In Among the
Gliesians, Philip Fried
continues
experimenting with
different registers of
language, technical
jargon, and a variety of
literary and non-
literary forms, ranging
from sonnet, ballad,

acrostic, and villanelle to press release and report. His witty and compassionate work takes on a new urgency, however, as he focuses on our alarming present situation. Dealing with such topical themes as mass shootings, nuclear gamesmanship, and threats to democracy, Fried's poems reveal a struggle for meaningful expression when meaning itself is under attack. In the section giving its title to the book, reports on an extraterrestrial society hold up a mirror to our own culture.

[Classics and Commercials](#) Farrar, Straus and Giroux "With its warm palette and gentle scenes of the worried child being

comforted, this book could function as a sequel to Sanna's astounding debut picture book, *The Journey*, which recounted a family's dangerous flight from their home in a war zone. Sanna provides an empathetic exploration of the adjustment to a new land that all migrants experience."--New York Times Book Review "Authentic and immediate, the first-person narration draws in readers and reveals just how easily fear can become overwhelming and isolating, but can also be controlled when feelings are shared and through comfort found in friendship. Like Sanna's *The Journey*, this book about an immigrant's experiences tackles a

tough topic with honesty, empathy, and a sense of hopefulness.”—School Library Journal, STARRED REVIEW “This follow-up to *The Journey* about a refugee family fleeing a war-torn homeland, focuses on the young daughter’s apprehension as she adjusts to life in a new country and a new school.”—The Horn Book Review “[...] this creative depiction shows how friendship, empathy, and connection can help bring the overwhelming down to size for all.”
—Publishers Weekly, STARRED REVIEW “A universal book that can be used to explain fear to readers and give empathy to those in a new environment.”
—Kirkus Reviews “It

will be a familiar story for many children, but the girl’s specific fears about language and difference might make this useful for discussions about newcomers as well.”
—Booklist When a young immigrant girl has to travel to a new country and start at a new school, she is accompanied by her Fear who tells her to be alone and afraid, growing bigger and bigger every day with questions like “how can you hope to make new friends if you don’t understand their language?” But this little girl is stronger than her Fear. A heart-warming and timely tale from the bestselling author and illustrator of *The Journey*, this book shows us the importance of sharing

your Fear with others-- after all, everyone carries a Fear with them, even if it's small enough to fit into their pocket!

The Nuptial Mystery

Routledge

Translated by Michelle K. Borrás The idea of love pervades our society, yet it is nearly impossible to answer the question What is love? especially as we witness the divorce of love from sexuality and of sexuality from procreation. Aware that many people today are skeptical about marriage, Angelo Cardinal Scola nevertheless suggests that only in the category of nuptial mystery do we find a way to adequately describe the phenomenon of love. A bright new leader in the Catholic Church,

Cardinal Scola argues that the male-female relationship lies near the heart of what it means to bear the image of God. Scola's book explores the essential sexual differences that both separate and unite men and women, and it shows how men and women can realize their purpose in marriage or celibacy. Conversant with papal teaching and Catholic writers from Aquinas to von Balthasar, Cardinal Scola writes with a deep regard for marriage and the family. His *Nuptial Mystery* will leave readers with a thoroughly Christian appreciation for incarnate love. *Little One* National Geographic Books New York Times bestseller! The Atlas

Analyzes Derrida's 1975 seminar "La vie la mort" as a deconstruction of biology with relevance to his work more broadly. In *Biodeconstruction*, Francesco Vitale demonstrates the key role that the question of life plays in Jacques Derrida's work. In the seminar *La vie la mort* (1975), Derrida engages closely with the life sciences, especially biology and

evolution theory. Connecting this line of thought to his analysis of cybernetics in *Of Grammatology*, Vitale shows how Derrida develops a notion of biological life as itself a sort of text that is necessarily open onto further articulations and grafts. This sets the stage for the deconstruction of the traditional opposition between life and death, conceiving of death as an internal condition of the constitution of the living rather than being the opposite of life. It also provides the basis for the deconstruction of the rigidly deterministic concept of the genetic program, an insight that anticipates recent achievements of biological research in epigenetics and sexual

reproduction. Finally, Vitale argues that this framework can enrich our understanding of Derrida's late work devoted to political issues, connecting his use of the autoimmunitarian lexicon to the theory of cellular suicide in biology. "This book is extremely interesting and engaging, and provides a very original and timely perspective on Derrida's work. Its greatest strength is bringing together Derrida's 'deconstruction' in his analysis of the life sciences under the heading of 'biodeconstruction.' This term is simple but ingenious, and captures beautifully the material dimension of Derrida's work." — Nicole Anderson, author of *Derrida:*

"Susan Vreeland set a high standard with *Girl in Hyacinth Blue*.... The *Passion of Artemisia* is even better....

Vreeland's unsentimental prose turns the factual *Artemisia* into a fictional heroine you won't soon forget."

—People A true-to-life novel of one of the few female post-Renaissance painters to achieve fame during her own era against great struggle.

Artemisia Gentileschi led a remarkably "modern" life. Vreeland tells *Artemisia's* captivating story, beginning with her public humiliation in a rape trial at the age of eighteen, and continuing through her

father's betrayal, her marriage of convenience, motherhood, and growing fame as an artist. Set against the glorious backdrops of Rome, Florence, Genoa, and Naples, inhabited by historical characters such as Galileo and Cosimo de' Medici II, and filled with rich details about life as a seventeenth-century painter, Vreeland creates an inspiring story about one woman's lifelong struggle to reconcile career and family, passion and genius.

Vocabolario sardo-italiano e italiano-sardo Salmon Poetry The Global Lives of Things considers the ways in which ‘things’, ranging from commodities to works of art and precious materials, participated in the shaping of global connections in the period 1400-1800. By focusing on the material exchange between Asia, Europe, the Americas and Australia, this volume traces the movements of objects through human networks of commerce, colonialism and consumption. It argues that material objects mediated

between the forces of global economic exchange and the constantly changing identities of individuals, as they were drawn into global circuits. It proposes a reconceptualization of early modern global history in the light of its material culture by asking the question: what can we learn about the early modern world by studying its objects? This exciting new collection draws together the latest scholarship in the study of material culture and offers students a critique and explanation of the notion of commodity and a reinterpretation of the meaning of exchange. It engages with the concepts of 'proto-globalization', 'the first global age' and

'commodities/consumption'. Divided into three parts, the volume considers in Part One, Objects of Global Knowledge, in Part Two, Objects of Global Connections, and finally, in Part Three, Objects of Global Consumption. The collection concludes with afterwords from three of the leading historians in the field, Maxine Berg, Suraiya Faroqhi and Paula Findlen, who offer their critical view of the methodologies and themes considered in the book and place its arguments within the wider field of scholarship. Extensively illustrated, and with chapters examining case studies from Northern Europe to China and Australia, this book will be essential reading for

students of global history. The Global Lives of Things Penguin
