Honeyball and Bowers' Textbook on Employment Law is an approach to employment law with strong critical analysis whilst placing it in its wider contexts, in a concise and user-friendly format. Fully updated to take into account the recent significant developments in this area, including the Equality Act 2010, the key topics on most employment law courses are addressed in detail. An extremely clear writing style allows this text to remain accessible and student-focussed, while providing detailed explanations and analysis of the law. The text also includes diagrams and chapter summaries throughout to aid student understanding, while further reading suggestions assist with essay preparation and research. Setting employment law in context, this book considers both industrial and collective issues as well as examining the increasing role of the EU in UK employment law. A separate chapter on human rights also enables students to understand the role human rights legislation plays in the development of employment law. This book also contains cross referencing to Painter & Holmes' Cases & Materials on Employment Law, ensuring that these two texts continue to complement one another and provide the perfect combination of textbook analysis and the most up-to-date cases and materials. This text is accompanied by a free Online Resource Centre (www.oxfordtextbooks.co.uk/orc/honeyball12e/) which contains updates to the law and useful weblinks.

Named a Best Book of 2020 by Publisher's Weekly Named a Best Cookbook of 2020 by Amazon and Barnes & Noble "Every elegant page projects Keller's high standard of 'perfect culinary execution' . . . This superb work is as much philosophical treatise as gorgeous cookbook." —Publishers Weekly, STARRED REVIEW Bound by a common philosophy, linked by live video, staffed by a

cadre of inventive and skilled chefs, the kitchens of Thomas Keller's celebrated restaurants—The French Laundry in Yountville, California, and per se, in New York City—are in a relationship unique in the world of fine dining. Ideas bounce back and forth in a dance of creativity, knowledge, innovation, and excellence. It's a relationship that's the very embodiment of collaboration, and of the whole being greater than the sum of its parts. And all of it is captured in *The French Laundry, Per Se*, with meticulously detailed recipes for 70 beloved dishes, including Smoked Sturgeon Rillettes on an Everything Bagel, "The Whole Bird," Tomato Consommé, Celery Root Pastrami, Steak and Potatoes, Peaches 'n' Cream. Just reading these recipes is a master class in the state of the art of cooking today. We learn to use a dehydrator to intensify the flavor and texture of fruits and vegetables. To make the crunchiest coating with a cornstarch-egg white paste and potato flakes. To limit waste in the kitchen by fermenting vegetable trimmings for sauces with an unexpected depth of flavor. And that essential Keller trait, to take a classic and reinvent it: like the French onion soup, with a mushroom essence stock and garnish of braised beef cheeks and Comté mousse, or a classic crème brûlée reimagined as a rich, creamy ice cream with a crispy sugar tuile to mimic the caramelized coating. Throughout, there are 40 recipes for the basics to elevate our home cooking. Some are old standbys, like the best versions of beurre manié and béchamel, others more unusual, including a ramen broth (aka the Super Stock) and a Blue-Ribbon Pickle. And with its notes on technique, stories about farmers and purveyors, and revelatory essays from Thomas Keller—"The Lessons of a Dishwasher," "Inspiration Versus Influence," "Patience and Persistence"—*The French Laundry, Per Se* will change how young chefs, determined home cooks, and dedicated food lovers understand and approach their cooking.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
