Is your company run by a team with no name? At the top of every organization chart lies a myth—that a Senior Management Team makes a company's critical

decisions. The reality is that critical decisions are typically made by the boss and a small group of confidants—a "team with no name"—outside of formal processes. Meanwhile, other members of the management team wonder why they weren't in the room or even consulted ahead of time. The dysfunction that results from this gap

between myth and reality has led to years of unproductive team building exercises. The problems, Frisch shows, are ones of process and structure, not psychology. In *Who's in the Room?* Bob Frisch provides a unique perspective to this widely misunderstood issue. Flying in the face of decades of organizational psychology, he argues that the solution lies not

in addressing behaviors, but in unseating the senior management team as the epicenter of decision making. Using a broad portfolio of teams—large and small, permanent and temporary, formal and informal—great leaders match each decision to the appropriate team in a fluid, flexible approach that you won't find described in management textbooks. Who's in the Room? is based on interviews with CEOs at organizations ranging from MasterCard to

Ticketmaster to The Red Cross. Understand and embrace the way decision-making actually happens in their organizations Use these "teams with no names" to best advantage Engage the Senior Management Team in the three critical tasks for which it is ideally suited Organizations will get better decisions and superior results by unleashing the full potential of their Senior Management Teams. And bosses will see a dramatic drop-off in people coming into their offices asking,

"Why wasn't I in the room?"

After the shattering conclusion of Cary's quest for justice for the victims of a suspected serial killer in *Premonition*, *Retribution* picks up with her cohorts continuing their own investigation to hunt down the person responsible for the heinous murders. The man the media has dubbed the "Deer Killer" continues to haunt bucolic Connecticut—but now, his true agenda has been revealed. As more

innocents fall victim to his prey, Detective Hank Nowak's father enters the picture, only to become entangled in the murderer's diabolical plot. The past informs the present as Hank, private detective Vito Loggia, and Sergeant Joseph O'Malley race against the clock to stop the killings. Who will be next? More importantly, who will come out on top in this deadly game of vengeance? "Retribution is a brilliant, thrill-a-minute roller coaster ride through the mind of a

serial killer...Well done!"  
-Brian Cuban, Author of The Ambulance Chaser  
"...a fast-paced cat and mouse game between a cop and a serial killer...sit back and enjoy the ride as Retribution cleverly takes you right up to the brink where you can't wait until Ms. Whitman delivers her next scintillating thriller."-Deborah Goodrich Royce, Award-Winning Author of Reef Road, Ruby Falls, and Finding Mrs. Ford

suburban terror. A neo-noir of the highest level."

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of

adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the

creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account

of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and

attorneys, and forensic science educators.

 A Kirkus Reviews Best Book of the Year  
 The witty and exuberant New York Times bestselling author and record-setting Jeopardy! champion Ken Jennings relays the history of humor in "lively, insightful, and crawling with goofy factlings," (Maria Semple, author of *Where'd You Go*

Bernadette)—from fart jokes on clay Sumerian tablets to the latest Twitter gags and Facebook memes. Where once society's most coveted trait might have been strength or intelligence or honor, today, in a clear sign of evolution sliding off the trails, it is being funny. Yes, funniness. Consider: Super Bowl commercials don't try to sell you anymore; they try to make you laugh. Airline safety tutorials—those terrifying laminated cards about the possibilities of

fire, explosion, depressurization, and drowning—have been replaced by joke-filled videos with multimillion-dollar budgets and dance routines. Thanks to social media, we now have a whole Twitterverse of amateur comedians riffing around the world at all hours of the day—and many of them even get popular enough online to go pro and take over TV. In his “smartly structured, soundly argued, and yes—pretty darn funny” (Booklist, starred review) *Planet Funny*, Ken

Jennings explores this brave new comedic world and what it means—or doesn’t—to be funny in it now. Tracing the evolution of humor from the caveman days to the bawdy middle-class antics of Chaucer to Monty Python’s game-changing silliness to the fast-paced meta-humor of *The Simpsons*, Jennings explains how we built our humor-saturated modern age, where lots of us get our news from comedy shows and a comic figure can even be elected President of the United

States purely on showmanship. “Fascinating, entertaining and—I’m being dead serious here—important” (A.J. Jacobs, author of *The Year of Living Biblically*), *Planet Funny* is a full taxonomy of what spawned and defines the modern sense of humor. *100 Cupboards (100 Cupboards Book 1)* Post Hill Press  
Jazinta Wallis (Jaz) is able to see into a parallel world of darkness and demon activity. An outsider with purple-streaked hair and a quirky dress sense, she is

mercilessly harassed, especially by the sinister school bully, Kacey Matthews, and thought by most to be insane. Brandon Kelly, logical, strong and good-looking, Jazs lifelong friend has trouble believing Jaz in spite of what he calls his hallucinations of fiendish creatures trying to kill him and whispering, audible voices telling him hes no good. These two must work together with their powerful angel guardians if they are to defeat the demon overlord and set the city free.
