 Now in its second edition, *Construction Law* is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey Lloyd QC as "seminal" and "definitive". This new edition builds on that strong foundation

and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law.

 This collection of 20 essays contains recent

work by legal scholars, practitioners and judges, all internationally renowned for their expertise in the fields of maritime and commercial law. For maritime lawyers, the book contains absorbing and important studies of the law governing maritime collisions, carriage of goods by sea (examining the meaning of 'actual carriage' in the Hamburg Rules, and the complex web of rules that governs multimodal carriage), and marine insurance (discussing the history of the doctrine of utmost good faith, and jurisdiction clauses in cargo policies). In the area of private international law, there are chapters on the choice of law rules

affecting the ownership of ships, and on recent cases where conflict of laws issues have been decided by the Privy Council. For generalist commercial lawyers, there is a wealth of scholarship on the Sale of Goods Act 1979, its provisions and scope, and on the rules of contractual interpretation, their history, content and application in commercial settings. In addition, there are chapters on negotiating damages for breach of contract, illegality, tracing misapplied funds, the application of private law rules to disputes about cryptocurrencies and developments in the law of directors' duties. Taken as a whole, the essays in this collection stand out for their breadth of

scholarship, analytical power, depth of understanding, and penetrating insights even into the knottiest problems of maritime and commercial law. They are essential reading for every maritime and commercial lawyer and a fitting tribute to a scholar who has led the way in both fields for many decades. It is widely acknowledged that insurance has a major impact on the

operation of tort and contract law regimes in practice, yet there is little sustained analysis of their interaction. The majority of academic private lawyers have little knowledge of insurance law in its own right, and the amount of discussion directed to insurance in private law theory is disproportionately small in relation to its practical importance. Filling this substantial gap in the literature, this book explores the multiple influences of insurance in the law of obligations, and the nature and impact of insurance law as an inherent and significant aspect of private law. It combines conceptual and doctrinal analysis, informing the theoretical discussion of the nature of private

law, including the role of judicial and public purpose, and the place of formalism and of contextualism in normative theories of private law. Arguing for the wider recognition of the multiple impacts of insurance, the book claims that recognition of the presence of insurance necessarily marks a departure from the two-party framework sometimes described as definitive of private law. The structured exploration and interpretation of the contemporary role of insurance in the law of obligations, and of its implications, illuminates this under-explored area of private law, and equips the reader for further enquiry and debate. Now in its third edition, this work has established itself as a key point of reference on English private law for lawyers in the UK and throughout the world. The book acts as an accessible first point of reference for practitioners approaching a private law issue for the first time, whilst simultaneously providing a lucid, concise and authoritative overview of all the key areas of private law. This includes contract, tort, unjust enrichment, land law, trusts, intellectual property,

succession, family, companies, insolvency, private international law and civil procedure. Each section is written by an acknowledged expert, using their experience and understanding to provide a clear distillation and analysis of the subject. This new edition includes all the recent developments since the publication of the second edition in 2007. It covers some areas that were previously not addressed including arbitration in civil procedure, the Human Rights Act 1998 in tort law, and regulatory reform in the light of the global financial crisis. No other single text provides such comprehensive and lucid coverage of the whole of English

private law as this one. It has come to be regarded as an essential item for every law library, reflecting its appeal to both English practitioners and those working in other jurisdictions. At the same time the book's depth of analysis, combined with its ease of reference, make it a favourite among academics and students worldwide.

The Palgrave Macmillan Law Masters series is a long-running and successful list of titles offering clear, concise and authoritative guides to the main subject areas, written by experienced and respected authors. This best-selling, classic text provides a

clear and straightforward account of the basic rules of contract law, while also introducing current debates about the nature, scope and functions of the law and discussing wider controversies surrounding the basic doctrines. Praised time and again by both lecturers and students, Contract Law is compact yet comprehensive, well-written, well-structured, stimulating and engaging. This new tenth edition has been fully revised and updated to reflect recent changes in the law. It is essential reading for all students taking undergraduate and GDL/CPE courses in contract law. Ewan McKendrick is Registrar and Professor of English Private Law in

the University of Oxford, where he is also a Fellow of Lady Margaret Hall. He is the author of a number of key works on contract law and commercial law, and is an editor of Chitty on Contracts. He is also a barrister in practice with a leading set of commercial chambers in London.

The book provides rule-by-rule commentaries on European contract law (general contract law, consumer contract law, the law of sale and related services), dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades, and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has

contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts (from the CISG to the Draft Common European Sales Law) are critically examined and compared with each other. As far as the *acquis commun* (ie the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have, however, been complemented with some chapters, sections, and individual provisions drawn from

other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition, the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background; and it thus investigates whether, and to what extent, these texts can be taken to be genuinely European in nature, ie to constitute a manifestation of a common core of European contract law. Where this is not the case, the question is asked whether, and for what reasons, they should be seen as points of departure for the further development of European contract law.
