[Characteristics of Emotional and Behavioral Disorders of Children and Youth](#) Springer
 Revised edition of: Introduction to Java programming / Y. Daniel Liang, Armstrong Atlantic State University. Tenth edition. Comprehensive version. 2015.
The 9/11 Commission Report Addison-Wesley Longman
 Completely updated and revised, this eleventh edition arms managers with the business tools they'll need to succeed. The text presents managerial concepts and theory related to the fundamentals of planning, leading, organising, and controlling with a strong emphasis on application. It offers new information on the changing nature of communication through technology. Focus is also placed on ethics to reflect the importance of this topic, especially with the current economic situation. This includes all new ethics boxes throughout the chapters. An updated discussion on the numerous legal law changes over the last few years is included as well. Managers will be able to think critically and make sound decisions using this text because the

concepts are backed by many applications, exercises, and cases.

[Effective Public Relations](#) Cosimo, Inc.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any

mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

[Introduction to Management](#) Lippincott Williams & Wilkins

Marketing: Real People, Real Choices brings you and your students into the world of marketing through the use of real companies and the real-life marketing issues that they have faced in recent times. The authors explain core concepts and theories in Marketing, while allowing the reader to search for the information and then apply it to their own experiences as a consumer, so that they can develop a deeper understanding of how marketing is used every day of the week, in every country of the world. The new third edition is enhanced by a strong focus on Value Creation and deeper coverage of modern marketing communications practices.

Throughout its many editions, The Architect in Practice has remained a leading textbook used in the education of architects. While the content of the book has developed, the message and philosophy has remained constant: to provide students of architecture and young practitioners with a readable guide to the profession, outlining an architect's duties to their client and

contractor, the key aspects of running a building contract, and the essentials of management, finance and drawing office procedure. The eleventh edition follows in that tradition. The text has been brought up to date to ensure it follows the new RIBA Plan of Work 2013 as the guide to the architect's workflow. In addition, a number of changes to standard forms of contract were made with the publication of the JCT 2011 suite of contracts, and the RIBA Standard Form for the Appointment of an Architect 2010 (2012 Revision). These new forms are fully covered. In addition, the opportunity has been taken to reorganise the layout so that the content flows in a way that is more consistent with current architectural practice, and to deal with the increasing use of BIM. The eleventh edition of *The Architect in Practice* continues to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession.

The two volumes IFIP AICT 545 and 546 constitute the refereed post-conference proceedings of the 11th IFIP WG 5.14 International Conference on Computer and Computing Technologies in Agriculture, CCTA 2017, held in Jilin, China, in August 2017. The 100 revised papers included in the two volumes were carefully reviewed and selected from 282 submissions. They cover a wide range of interesting theories and applications of information technology in agriculture. The papers focus on four topics: Internet of Things and big data in agriculture, precision agriculture and agricultural robots, agricultural information services, and animal and plant phenotyping for agriculture.

Through four successful editions, this briefer book uses an approach which promotes learning as an "activity" of the reader - it shows how "active learning" can motivate and excite readers to a deeper understanding of introductory psychology. With balanced and modern treatment of gender and culture, this book encourages readers to develop "critical thinking" skills. It is organized around the SQ4R (survey, question, read, recite, review) method of learning.
