*Conversation Analysis and Discourse Analysis* Oxford University Press

*Corpora and Language Education* critically examines key concepts and issues in corpus linguistics, with a particular focus on the expanding interdisciplinary nature of the field and the role that written and spoken corpora now play in the fields of professional communication, teacher education, translation studies, lexicography, literature, critical discourse analysis, and forensic linguistics. The book also presents a series of corpus-based case studies illustrating central themes and best practices in the field.

Gender and discourse interface in many more epistemological sites than can be represented in one collection. *Gender Identity and Discourse Analysis* therefore focuses on a principled diversity of key sites within four broad areas: the media, sexuality, education and parenthood. The different chapters together illustrate how taking a discourse perspective facilitates understanding of the complex and subtle ways in which gender is represented, constructed and contested through language. The book engages critically with long-running and on-going debates, but also reflects and develops current understandings of gender, identity and discourse, particularly the shift from 'gender differences' to the discursive shaping of gender. *Gender Identity and Discourse Analysis* thus offers not only insights and methodologies of new empirical studies but also careful theorisations, in particular of discourse, text, identity and gender. The collection is a valuable resource for researchers, postgraduates and advanced undergraduates working in the area of gender and discourse.

*Persuasion in Self-improvement Books* Discourse Analysis

Studying language, discourses, and contexts of use—as well as student needs, in the broadest sense—and then applying these findings to the pedagogical practices, is what distinguishes ESP from other branches of applied linguistics and language teaching.

The fundamental arguments in this volume are that ESP researchers must use all of the tools available to systematically assess the needs, identities, and issues faced by learners and the language and discourses of their contexts—as well as the “frames” brought to the context by the researchers themselves. In addition, ESP researchers must continue to develop the convergence between research, teaching, and learning as the profession continues to advance. This volume has two parts: *Issues in ESP Research*, which includes chapters by Ken Hyland, Brian Paltridge and Wei Wang, An Cheng, Diane Belcher and Lauren Lukkarila, and Anna Mauranen, and *Methodologies and ESP Research*, which includes chapters by John Flowerdew, Christine Tardy, Sue Starfield, Ann Johns and Leketi Makalela, Lynne Flowerdew, and Magdi Kandil and Diane Belcher. Fittingly, John Swales, the father of ESP and author of *Episodes of ESP*, has contributed some remarks to close this important volume about the future of ESP.

 Now reissued and retypeset, this canonical book explores the role of language and images in newspaper, radio, online and television news. The authors introduce useful frameworks for analysing language, image and the interaction between the two, and illustrate these with authentic news stories from around the English-speaking world, ranging from the Oktoberfest to environmental disasters to the killing of Osama bin Laden. This analysis persuasively illustrates how events are retold in the news and made 'newsworthy' through both language and image. This clearly written and accessible introduction to news discourse is essential reading for students, lecturers and researchers in linguistics, media and journalism studies and semiotics.

*The Bloomsbury Companion to Discourse Analysis* Springer  
 Investigating the efforts of the Kichwa of Tena, Ecuador to reverse language shift to Spanish, this book examines the ways in which indigenous language can be revitalized and how creative bilingual forms of discourse can reshape the identities and futures of local populations. Based on deep ethnographic fieldwork among urban, periurban, and rural indigenous Kichwa communities, Michael Wroblewski explores adaptations to culture contact, language revitalization, and political mobilization through discourse. Expanding the ethnographic picture of native Amazonians and their traditional discourse practices, this book focuses attention on Kichwas' diverse engagements with rural and urban ways of living, local and global ways of speaking, and indigenous and dominant intellectual traditions. Wroblewski reveals the composite nature of indigenous words and worlds through conversational interviews, oral history narratives, political speechmaking, and urban performance media, showing how discourse is a critical focal point for studying cultural adaptation. Highlighting how Kichwas assert autonomy through creative forms of self-representation, *Remaking Kichwa* moves the study of indigenous language into the globalized era and offers innovative reconsiderations of indigeneity, discourse, and identity.

Discourse is language as it occurs, in any form or context, beyond the speech act. It may be written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the respective topic area while also presenting new research findings.

Plagiarism has long been regarded with concern by the university community as a serious act of wrongdoing threatening core academic values. There has been a perceived increase in plagiarism over recent years, due in part to issues raised by the new media, a diverse student population and the rise in English as a lingua franca. This book examines plagiarism, the inappropriate relationship between a text and its sources, from a linguistic perspective. Diane Pecorari brings recent linguistic research to bear on plagiarism, including processes of first and

second language writers; interplay between reading and writing; writer's identity and voice; and the expectations of the academic discourse community. Using empirical data drawn from a large sample of student writing, compared against written sources, *Academic Writing and Plagiarism* argues that some plagiarism, in this linguistic context, can be regarded as a failure of pedagogy rather than a deliberate attempt to transgress. The book examines the implications of this gap between the institutions' expectations of the students, student performance and institutional awareness, and suggests pedagogic solutions to be implemented at student, tutor and institutional levels. *Academic Writing and Plagiarism* is a cutting-edge research monograph which will be essential reading for researchers in applied linguistics.

*How to do Discourse Analysis* Bloomsbury Publishing

This accessible and readable book shows the nature and importance of academic discourses in the modern world, offering a clear description of the conventions of spoken and written academic discourse and the ways these construct both knowledge and disciplinary communities.
