HOOPER CHURCH

100 Years of Cruise Ships in Colour
Fodor's

Peter C. Smith presents us here with the second release in his visually splendid Cruise Ships series. Whilst his first book concerned itself with the large-scale ships currently cruising through our seas (those weighing 40,000 GT and more) this volume focusses on the other end of the market; the ships that weigh in at less than 40,000 GT, but which are often much more stylish and aesthetically pleasing than their larger-scale counterparts. The elegant interiors and luxurious features on display in today's vast fleet of cruise liners remain unrecorded in all but holiday brochures. This book carries on in the tradition of Peter's last release, giving a complete overview of the best of these ships, the cream of the crop, so to speak. Each colour profile includes external and interior views of the featured ship. Details of the design, building and service history of each vessel are provided with vital statistics of the ship and its facilities. This is a book of reference for maritime enthusiasts, would-be holiday cruisers and those who have been passengers. It serves as an impressive visual tribute to the best of the smaller scale fleet currently cruising globally. As seen in the Bedford Times & Citizen.

The stunning elegance and luxurious

interiors of today's vast fleet of cruise liners remains unrecorded in all but holiday brochures. This book gives a complete overview of the cream of these ships, today's queens of the sea. Each liner is illustrated and described with color illustrations of external and interior views. Details of the design, building and service history of each vessel are provided with vital statistics of the ship and its facilities. Among the ships included are Cunard's Queen Victoria and Queen Mary 2, the big new Princess Line liners—Ruby, Grand Sea and Celebrity Eclipse, the two Ocean Village ships and the largest of the P&O liners Ventura, Oceana, Arcadia, Aurora and Artemis. This is a book of reference for maritime enthusiasts, would-be holiday cruisers and those who have been passengers. This collection of seafaring sagas displays how sailors fight their way across vast waters, face unknown dangers, and find the courage to battle forces of nature with amazing fortitude. This collection includes the story of Mike Plant, America's greatest solo sailing racer, as he headed out to sea from New York harbor never to be seen again; the journey of one man on a wooden fishing skiff who faced an early sea ice storm to search desperately for a lost partner; the courageous adventure of Gerry Spiess aboard Yankee Girl, a 10-foot home-built plywood sloop, as he left Long Beach, California, to begin a bold voyage in the smallest craft ever to sail across the Pacific Ocean; and the tragic legend of the men aboard the Edmund Fitzgerald who found themselves in a deadly race against time as a terrible storm deepened. These powerfully retold stories will sweep readers into the world of high seas adventure and desperate survival of outstanding sailors aboard memorable boats.

To Admit Certain Passenger Vessels to the Coastwise Trade Marlor Press

The number of people taking cruises has increased by 30% since 1992. With more than 100 ships in the Western Hemisphere to choose from, only Fodor's annually review every ship, and provide detailed descriptions, maps, and suggested excursions in nearly 60 ports. With easy-to-follow charts, detailed itineraries, and the inside scoop on how NOT to pay too much. The guide contains expanded coverage on which ships are geared towards the disabled, senior citizens and children. It contains a totally rewritten chapter on cruising in South America.

Sale of War-Built Vessels

Cruise ships, the largest moving man-made objects, can be almost a quarter-mile long, as tall as a 25-story building, and can be largely self-contained cities of perhaps 8,000 people. With 172 photographs and illustrations, the cruise ship is examined; its planning, construction, operation, and ultimate fate. This behind-the-scenes look examines the concept, development, and construction of vessels, what makes them work, and how, as well as ship operations. More than 240 ships are highlighted as the cruise ships history is traced from its origins through to its future projections. This book is a great resource for designers, architects, shipbuilders, and the cruise ship passenger. Read it before you board and take it along when you sail.

Proposed Amendments to the Ship Sales Act of 1946

In March 2019, the Viking Sky cruise ship was struck by a bomb cyclone in the North Atlantic. Rocked by 50-foot swells and 40-knot gales, the ship lost power and began to drift straight toward the notoriously dangerous Hustadvika coast

in Norway. This is the suspenseful, harrowing, funny, touching story by one passenger who contemplated death aboard that ship. Chaney Kwak is a travel writer used to all sorts of mishaps on the road, but this is a first even for him: trapped on the battered cruise ship, he stuffs his passport into his underwear just in case his body has to be identified. As the massive cruise ship sways in surging waves, Kwak holds on and watches news of the impending disaster unfold on Twitter, where the cruise ship's nearly 1,400 passengers are showered with "thoughts and prayers." Kwak uses his twenty-seven hours aboard the teetering ship to examine his family history, maritime tragedies, and the failing relationship back on shore with a man he's loved for nearly two decades: the Viking Sky, he realizes, may not be the only sinking ship he needs to escape. The Passenger takes readers for an unforgettable journey from the Norwegian coast to the South China Sea, from post-WWII Korea to pandemic-struck San Francisco. Kwak weaves his personal experience into events spanning decades and continents to explore the serendipity and the relationships that move us--perfect for readers who love to discover the world through the eyes of a perceptive and humorous observer.
