A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world

and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.

Killing Mr. Griffin Bantam

Voted America's Best-Loved Novel in PBS's The Great American Read Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best

novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

A Life with Chronic Illness - Lessons from a Body in Revolt Harper Collins

One secret, one nightmare, one lie. You guess which is which. 1. I have the scar of a gunshot on my forehead. 2. I have willfully misrepresented my identity to the US military. 3. I'm the new mother of a seven-year-old girl. Kellen Adams suffers from a yearlong gap in her memory. A bullet to the brain will cause that. But she's discovering the truth, and what she learns changes her life, her confidence, her very self. She finds herself in the wilderness, on the run, unprepared, her enemies unknown—and she is carrying a priceless burden she must protect at all costs. The consequences of failure would break her. And Kellen Adams does not break. What doesn't kill her...had better

start running.

There are two ways to get away with mass murder. The first, an expensive lawyer. The second, suicide. Robert Derby used the first one. I'm using the second. Mara was celebrating her 21st birthday when her family was killed by a drunk driver. Two years later, Mara wants justice. She wants the drunk driver to understand how it feels to lose everything. She has a plan and a gun and she knows how to use it. But is she capable of murder? Garrett can't help the family he was born into. His name puts a target on his back. Maybe that's why he always dates women who need help. But can helping the wrong person lead to disaster? *She Had to Kill Him* is a gripping story about the things people do for their loved ones. Perfect for fans of Lisa Jewell, Colleen Hoover, and Paula Hawkins.

What Doesn't Kill Her Little, Brown Books for Young Readers

"Should be read by anyone with a body. . . . Relentlessly researched and undeniably smart." —The New York Times Named one of BuzzFeed's "Best Books of 2021" *What Doesn't Kill You* is the riveting account of a

young journalist's awakening to chronic illness, weaving together personal story and reporting to shed light on living with an ailment forever. Tessa Miller was an ambitious twentysomething writer in New York City when, on a random fall day, her stomach began to seize up. At first, she toughed it out through searing pain, taking sick days from work, unable to leave the bathroom or her bed. But when it became undeniable that something was seriously wrong, Miller gave in to family pressure and went to the hospital—beginning a years-long nightmare of procedures, misdiagnoses, and life-threatening infections. Once she was finally correctly diagnosed with Crohn's disease, Miller faced another battle: accepting that she will never get better. Today, an astonishing three in five adults in the United States suffer from a chronic disease—a percentage expected to rise post-Covid. Whether the illness is arthritis, asthma, Crohn's, diabetes, endometriosis, multiple sclerosis, ulcerative colitis, or any other incurable illness, and whether the sufferer is a colleague, a loved one, or you, these diseases have an impact on just about every one of us. Yet there

remains an air of shame and isolation about the topic of chronic sickness. Millions must endure these disorders not only physically but also emotionally, balancing the stress of relationships and work amid the ever-present threat of health complications. Miller segues seamlessly from her dramatic personal experiences into a frank look at the cultural realities (medical, occupational, social) inherent in receiving a lifetime diagnosis. She offers hard-earned wisdom, solidarity, and an ultimately surprising promise of joy for those trying to make sense of it all.

[A Gripping Psychological Thriller](#) Crossroad Publishing Company
Honored as a "Best Poetry Book of the Year" by Publishers Weekly "The book's a little crazy, packed with air quotes and brackets, jokes and condemnations, forms that explode across the page. Crazy enough, it's also packed with truth."—NPR
"The voice of this third book from Bibbins is marked and numbed by the onslaught of American media and politics that saturate the Internet, television, radio, and smartphone: 'the way things are going, children/ will have to upgrade to more

amusing.' Much like advertisements or news stories vying for viewer's attention, the book intentionally overwhelms, eschewing sections; the author instead differentiates the poems by repetition, creating a sort of echo chamber, similar to the way viral information cycles through social media platforms."—Publishers Weekly, starred review "[A] hilarious send-up of contemporary values and an alarm bell of sorts, directing attention to all that is so sinister in our civilization."—American Poets "Whip-smart and wickedly funny, *They Don't Kill You* is Bibbins's most authoritative and self-possessed collection to date."—Boston Review The poems in Mark Bibbins's breakthrough third book are formally innovative and socially alert. Roving across the weird human landscape of modern politics, media-exacerbated absurdity, and questionable social conventions, this collection counters dread with wit, chaos with clarity, and reminds us that suffering is "small//compared to what?" Mark Bibbins teaches in the graduate writing programs at The New School and Columbia University, and edits the poetry section of *The Awl*. He lives in New York City.

