-day interactions with clients. MI offers simple yet powerful tools for helping clients work through ambivalence, break free of diets and quick-fix solutions, and overcome barriers to change. Extensive sample dialogues illustrate specific ways to enhance conversations about meal planning and preparation, exercise, body image, disordered eating, and more. Reproducible forms and handouts can be

downloaded and printed in a convenient 8 1/2" x 11" size.

Andean Foodways SAGE Publications
 Reconceptualizing STEM Education explores and maps out research and development ideas and issues around five central practice themes: Systems Thinking; Model-Based Reasoning; Quantitative Reasoning; Equity, Epistemic, and Ethical Outcomes; and STEM Communication and Outreach. These themes are aligned with the comprehensive agenda

for the reform of science and engineering education set out by the 2015 PISA Framework, the US Next Generation Science Standards and the US National Research Council's A Framework for K-12 Science Education. The new practice-focused agenda has implications for the redesign of preK-12 education for alignment of curriculum-instruction-assessment; STEM teacher education and professional development; postsecondary, further, and graduate studies; and

out-of-school informal education. In each section, experts set out powerful ideas followed by two eminent discussant responses that both respond to and provoke additional ideas from the lead papers. In the associated website highly distinguished, nationally recognized STEM education scholars and policymakers engage in deep conversations and considerations addressing core practices that guide STEM education.

Papers of the Second Palo Alto Conference Taylor &

Francis
Written by two of the most prominent criminologists in the field, *Race and Crime, Fourth Edition* examines how racial and ethnic groups intersect with the U.S. criminal justice system. Award winning authors Shaun L. Gabbidon and Helen Taylor Greene provide students with the latest data and research on White, Black, Hispanic/Latino, Asian-American, and Native American intersections with the criminal justice system. Rich with several

timely topics such as biosocial theory, violent victimizations, police bias, and immigration policing, the *Fourth Edition* continues to investigate modern-day issues relevant to understanding race/ethnicity and crime in the United States. A thought-provoking discussion of contemporary issues is uniquely balanced with an historical context to offer students a panoramic perspective on race and crime. Accessible and reader friendly, this comprehensive text

shows students how race and ethnicity have mattered and continue to matter in the administration of justice.

The Rio Grande Valley Civil War Trail

Penguin August Vollmer was one of the most extraordinary men ever elected town marshal and appointed police chief in American history. It was Vollmer who brought policing out of its wholly corrupt and often brutal era of politics, by professionalizing not only his own Police Department in Berkeley, California, but police

departments across the country and around the world. He was instrumental in the creation of the polygraph machine (lie detector), patrol car radio communication systems, and, as the Los Angeles Police Chief, the first crime lab in America. His greatest legacy, however, was the higher education program he created at UC Berkeley, which developed into the disciplines of criminal justice and criminology that are so widespread today. This riveting

biography by Willard M. Oliver, ten years in the making, is the first single-volume, full-length biography of Marshal, Police Chief, and Professor August Vollmer. It is a profound work of both biography and history, and brings to life the man who forever changed American policing and police education, reaffirming Vollmer's rightful title as 'The Father of American Policing.' Meticulously researched, the book draws upon newly discovered material,

interviews, and writings of Vollmer's never before used, allowing Oliver to craft a richly detailed and fascinating narrative of

Vollmer's life story. This magisterial portrait of one of policing's greatest leaders promises to reshape our

understanding of both the man and his era and to rightfully restore August Vollmer as a household name.
