A girl retells the story of the legendary female warrior she admires, who long ago fought bravely to protect her people. Hua Mulan learned to ride horses and fight with a spear from her father. When her people were under attack, the army needed more men. To spare her ailing father, Mulan disguised herself as a man and rode off to war. Mulan's bravery and skills won her wide acclaim, but her true identity was never revealed. When the war ended, Mulan returned home to find her family safe and happy.

Trimming, piercing, slicing, snipping: just a few of the many words that relate to the idea of cutting. In this volume Jean-Charles Trebbi explores the traditional techniques of paper cutting, before examining current manifestations of this art form, including the contemporary materials and technologies it uses and the types of artistic expression it offers. The Art of Cutting is a collection of artworks that have been created using a variety of cutting techniques. The author explores traditional techniques

that are still very much alive worldwide, and he analyses the current aspects of the art of cutting, in which different materials and technologies lead to new forms of artistic expression. This book presents a selection of artists who revisit and work with traditional techniques, as well as those who adopt contemporary approaches. From paper to ceramics, food design and architecture, *The Art of Cutting* offers a stunning and diverse universe that is waiting to be discovered. AUTHOR: Born in Paris, Charles Trebbi is an urban architect, designer, artist and writer. A Renaissance man who specialises in the infinite possibilities of folding, cutting and assembling using paper, cardboard, textiles and even wood and metal, he creates his own art books, which are often inspired often by urban spaces and architecture, and produces completely original structures with pop-up and cutting techniques.

The work reviews issues concerning the protection of folklore through the intellectual property legal system, then explores two main issues in the protection of Chinese folklore. The first issue is the influence of Chinese traditional culture on the Chinese intellectual property legal system and Chinese society. The second concerns the deficiencies of the Chinese intellectual property system with regard to folklore. Both issues are examined through a survey on the weak public recognition of intellectual property law and folklore in Chinese society. The book also reveals the practical issues that have arisen in Southwest China through case studies. After analysing these issues, the work designs a model law specifically for folklore and also provides suggestions for how the current intellectual property

legal system could establish a comprehensive legal protection system for folklore. Furthermore, the work shows that its proposed model law is effective in practice by resolving the issues in the case studies presented.