Fahrenheit 451 Copper Canyon Press
Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new *Suggestions for Further Reading* by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Don't Kill the Messenger Crossroad Press
From the cofounder of VerySmartBrothas.com, and one of the most read writers on race and culture at work today, a provocative and humorous memoir-in-essays that explores the ever-shifting definitions of what it means to be Black (and male) in America For Damon

Young, existing while Black is an extreme sport. The act of possessing black skin while searching for space to breathe in America is enough to induce a ceaseless state of angst where questions such as "How should I react here, as a professional black person?" and "Will this white person's potato salad kill me?" are forever relevant. *What Doesn't Kill You Makes You Blacker* chronicles Young's efforts to survive while battling and making sense of the various neuroses his country has given him. It's a condition that's sometimes stretched to absurd limits, provoking the angst that made him question if he was any good at the "being straight" thing, as if his sexual orientation was something he could practice and get better at, like a crossover dribble move or knitting; creating the farce where, as a teen, he wished for a white person to call him a racial slur just so he could fight him and have a great story about it; and generating the surreality of watching gentrification transform his Pittsburgh neighborhood from predominantly Black to "Portlandia . . . but with Pierogies." And, at its most devastating, it provides him reason to believe that his mother would be

alive today if she were white. From one of our most respected cultural observers, *What Doesn't Kill You Makes You Blacker* is a hilarious and honest debut that is both a celebration of the idiosyncrasies and distinctions of Blackness and a critique of white supremacy and how we define masculinity.

The Forever Decision : for Those Thinking about Suicide and for Those who Know, Love, Or Counsel Them Henry Holt and Company

A historic literary event: the publication of a newly discovered novel, the earliest known work from Harper Lee, the beloved, bestselling author of the Pulitzer Prize-

winning classic, *To Kill a Mockingbird*. Originally written in the mid-1950s, *Go Set a Watchman* was the novel Harper Lee first submitted to her publishers before *To Kill a Mockingbird*. Assumed to have been lost, the manuscript was discovered in late 2014. *Go Set a Watchman* features many of the characters from *To Kill a Mockingbird* some twenty years later. Returning home to Maycomb to visit her father, Jean Louise Finch—Scout—struggles with issues both personal and political, involving Atticus, society, and the small Alabama town that shaped her. Exploring how the characters from *To Kill a Mockingbird* are adjusting to the turbulent events transforming mid-1950s America, *Go Set a Watchman* casts a fascinating new light on Harper Lee's enduring classic. Moving, funny and compelling, it stands as a magnificent novel in its own right.

What Doesn't Kill Us, a New York Times bestseller, traces our evolutionary journey back to a time when survival depended on how well we adapted to the environment around us. Our ancestors crossed deserts, mountains, and oceans without even a whisper of what anyone today might consider modern technology. Those feats of endurance now seem impossible in an age where we take comfort for granted. But what if we could regain some of our lost evolutionary strength by simulating the environmental conditions of our ancestors? Investigative journalist and anthropologist Scott Carney takes up the challenge to find out: Can we hack our bodies and use the environment to stimulate our inner biology? Helping him in his search for the answers is Dutch fitness guru Wim Hof, whose ability to control his

body temperature in extreme cold has sparked a whirlwind of scientific study. Carney also enlists input from an Army scientist, a world-famous surfer, the founders of an obstacle course race movement, and ordinary people who have documented how they have cured autoimmune diseases, lost weight, and reversed diabetes. In the process, he chronicles his own transformational journey as he pushes his body and mind to the edge of endurance, a quest that culminates in a record-bending, 28-hour climb to the snowy peak of Mt. Kilimanjaro wearing nothing but a pair of running shorts and sneakers. An ambitious blend of investigative reporting and participatory journalism, *What Doesn't Kill Us* explores the true connection between the mind and the body and reveals the science that allows us to push past our perceived limitations.
