1st edition, 1992: Creating powerful brands : the strategic route to success in consumer, industrial and service markets. Building Customer-based Brand Equity SAGE

This wise and inspiring book by Leonard Berry, moves far beyond his pioneering work in services marketing and service quality to explain how great service companies meet their toughest challenge: sustaining long-term success. In a world where customers regard flawless products as a given, service is the key differentiator between competitors in any field. From Berry's exacting study of fourteen mature, highly successful, labor-intensive

companies comes an astonishing revelation: the single most important factor in building a lasting service business is not a matter of savvy business practice, but of humane values. In all fourteen award-winning companies -- Bergstrom Hotels, The Charles Schwab Corporation, Chick-fil-A, The Container Store, Custom Research Inc., Dana Commercial Credit, Dial-A-Mattress, Enterprise Rent-A-Car, Midwest Express Airlines, Miller SQA, Special Expeditions, St. Paul Saints, USAA, and Ukrop's Super Markets -- values-driven leadership connects with strategic focus, executional excellence, control of destiny, trust-based relationships, generosity, investment in employee success, acting small, and brand cultivation to drive customer satisfaction, innovation, and growth. Dedicating a chapter to each of these nine drivers, this book is the most

far-reaching and insightful vision ever presented of the principles and step-by-step actions that continuously bring success to life in a company. Berry's comprehensive model reveals the soul that underlies the strategies and day-to-day operations of great service companies, guiding the thousands of daily decisions of individual employees. Clear, compelling, pathbreaking, *Discovering the Soul of Service* is essential reading for managers everywhere.

Building Strong Brands Psychology Press
Brands are now a dominant feature of everyday life. Drawing on rich empirical material, this book builds up a critical theory, arguing that brands have become an important tool for transforming everyday life into economic value.

Dare to Lead Morgan James Publishing
Brands are among the most valuable assets of most of today's corporations. Brand names are the lingua franca of commerce. Branding is all about brands in both the packaged goods and the services industries - how to develop them, how to protect them, how to use them effectively. It combines the practical experience of marketing executives, trade mark lawyers, designers, advertising agents and others. It provides an international perspective on branding and is the first, authoritative book written on this increasingly important subject.

Strategic Brand Management Simon and Schuster

In their efforts to become more customer-focused, companies everywhere find themselves entangled in outmoded systems, metrics, and strategies rooted in their product-centered view of the world. Now, to ease this shift to a customer focus, marketing strategy experts Roland T. Rust, Valarie A. Zeithaml, and Katherine N. Lemon have created a dynamic new model they call "Customer Equity," a strategic framework designed to maximize every firm's most important asset, the total lifetime value of its customer base. The authors' Customer Equity Framework yields powerful insights that will help any business increase the value of its customer base. Rust, Zeithaml, and Lemon introduce the three drivers of customer equity -- Value Equity, Brand Equity, and Retention Equity -- and explain in clear, nontechnical language how managers can base their strategies on one or a combination of these drivers. The authors demonstrate in this breakthrough book how managers can build and employ competitive metrics that reveal their company's Customer Equity relative to their competitors. Based on these metrics, they show how managers can determine

which drivers are most important in their industry, how they can make efficient strategic trade-offs between expenditures on these drivers, and how to project a financial return from these expenditures. The final section devotes two chapters to the Customer Pyramid, an approach that segments customers based on their long-term profitability, and an especially important chapter examines the Internet as the ultimate Customer Equity tool. Here the authors show how companies such as Intuit.com, Schwab.com, and Priceline.com have used more than one or all three drivers to increase Customer Equity. In this age of one-to-one marketing, understanding how to drive Customer Equity is central to the success of any firm. In particular, *Driving Customer Equity* will be essential reading for any marketing manager and, for that matter, any manager concerned with growing the value of the firm's customer base.

The Driving Trends of International Business in the 21st Century Simon and Schuster

Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. *Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet* argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide

grounds for hope, including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that benefits us all.

What is Brand Equity, Anyway? Harvard Business Press

Establishing a brand name is the goal of anyone introducing a new product, and maintaining a brand over time is even more profitable. Established brands are now major corporate assets, as shown when Philip Morris bought Kraft for four times its book value. *The Handbook of Brand Management* explains the ins and outs of managing brand names in today's fast-changing, competitive marketplace. Developed by marketing expert David Arnold to answer managers' actual questions about brands, this essential guide combines expert advice with the stories of thirteen successful companies from around the world. This book describes how to research, target, budget, and promote new brand. It presents detailed analyses of marketing plans used in situations both good (how did Anheuser-Busch introduce Michelob Dry so successfully?) and bad (how could Perrier survive the benzene scare?). For established brands, managers learn tactics to reverse a market-share decline, to extend brands internationally, and to appraise a brand name's financial value. They find insights in the examples of Schering-Plough "stretching" the Coppertone brand to include sunscreens for children, Birds Eye freezing out competitors by how it positioned a new meal in consumers' minds, and many other popular brand-name products.

The Essential Brand Book Indiana University Press

"Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act." —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age

disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness. *Self-Awareness (HBR Emotional Intelligence Series)* Now Publishers Inc The Foreword by renowned marketing guru Philip Kotler sets the stage for a comprehensive review of the latest strategies for building, leveraging, and rejuvenating brands. #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to

start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Many facets of place branding, such as identities, image, promotion or sense of place, have been around for a long time. However, the need to analyse their nature in the context of branding and to examine their relationships in detail has grown rapidly in the last decade or so, as places all over the world have put branding activities higher than ever in their agenda. This important new book examines and clarifies key aspects of the recently popularised concept of place branding, expounding many controversies, confusions and discords in the field. The expert contributors clarify several unresolved issues surrounding the application of place branding, in particular its multiple goals. They provide a detailed analysis of the role of local communities in place branding strategies, and illustrate not only how, but also why brand

management should be implemented. Case studies from a range of jurisdictions and cultural and political viewpoints are drawn upon, each illustrating an array of issues or techniques in specific economic, cultural and geographical contexts. This book provides a theoretically informed but

practically oriented overview and discussion of the increasingly popular field of place branding as an instrument of place management. As such, it will strongly appeal to both academics and practitioners in the fields of place

marketing, place branding, local development, tourism planning and development, tourism marketing, cultural geography, urban and regional planning. Consultants in local authorities, national and regional tourism boards will also find this to be a fascinating read.
