Los Angeles Times Bestseller This riveting tour through 1960s Los Angeles is a "history from below, in the very best sense" as it celebrates the "grassroots heroes and struggles" of the social movements of the era (Barbara Ehrenreich, author of *Natural Causes*). "Authoritative and impressive." —Los Angeles Times "Monumental." —Guardian Los Angeles in the sixties was a hotbed of political and social upheaval. The city was a launchpad for Black Power—where Malcolm X and Angela Davis first came to prominence and the Watts uprising shook the nation. The city was home to the Chicano Blowouts and Chicano Moratorium, as well as being the birthplace of "Asian American" as a political identity. It was a locus of the antiwar movement, gay liberation movement, and women's movement, and, of course, the capital of California counterculture. Mike Davis and Jon Wiener provide the first comprehensive movement history of L.A. in the sixties, drawing on extensive archival research and dozens of interviews with principal figures, as well as the authors' storied personal histories as activists. Following on from Davis's award-winning L.A. history, *City of Quartz*, *Set the Night on Fire* is a historical tour de force, delivered in scintillating and fiercely beautiful prose.

This landmark history of nuclear power is perfectly timed for today, when Americans are gravely concerned with nuclear terrorism, and a nuclear renaissance is seen as a possible solution to global warming. Few have truly come to terms with the complexities of an issue which may determine the future of the planet. Nuclear weapons, it was once hoped, would bring wars to a close; instead, they spurred a massive arms race that has recently expanded to include North Korea and Iran. Once seen as a source of unlimited electricity, nuclear reactors breed contamination and have been used as covers for secret weapons programs from India and Pakistan to Iraq and Iran. The evolving story of nuclear power, as told by industry insider Stephanie Cooke, reveals the gradual deepening of our understanding of the pros and cons of this controversial energy source. Drawing on her unprecedented access, Cooke shows us how, time and again, the stewards of the nuclear age-- the more-is-better military commanders and civilian nuclear boosters-- have fallen into the traps of their own hubris and wishful thinking as they tried to manage the unmanageable. Their mistakes are on the verge of being repeated again, which is why this book deserves especially close attention now.

This second volume moves beyond a general introduction to product lifecycle management (PLM) and its principal elements to provide a more in-depth analysis of the subjects introduced in Volume 1 (21st Century Paradigm for Product Realisation).

Providing insights into the emergence of PLM and the opportunities it offers, key concepts such as the PLM Grid and the PLM Paradigm are introduced along with the main components of PLM and the associated characteristics, issues and approaches. Detailing the 10 components of PLM: objectives and metrics; management and organisation; business processes; people; product data; PDM systems; other PLM applications; facilities and equipment; methods; and products, it provides examples and best practices. The book concludes with instructions to help readers implement and use PLM successfully, including outlining the phases of a PLM Initiative: development of PLM vision and strategy; documentation of the current situation; description of future scenarios; development of implementation strategies and plans; implementation and use. The main activities, tasks, methods, timing and tools of the different phases are also described.

The book provides a behind-the-scenes look into the unlikely partnerships, unique collaborations, variety of financial tools and bold bets led by The Kresge Foundation during a 13-year period in Detroit to foster a sustainable and equitable recovery for the city and all of its residents. The authors originally imagined the book contents as four individual case studies. In preparation, they performed an exhaustive review of Kresge Foundation historical documents and a comprehensive scan of media coverage and journalistic commentary about Detroit's recovery. They also conducted more than four dozen interviews with the individuals who participated in, witnessed or otherwise impacted the changing tide in the city of Detroit during this period. Once assembled, the authors agreed that—assembling together in context with one another – the content could serve as an important snapshot of some of the positive forces and extreme undercurrents at play in Detroit during this extraordinary time in the city.

Rich and his contributing authors provide a political and economic analysis of sports stadium construction in the United States—the impact it has on the sports industry itself and on the host communities in which stadiums and arenas are built. The book brings together the research of leading academic analysts of sports in American society and gives a candid assessment of the claims and benefits the sports industry makes, in its continuing promotion of new stadium construction. Focusing on Baltimore, Cleveland, Chicago, Boston, Detroit, New Orleans, Toledo and Phoenix, the authors examine the topic from the perspectives of history, politics, and economics—and in doing so they raise several questions about taxpayer and community protection issues. Specifically, what do communities really get out of these facilities? They point out that even as new and more expensive facilities are being built, Congress has not provided taxpayers and cities any real protection from the risks involved in stadium investment. Rich and his contributors examine how the pro-stadium coalitions mobilize and explain why stadium supporters manage to win most of their construction initiatives. In doing so, the contributors challenge the conventional wisdom that stadiums stimulate economic development and provide good jobs. On the contrary, they have not lived up to the promises owners made to their host communities. Neither have they generated high paying jobs nor have they met their operating costs. The book concludes with ways in which sports franchise owners can be held more accountable to their communities. The result is a powerful, well reasoned, skeptical but fair assessment of a growing phenomenon, and an important resource for professionals and academics in all fields of public policy administration and urban development and management.

