An updated chapter on fundraising includes information on the Tax Cuts and Jobs Act passed in December 2017, which has implications for charitable giving. New references at the end of every chapter guide readers to relevant cases in the Appendix, making it easy for instructors to incorporate the cases into classroom discussions.

Principles and Practices For Responsible Management Education Educational Institute
What do we need to change in order to develop a new generation of business leaders who connect profits with purpose, who see in social entrepreneurship and innovation the key opportunity for addressing our planetary challenges? The answer lies in the contents we select to teach, in the values we invite to explore and develop, and in the methods we use. In the era of 24/7 global access to information from our mobile gadgets, many institutions of higher education are still sitting students in rows or amphitheatres, measuring success via tests and evaluations, with instructors lecturing what students should learn. And instructors feel the challenge of competing with sleepy audiences that divide their attention between their cell phones and the speaker. Stop teaching, the author says, inviting instructors in management schools and higher education to adopt some proven learning principles that can reengage students, unleash their potentials, and foster them to shape the world they want to live in. And have fun doing it. Through adult learning research, guides, activities, and stories from pioneering learning facilitators in education and corporate training, Rimanoczy brings a long-needed revamp to educational institutions that want to be part of responsible management education.

Management Principles and Practices by Lallan Prasad and SS Gulshan S. Chand Publishing

In this book, preeminent organizational scholar Edward Lawler identifies a comprehensive and integrated set of talent management practices that fit today's rapidly evolving workplace. The world of work has changed dramatically, says Lawler. Organizations now operate in a global environment. New technologies continue to disrupt how, when, and where work is done and should be managed. The workforce is becoming more diverse. Sustainability has joined profitability as a key business goal. All of this has dramatically accelerated the pace of change, making recruiting the best talent—not simply filling positions—an overriding concern. But too many organizations still use a job-based, bureaucratic talent management approach that doesn't take into account how the world has changed. Indeed, a recent study showed that from 1995 to 2016, there was no significant change in the way HR spends its time. Lawler says that talent management has to be reinvented. It needs to be closely linked to the organization's overall strategy. Recruitment and talent management should be driven by the skills and competencies the organization needs for long-term growth. This means talent management requires agile systems that can respond quickly to changing conditions and that take a more individualized approach to evaluating and rewarding performance. And everything talent management does has to be based on evidence, not tradition. Lawler looks at attracting, selecting, developing, rewarding, managing, and organizing talent through this new lens. In today's world, organizations have to constantly reinvent themselves—and talent management must do the same.
