### **Critical Perspectives** Routledge

Agrarian transformations within and across countries have been significantly and dynamically altered during the past few decades compared to previous eras, provoking a variety of reactions from rural poor communities worldwide. The recent convergence of various crises – financial, food, energy and environmental – has put the nexus between ‘rural development’ and ‘development in general’ back onto the center stage of theoretical, policy and political agendas in the world today. Confronting these issues will require (re)engaging with critical theories, taking politics seriously, and utilizing rigorous and appropriate research methodologies. These are the common messages and implications of the various contributions to this collection in the context of a scholarship that is critical in two senses: questioning

prescriptions from mainstream perspectives and interrogating popular conventions in radical thinking. This book focuses on key perspectives, frameworks and methodologies in agrarian change and peasant studies. The contributors are leading scholars in the field of rural development studies: Henry Bernstein, Terence J. Byres, Saturnino M. Borrás Jr, Marc Edelman, Cristóbal Kay, Benedict Kerkvliet, Philip McMichael, Shahra Razavi, Ian Scoones and Teodor Shanin. This book was previously published as a special issue of the *Journal of Peasant Studies*.

Critical Perspectives on a New Paradigm of Preparing for Old Age  
 Edward Elgar Publishing

This volume examines revolutionary constructs in literacy education and demonstrates how they have been gentrified, whitewashed, and appropriated, losing their revolutionary edge so as to become palatable for the mainstream. Written by top scholars in literacy education, chapters cover key concepts that were originally conceived as radical theories to upset the status quo—including Third Space, Funds of Knowledge, Culturally Relevant Pedagogies, and more. Each chapter addresses how the core theory was culturally appropriated and de-fanged to support rather than take down racial and societal hierarchies. Critiquing

the harmful impact of watering down these theories, the contributors offer ways to restore the edge to these once groundbreaking ideas, reject racist and assimilationist trends, and support the original vision behind these liberatory theories. In so doing, this volume adopts a truly radical, critical stance that is essential for researchers, scholars, and students in literacy education.

The conceptualization of dementia has changed dramatically in recent years with the claim that, through early detection and by controlling several risk factors, a prevention of dementia is possible. Although encouraging and providing hope against this feared condition, this claim is open to scrutiny. This volume looks at how this new conceptualization ignores many of the factors which influence a dementia sufferers' prognosis, including their history with education, food and exercise as well as their living in different epistemic cultures. The central aim is to question the concept of prevention and analyze its impact on aging people and aging societies.

*Critical Perspectives in Food Studies* Routledge

This book aims to feed into the critical debates about media, power and change through the respectful inclusion of a wide variety of critical approaches and traditions. This diversity is simultaneously structured and balanced by a deeply shared set of concerns, that are mobilised to defend core societal values including social justice, equality, fairness, care for the other and humanity. *Critical Perspectives on Media, Power and Change* raises questions about how the omnipresent media can contribute to the materialisation of these core values, and how it sometimes works against them. Rethinking social change, mediatization and regulations are thus significant issues - explicitly addressed in this book. In addition the authors show how the role of the critical media and communication scholar merits and requires (self-)reflection; critical voices matter, but they also face structural limitations. This book was originally published as two special issues of *Javnost - The Public*.

**Critical Perspectives in Food Studies** Routledge

Weight stigma is so pervasive in our culture that it is often unnoticed, along with the harm that it causes. Health care is rife with anti-fat bias and discrimination against fat people, which compromises care and influences the training of new practitioners. This book explores how this happens and how we can change it. This interdisciplinary volume is grounded in a framework that challenges the dominant discourse that health in fat individuals must be improved through weight loss. The first part explores the negative impacts of bias, discrimination, and other harms by health care providers against fat individuals. The second part addresses how we can 'fatten' pedagogy for current and future health care providers, discussing how we can address anti-fat bias in education for health professionals and how alternative frameworks, such as Health at Every Size, can be successfully incorporated into training so that health outcomes for fat people improve. Examining what works and what fails in teaching health care providers to truly care for the health of fat individuals without further stigmatizing them or harming them, this book is for scholars and practitioners with an interest in fat studies and health education from a range of backgrounds, including medicine, nursing, social work, nutrition, physiotherapy, psychology, sociology, education and gender studies.

**Beyond Colonialism, Development and Globalization**

Routledge

Sheds light on the history of food, cooking, and eating. This collection of essays investigates the connections between food studies and women's studies. From women in colonial India to Armenian American feminists, these essays show how food has

served as a means to assert independence and personal identity. *Critical Dietetics and Critical Nutrition Studies* Liverpool University Press

This Handbook brings together leading interdisciplinary scholarship on the gendered nature of the international political economy. Spanning a wide range of theoretical traditions and empirical foci, it explores the multifaceted ways in which gender relations constitute and are shaped by global politico-economic processes. It further interrogates the gendered ideologies and discourses that underpin everyday practices from the local to the global. The chapters in this collection identify, analyse, critique and challenge gender-based inequalities, whilst also highlighting the intersectional nature of gendered oppressions in the contemporary world order.

