The Twin Stars
CreateSpace
The ThinkPad notebook computer has been at

the center of the digital revolution that has transformed millions of lives around the world, allowing users to obtain access to their documents, pictures and other personal data from virtually

anywhere at any time. More than 100 million ThinkPads have been sold since they were introduced in 1992, some twenty-five years ago. ThinkPads played a prominent role in NASA's space exploration and at the International Space Station. They accompanied explorers who traversed the entire length of the Nile River and conquered Mount Everest. ThinkPads also played a major role in changing the very architecture of how humanity's knowledge is stored and made available. In this book, Arimasa Naitoh, the father of the ThinkPad, collaborates with American business journalist and author William J. Holstein to write candidly about the incredible

technological and personal struggles he and fellow engineers faced. And he offers his vision of the future of mobile computing—because this revolution is not even close to being finished.

PUBLISHERS WEEKLY:

"An unusually lighthearted apocalyptic tale." Sam Terra is having a bad week. He lost Molly, the woman he secretly loves, when she vanished before his eyes at the exact same time that ten percent of the inhabitants of Earth disappeared. Naturally upset, Sam follows clues about the global vanishing with questionable help from his friends including a misanthropic co-worker

and a childhood pal. When Molly reappears in the body of a man during a night of monster-laden devastation, Sam finally learns the truth. Not just about her, but about the planet Earth and the entire cosmos surrounding it. What we consider mundane reality, others consider a game . . . and not a very good one. The whole thing is about to be shut down.

The price of betrayal is more than thirty pieces of silver. Two days after Jesus Christ's crucifixion, Judas Iscariot receives an

anonymous note stating, I know what you did. Wrapped with it is an eye, complete with trailing optic nerve, and a splintered tooth -trophies ripped from two recently butchered friends. Someone, it seems, knows what Judas did on that fateful night following the Last Supper. And that someone is intent on exacting a bloody and gruesome revenge. As more acquaintances and family members die in increasingly brutal ways, Judas finds himself in a desperate race against time to make amends for his act of treachery, and to uncover the identity of the mysterious hooded killer. A relentlessly paced, gripping thriller, which further explores one of the darkest

bargains in human history. You might just find yourself engaged in the unthinkable: rooting for the man who betrayed Christ.

Beyond Diversity

Piatkus

We are crossing a new frontier in the evolution of computing and entering the era of cognitive systems. The victory of IBM's Watson on the television quiz show Jeopardy! revealed how scientists and engineers at IBM and elsewhere are pushing the boundaries of science and technology to create machines that sense, learn, reason, and interact with people in new ways to provide insight and advice. In *Smart Machines*, John E. Kelly III, director of IBM Research, and Steve Hamm, a writer at IBM

and a former business and technology journalist, introduce the fascinating world of cognitive systems to general audiences and provide a window into the future of computing. Cognitive systems promise to penetrate complexity and assist people and organizations in better decision making. They can help doctors evaluate and treat patients, augment the ways we see, anticipate major weather events, and contribute to smarter urban planning. Kelly and Hamm's comprehensive perspective describes this technology inside and out and explains how it will help us conquer the harnessing and understanding of big data, one of the major computing

challenges facing businesses and governments in the coming decades. Absorbing and impassioned, their book will inspire governments, academics, and the global tech industry to work together to power this exciting wave in innovation.
