This volume appears now finally in English, sixty years after the death of its author, Lucien Tesnière. It has been translated from the French original into German, Spanish, Italian, and Russian, and now at long last into English as well. The volume contains a comprehensive approach to the syntax of natural languages, an approach that is foundational for an entire stream in the modern study of syntax and grammar. This stream is known today as dependency grammar (DG). Drawing examples from dozens of languages, many of which he was proficient in, Tesnière presents insightful analyses of numerous phenomena of syntax. Among the highlights are the concepts of valency and head-initial vs. head-final languages. These concepts are now taken for granted by most modern theories of syntax, even by phrase structure grammars, which represent, in a sense, the opposite sort of approach to syntax from what Tesnière was advocating. Death metal is one of popular music's most extreme variants, and is typically viewed as almost monolithically nihilistic, misogynistic, and reactionary. Studies tend to view the music as a reflection of these listeners' social conditions and are concerned with metal's pleasures so long as these can be seen within that context: as responses to cultural and economic circumstances. Michelle Phillipov's *Death Metal and Music Criticism: Analysis at the Limits*, in contract, offers an account of listening pleasure on its own terms. Through an analysis of death metal's sonic and lyrical extremity, Phillipov shows how violence and aggression can be configured as sites for pleasure and play in death metal music, with little relation to the 'real' lives of listeners. In some cases, gruesome lyrical themes and fractured song forms invite listeners to imagine new experiences of the body and of the self. In others, the speed and complexity of the music foster a 'technical' or distanced appreciation akin to the viewing experiences of graphic horror film fans. These aspects of death metal listening are often neglected by scholarly accounts concerned with evaluating music as either 'progressive' or 'reactionary.' By contextualizing the discussion of death metal via substantial overviews of popular music studies as a field, Phillipov's *Death Metal and Music Criticism* highlights how the premium placed on political engagement in popular music studies not only circumscribes our understanding of the complexity and specificity of death metal, but of other musical styles as well. Exploring death metal at the limits of conventional music criticism helps not only to develop a more nuanced account of death metal listening—it also offers some important starting points for a rethinking of popular music scholarship as a whole.

Why did Italo Calvino decide to translate *Les Fleurs bleues* by Raymond Queneau? Was his translation just a way to pay a tribute to one of his models? This study looks at Calvino's translation from a literary and linguistic perspective: Calvino's *I fiori blu* is more than a rewriting and a creative translation, as it contributed to a revolution in his own literary language and style. Translating Queneau, Calvino discovered a new fictional voice and explored the potentialities of his native tongue, Italian. In fact Calvino's writings show a visible evolution of poetics and style that occurred rather abruptly in the mid 1960s; this sudden change has long been debated. The radical transformation of his style was affected by several factors: Calvino's new interests in linguistics, in translation theory, and in the act of translation. *Translation as Stylistic Evolution* analyses several passages in detail and scrutinizes quantitative data obtained by comparing digital versions of the original and Calvino's translation. The results of such assessment of Calvino's text-consistency suggest clear interpretations of the motives behind Calvino's radical and remarkable change of style that are tied to his notion of creative translation.

The Violence of Modernity turns to Charles Baudelaire, one of the most canonical figures of literary modernism, in order to reclaim an aesthetic legacy for ethical inquiry and historical critique. Works of modern literature are commonly theorized as symptomatic responses to the trauma of history. In a climate that tends to privilege crisis over critique, Debarati Sanyal argues that it is urgent to rethink literary experience in terms that recall its contestatory potential. Examining Baudelaire's poems afresh, she shifts the focus of critical attention toward an account of modernism as an active engagement with violence, specifically the violence of history in nineteenth-century France. Sanyal analyzes a literary current that uses the traditional hallmarks of modernism—irony, intertextuality, self-reflexivity, and formalism—to challenge the historical violence of modernity. Baudelaire and the committed ironists writing in his wake teach us how to read and resist the violence of history, and thereby to challenge the melancholy tenor of our contemporary "wound culture." In a series of provocative readings, Sanyal presents Baudelaire's poetry as an aesthetic form that contests historical violence through rhetorical strategies of complicity, counterviolence, and critique. The book develops a new account of Baudelaire's significance as a modernist by dislodging him both

from his traditional status as a practitioner of "art for art's sake" and from his more recent incarnation as the poet of trauma. Following her extended analysis of Baudelaire's poetry, Sanyal in later chapters considers a number of authors influenced by his strategies—including Rachilde, Virginie Despentes, Albert Camus, and Jean-Paul Sartre—to examine the relevance of their interventions for our current climate of trauma and terror. The result is a study that underscores how Baudelaire's legacy continues to energize literary engagements with the violence of modernity.
