ONLY THE WORTHY PASS THE HARVEST Ever since WWII

devastated the surface of the Earth, emotions have been strictly forbidden. Childhood friends, Eve and Hana, have grown up in an underground compound, their emotional control monitored at all times. But the harvest is approaching . . . In two days, the low-ranked students will be culled and the worthy assigned to their permanent positions in society. Eve is a high-ranked student, but harbours secret concerns about her brother leaving—feelings that she must conceal from her monitor if she wishes to succeed. Hana has always struggled to control her emotions, and she fears that this harvest will be her last. Both know there's no place for friendship when they're competing for their lives. The harvest is coming, and only the worthy will remain.

Stage Manager: The Professional Experience—Refreshed takes the reader on a journey through all aspects of the craft of stage management in theatre, including the technological advancements that have come to theatre and the stage manager's job. Chapters are laid out to reflect the order in which stage managers experience and perform their work: what makes a good stage manager, seeking the job, building a resume, interviewing for the job, and getting the job (or not getting the job). Included are chapters on the chain of command, working relationships, tool and supplies, creating charts, plots, plans and lists, the rehearsal period, creating the prompt book, calling cues, and the run of the show. These are just some of the many topics covered in this book. In addition, the author uses interviews with stage management professionals in various stages of production, providing another view of how the stage manager is perceived and what is expected from the work of the stage manager.

Fifteen years after the original publication of Stage Manager: The Professional Experience, this new and refreshed edition is now in color to help clarify and illustrate points in the text. It is fully updated to reflect the the world of computerized technology: smart phones, thinly designed laptops, tablets, use of email and text messaging, storing and sharing files and information in cloud-based apps. Then there are the innovations of automation—electronically moving scenery, scenic projections—casting images and patterns on the stage; moving lights; LED luminaires; lasers; and greater use of fog and haze machines.? In addition, the extensive glossary of more than 600 terms and phrases had been extend to well over 700, providing and excellent professional vocabulary for anyone hoping to be a theatre stage manager or already working in the field.

School buses that have been converted into mobile living spaces — known as skoolies — are a natural extension of the tiny house craze. Buses are not only easier and safer to drive than an RV, they provide a jump-start on the conversion process with frame, roof, and floor already in place. Experienced builder Will Sutherland, whose creative school bus conversions have been featured in Road and Track and Popular Mechanics, is behind the

wheel of this alluring look at life on the road. In addition to profiles of eight fellow skoolie fans and stunning photos of bus interiors designed for simple living, Skoolie! does what no other book on the subject has — it offers a complete, step-by-step guide to the conversion process, from seat removal to planning layout and installing insulation, flooring, and furnishings that meet your needs.

The Technical Brief is a collection of single-focus articles on technical production solutions, published three times a year by the prestigious Yale School of Drama. The primary objective of the publication is to share creative solutions to technical problems so that fellow theatre technicians can avoid having to reinvent the wheel with each new challenge. The range of topics includes scenery, props, painting, electrics, sound, and costumes. The articles each describe an approach, device, or technique that has been tested on stage or in a shop by students and professionals. Some articles included: Growing Flowers on Stage; Break-Away Glass; Photo-Murals for the Stage; Quiet Wire-Rope Curtain Track; Free Standing Curved Stairs; A Measured Approach to Kerfing; A Low-Voltage Remote Controller for Special Effects; Toggle-Clamp Locks; Comparing Four Plastics as Scenery Glides; Low Pressure Air Casters; A Simple Lift Jack; Using a Piano to Create a Reverberation Effect; Horn-Hat Mics for Sound Reinforcement

In 1971, Francis L. Brannigan created Building Construction for the Fire Service, a groundbreaking resource offering the most comprehensive knowledge of building construction available to

fire fighters. With his dedication to fire fighter safety and saving lives, the legacy of Frank Brannigan continues with the sixth edition of Brannigan's Building Construction for the Fire Service. The Sixth Edition meets and exceeds the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) course objectives and outcomes for the Associate's Core-Level course called Building Construction for Fire Protection (C0275). Brannigan's Building Construction for the Fire Service, Sixth Edition is an integral resource for fire officers, instructors, those studying for promotion, individuals taking civil service examinations, fire science students, and both current and prospective fire fighters. It is part of an integrated teaching and learning system that combines dynamic features and content to support instructors and to help prepare students for their career in firefighting. This new edition features: Chapter 7 Non-Fire Building Systems (new) describes several categories of non-fire systems in buildings, including electrical systems, plumbing systems, conveyances, refrigeration systems, and Ventilation (HVAC) systems, in addition to the hazards the systems pose for fire fighters. New or expanded content on: Aluminum-clad polyethylene panels Scaffolding Cranes and their use Modular construction using stacked shipping containers Light-weight wood-frame construction Fire escapes and stair design Cross-laminated timber and heavy timber construction Methods of protecting steel against fire New "green" materials and methods such as hempcrete and biofilters Structural wall framing systems with insulated studs Air-supported structures for sporting events Massive single-structure lightweight wood frame apartment buildings Firefighting recommendations in lightweight wood frame residential buildings Building construction and its relationship to flow path Historical perspective on fire resistance testing and its shortcomings Roofing material tests Safety issues of post-fire investigation of significantly damaged/collapsed buildings Scenario-Based Learning. Case Studies are found at the beginning and end of each chapter to encourage and foster critical-thinking skills. Tactical Considerations. This feature offers suggestions for firefighting, safety concerns, and related additional material for application on the fireground. Wrap-Up. Chapter Summaries, Key Terms, Challenging Questions, and Suggesting Readings promote comprehension and mastery of course objectives and outcomes.