Her quest takes her on a road trip that teaches her not only about cars and the peculiar passions of car lovers but also about herself. Halfway through this extraordinary adventure, Hazleton's father, the man who taught her to drive, dies suddenly, and her trip becomes a journey of

"The fall and maybe rise of Detroit, America's most epic urban failure, from local native and Rolling Stone reporter Mark Binelli Once America's capitalist dream town, Detroit is our country's greatest urban failure, having fallen the longest and the farthest. But the city's worst crisis yet (and that's saying something) has managed to do the unthinkable: turn the end of days into a laboratory for the future. Urban planners, land speculators, neo-pastoral agriculturalists, and utopian environmentalists--all have been drawn to Detroit's baroquely decaying, nothing-left-to-lose frontier. With an eye for both the darkly absurd and the radically new, Detroit-area native and Rolling Stone writer Mark Binelli has chronicled this convergence. Throughout the city's "museum of neglect"--its swaths of abandoned buildings, its miles of urban prairie--he tracks the signs of blight repurposed, from the school for pregnant teenagers to the killer ex-con turned street patroller, from the organic farming on empty lots to GM's wager on the Volt electric car and the mayor's realignment plan (the most ambitious on record) to move residents of half-empty neighborhoods into a viable, new urban center. Sharp and impassioned, Detroit City Is the Place to Be is alive with the sense of possibility that comes when a city hits rock bottom. Beyond the usual portrait of crime, poverty, and ruin, we glimpse a future Detroit that is smaller, less segregated, greener, economically diverse, and better functioning--what might just be the first post-industrial city of our new century"--

Examines in text and vivid photographs a thirty-year span of Detroit Tigers baseball, from 1920 to 1950. In the three decades between 1920 and 1950, the Detroit Tigers won four American League pennants, the first world championship in team history in 1935, and a second world crown ten years later. Star players of this era--including Ty Cobb, Harry Heilmann, Charlie Gehringer, Hank Greenberg, Mickey Cochrane, George Kell, and Hal Newhouser--represent the majority of Tigers players inducted into the Hall of Fame. Sports writers followed the team feverishly, and

fans packed Navin Field (later Briggs Stadium) to cheer on the high-flying Tigers, with the first record season attendance of one million recorded in 1924 and surpassed eight more times before 1950. In *The Glory Years of the Detroit Tigers: 1920-1950*, author William M. Anderson combines historical narrative and photographs of these years to argue that these years were the greatest in the history of the franchise. Anderson presents over 350 unique and lively images, mostly culled from the remarkable Detroit News archive, that showcase players' personalities as well as their exploits on the field. For their meticulous coverage and colorful style, Anderson consults Tigers reporting from the three daily Detroit newspapers of the era (the Detroit News, Detroit Free Press, and Detroit Times) and the Sporting News, which was known then as the "Baseball Bible." Some especially compelling columns are reproduced intact to give readers a feel for the exciting and careful reporting of these years. Anderson combines historical text with photos in six topical chapters: "Spring Training: When Dreams are Entertained," "Franchise Stars," "The Supporting Cast," "Moments of Glory and Notable Games," "The War Years," and "The Old Ballpark: Where Legends and Memories Were Made." Anderson presents sketches of many fine players

who have been overlooked in other histories and visits characters who often acted in strange ways: Dizzy Trout, Gee Walker, Elwood "Boots" "The Baron" Poffenbeger, and Louis "Bobo" "Buck" Newsom. Tigers fans and anyone interested in local sports culture will enjoy this comprehensive and compelling look into the glory years of Tigers history.

An explosive exposé of America's lost prosperity by Pulitzer Prize-winning journalist Charlie LeDuff "One cannot read Mr. LeDuff's amalgam of memoir and reportage and not be shaken by the cold eye he casts on hard truths . . . A little gonzo, a little gumshoe, some gawker, some good-Samaritan—it is hard to ignore reporting like Mr. LeDuff's." —The Wall Street Journal "Pultizer-Prize-winning journalist LeDuff . . . writes with honesty and compassion about a city that's destroying itself—and breaking his heart." —Publishers Weekly (starred review) "A book full of both literary grace and hard-won world-weariness." —Kirkus Back in his broken hometown, Pulitzer Prize-winning journalist Charlie LeDuff searches the ruins of Detroit for clues to his family's troubled past. Having led us on the way up, Detroit now seems to be leading us on the way down. Once the richest city in America,

Detroit is now the nation's poorest. Once the vanguard of America's machine age—mass-production, blue-collar jobs, and automobiles—Detroit is now America's capital for unemployment, illiteracy, dropouts, and foreclosures. With the steel-eyed reportage that has become his trademark, and the righteous indignation only a native son possesses, LeDuff sets out to uncover what destroyed his city. He beats on the doors of union bosses and homeless squatters, powerful businessmen and struggling homeowners and the ordinary people holding the city together by sheer determination. *Detroit: An American Autopsy* is an unbelievable story of a hard town in a rough time filled with some of the strangest and strongest people our country has to offer.
