The concise history of the Bugatti Type 57, 57S, 64 & 101. The magnificent Type 57 was the final flowering of the genius of Ettore and Jean Bugatti, and the last truly new model from Molsheim, France. Packed with over 300 images - mostly contemporary - this book is recognised as THE standard reference on the 57 and its close relatives. Veloce Publishing Ltd It's hard to believe, but the W129-series Mercedes-Benz SL was launched over 20 years ago. However, its timeless styling has kept it fresh and attractive in the eyes of a new generation of enthusiasts, as well as those returning to the car having owned one when they were still in the dealerships. A combination of superb

original design and peerless engineering and build quality adds to the desirability of this series of classic German machines, and has ensured that many of these cars can still be seen in regular use today. Covering the SL's ever-changing specification, and its presence in many of the world's major markets is a huge task, but it's all presented here in definitive detail, along with stunning contemporary photography, in a volume that will readily grace any reference library shelf or connoisseur's coffee table. Two earlier books, also published by Veloce, and covering the W113 cars and the 107-series SL and SLC, act as perfect companions to this title, which takes

the SL story up to 1989.

Revealing why Morgan returned to its original 3 Wheeler concept after a century. How the new 3 Wheeler was created, became a best-seller, and was made, this book shows what it's like to drive, strengths, weaknesses, and factory improvements made since the 2011 launch – from modifications, possible developments, and even why it is – or isn't – your kind of vehicle.

After saving Alfa

Romeo from oblivion in

1987, it took Fiat

nearly five years to

debut the first new Alfa

produced under its

control. This is the

story of how the

competition versions of

the 155/156/147 family

of cars were developed

and subsequently

raced to many

championship titles

and race wins. Alfa

Romeo's 155 saloon

was a comprehensively

successful racing

touring car that won

the German and world-

wide DTM

Championship, and

later ITC races. The

model also took on the

role of representing the

company in national

touring car

championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.