*Critical Perspectives in Public Health* Berghahn Books

Sociology and our sociological imaginations are having to confront new digital landscapes spanning mediated social relationships, practices and social structures. This volume assesses the substantive challenges faced by the discipline as it critically reassesses its position in the digital age.

*Critical Perspectives on Addiction* Springer

This second volume in the Food Policy series focuses on critical nutrition and dietetics studies, offering an innovative and interdisciplinary exploration of the complexities of the food supply and the actors in it through a new critical lens. The volume provides an overview of the growth of critical nutrition and dietetics since its inception in 2009, as well as commentary on its continuing relevance and its applicability in the fields of dietetic education, research, and practice. Chapters address key topics such as how to bring critical dietetics into conventional practice, applying critical diets in clinical practice, policy applications, and new perspectives on training and educating a critical nutrition and dietetic workforce. Contributing authors from around the globe also discuss the role of critical nutrition dietetics in industry, private practice, and consultancy, as well the role of critical dietetics in addressing the food, hunger, and health issues associated with the world economic crisis. The authors designed the volume to be a reference work for students enrolled in undergraduate and postgraduate courses in Critical Nutrition, Critical Food Studies, and Critical Dietetics. Each chapter offers concise aims and learning outcomes, as well as assignments for students and a concise chapter summary. These features enhance the value of the volume as a learning tool.

*Critical Perspectives on Black Women and College Success*

University of Georgia Press

*Critical Perspectives in Emergency Services Management* makes an important contribution to the subject of emergency services management and to public administration and organization studies more generally. It critically assesses developments in emergency services management by examining the multi-dimensional nature of the provision of emergency services and their connectedness in advanced western democracies. The effective management of emergency services has never been more important than in today's high-pressured and cost-conscious public sector. The authors of this volume forensically analyse the challenges of delivering emergency services within this context. This book provides an in-depth, scholarly and comprehensive analysis of the changing landscape of emergency service provision and clearly addresses a gap in the market for a critical volume on the emergency services. For anyone seeking to understand why and how the management of emergency services matters, this collection is essential reading.

**Critical perspectives on the global growth of the food and beverage industry** Routledge

This book explores the concept of 'critical' public health, at a

point when many of its core concerns appear to have moved to the mainstream of health policy. Issues such as addressing health inequalities and their socioeconomic determinants, and the inclusion of public voices in policy-making, are now emerging as key policy aims for health systems across Europe and North America. Combining analytical introductory chapters, edited versions of influential articles from the journal *Critical Public Health* and specially commissioned review articles, this volume examines the contemporary roles of 'critical voices' in public health research and practice from a range of disciplines and contexts. The book covers many of the pressing concerns for public health practitioners and researchers including: the implications of new genetic technologies for public health the impact of globalization on local practice the politics of citizen participation in health programmes the impact of car-centred transport systems on health the ethics of evaluation methods and the persistence of health inequalities. *Critical Perspectives in Public Health* is organized into sections covering four key themes in public health: social inequalities; evidence for practice; globalization; technologies and the environment. With contributions from a range of countries including the United States, Canada, the UK, Australia and South Africa, it provides an accessible overview for students, practitioners and researchers in public health, health promotion, health policy and related fields. *Critical Perspectives for Pedagogy and Practice* NYU Press

"Bringing together original contributions by Canadian scholars from various disciplinary backgrounds, *Critical Perspectives in Food Studies* introduces students to the shifting interpretations, perspectives, challenges, governance issues, and future visions that shape the study of food and food issues in Canada and around the world. Offering the most up-to-date overview of the field, this second edition incorporates new chapters on a range of current food-related issues, including food security, farm animal welfare, genetically modified crops, sustainability, and alternative food systems."--

*Critical Perspectives on Media, Power and Change* Routledge

This expansive collection enriches the field of food studies with a feminist intersectional perspective, addressing the impacts that race, ethnicity, class, and nationality have on nutritional customs, habits, and perspectives. Throughout the text, international scholars explore three areas in feminist food studies: the socio-cultural, the corporeal, and the material. The textbook's chapters intersect as they examine how food is linked to hegemony, identity, and tradition, while contributors offer diverse perspectives that stem from biology, museum studies, economics, popular culture, and history. This text's engaging writing style and timely subject-matter encourage student discussions and forward-looking analyses on the advancement of food studies. With a unique multidisciplinary and global perspective, this vital resource is well-suited to undergraduate students of food studies, nutrition, gender studies, sociology, and anthropology.

