Beauty Meets Beast in San Francisco Accepting employment as a governess after hard times hit her family, medieval scholar Rosalind Hawkins is surprised when she learns that her mysterious employer has no children, no wife, and she is not to meet with him face to face. Instead, her duties are to read to him, through a speaking tube, from ancient manuscripts in obscure, nearly-forgotten dialects. A requirement for the job was skill in translating medieval French, and she now understands the reason for that requirement, and assumes her unseen employer's interest in the descriptions of medieval spells and sorcery is that of an eccentric antiquary. What she does not realize is that his interest is anything but academic. He has a terrible secret and is desperately searching for something that can reverse the effects of the misfired spell which created his predicament.  "This book presents results from a four-year project addressing the central question: What factors, challenges, and contexts contribute to and constrain literacy achievement among at-risk adolescent learners with culturally diverse backgrounds? Researchers consider the importance of several, interrelated factors that support the development of adolescents' literacies in multilingual contexts: support from educators, community groups, families, and peers; recognition of the multi-faceted complexity of literacy through multiple, complementary methods of research and assessment;

approaches to pedagogy that engage learners' zones of proximal development in humanistic and purposeful ways; and promoting students' vocabulary knowledge, strategies for reading, writing, and learning, and orientations to engaging with epistemic purposes of literacy critically, through multiple media, and with self-confidence"-- Provided by publisher.

Barefoot enthusiasts say ditching your shoes is essential for optimal whole-body function. Doctors say minimalist shoes cause injury. Who's right? What if they both are? In *Whole Body Barefoot*, biomechanist Katy Bowman explains how both sides are right and wrong by broadening the perspective of over-simplified "shoes are good" or "shoes are bad" arguments. Using evolutionary-based and biomechanics arguments, Bowman demonstrates that shoes, in a modern context, have purpose, but that the trade-off for protection can be reduced whole-body health if we don't pick the right shoes for our body and skill-level.
