Get Started with Apex  
Triggers Unit |  
Salesforce Trailhead  
Salesforce Trigger  
GuideThere are two  
types of triggers:  
Before triggers are  
used to update or  
validate record values  
before they're saved to  
the database.; After  
triggers are used to  
access field values that  
are set by the system  
(such as a record's Id  
or LastModifiedDate  
field), and to affect  
changes in other  
records, such as

logging into an audit  
table or firing  
asynchronous events  
with a queue.Triggers |  
Apex Developer Guide  
| Salesforce  
DevelopersIn this  
Salesforce tutorial, we  
will learn about  
triggers in Salesforce  
and different types of  
triggers in  
Salesforce.So what is a  
trigger in Salesforce? Is  
it a class, an Object or  
apex code ? Most of  
the people will answer  
Trigger is an apex code  
,yes it is correct ,  
However rest two are  
also correct .Triggers in  
Salesforce | Apex