*School Food, Equity and Social Justice* provides contemporary, critical examinations of policies and practices relating to food in schools across 25 countries from an equity and social justice perspective. The book is divided into three sections: Food politics and policies; Sustainability and development; and, Teaching and learning about food. Bringing together an interdisciplinary group of academics with practitioner backgrounds, the chapters in this collection broaden discussions on school food to consider its educational and environmental implications, the ideals of food in schools, the emotional and ideological components of schooling

food, and the relationships with home and everyday life. Our aim is to provide enhanced insight into matters of social justice in diverse contexts, and visions of how greater equality and equity may be achieved through school food policy and in school food programs. We expect this book to become essential reading for students, researchers and policy makers in health education, health promotion, educational practice and policy, public health, nutrition and social justice education.

*Death Education and Research* Routledge

This popular introductory book provides a clear introduction to the key ideas within media studies. The friendly writing style and everyday examples, which made the first edition a favourite with students and lecturers alike, has been retained and updated in this new edition. This comprehensive text provides a wide-ranging perspective on the media and: Uses examples and case studies from the real world Shows how key concepts can help us understand the relationship between the Media and society Provides a clear explanation of how critical perspectives on the Media construct thinking about media businesses, texts and audiences The fully updated new edition features new boxed summaries of critical approaches and key thinkers. Chapters cover the main topics that students are likely to encounter in their studies, including: Advertising, media and violence, news, politics, young audiences, globalization, sport, popular music and new technology. This book is essential reading for students in media studies, cultural studies and courses with a media interest, such as sociology and English.

**Critical Perspectives on the Management and Organization of Emergency Services** Routledge

This volume is a pioneering contribution to the study of food politics and critical agrarian studies, where food sovereignty has emerged as a pivotal concept over the past few decades, with a wide variety of social movements, on-the-ground experiments, and policy innovations flying under its broad banner. Despite its large and growing popularity, the history, theoretical foundations, and political program of food sovereignty have only occasionally received in-depth analysis and critical scrutiny. This collection brings together both longstanding scholars in critical agrarian studies, such as Philip McMichael, Bina Agarwal, Henry Bernstein, Jan Douwe van der Ploeg, and Marc Edelman, as well as a dynamic roster of early- and mid-career researchers. The ultimate aim is to advance this important frontier of research and organizing, and put food sovereignty on stronger footing as a mobilizing frame, a policy objective, and a plan of action for the human future. This volume was published as part one of the special double issue celebrating the 40th anniversary of the *Journal of Peasant Studies*.

**Contemporary Critical Perspectives** Routledge

*Health, Food and Social Inequality* investigates how vast amounts of consumer data are used by the food industry to enable the social ranking of products, food outlets and consumers themselves, and how this influences food consumption patterns. This book supplies a fresh social scientific perspective on the health consequences of poor diet. Shifting the focus from individual behaviour to the food supply and the way it is developed and marketed, it discusses what is known about the shaping of food behaviours by both social theory and psychology. Exploring how knowledge of social identities and health beliefs and behaviours are used by the food industry, *Health, Food and Social Inequality* outlines, for example, how commercial marketing firms supply food companies with information on where to locate snack and fast foods whilst also advising governments on where to site health services for those consuming such foods disproportionately. Giving a sociological underpinning to Nudge theory while simultaneously critiquing it

in the context of diet and health, this book explores how social class is an often overlooked factor mediating both individual dietary practice and food marketing strategies. This innovative volume provides a detailed critique of marketing and food industry practices and places class at the centre of diet and health. It is suitable for scholars in the social sciences, public health and marketing.

**Critical Perspectives on Innovation Management** Routledge  
This collection explores the complex dynamics of corporate land deals from a broad agrarian political economy perspective, with a special focus on the implications for property and labour regimes, labour processes and structures of accumulation. This involves looking at ways in which existing patterns of rural social

differentiation – in terms of class, gender, ethnicity and generation – are being shaped by changes in land use and property relations, as well as by the re-organization of production and exchange as rural communities and resources are incorporated into global commodity chains. It goes further than the descriptive ‘what’ and ‘who’ questions, in order to understand the ‘how’ and ‘why’ of these patterns. It is empirically solid and theoretically sophisticated, making it a robust and boundary-changing work. Contributors come from various scholarly disciplines. Covering nearly all regions of the world, the collection will be of interest to researchers from various disciplines, policymakers and activists. This book was originally published as a Special Issue of the Journal of Peasant Studies.
