China, the European Union and Global  
Governance examines the key  
determinants of European and Chinese  
approaches to the restructuring of global  
governance systems. Using a  
multidisciplinary method, this collection  
of chapters analyses four distinct fields  
that are key for both China and the EU

and in the development of their relations  
and future cooperation: the global  
trading system, the international  
monetary system, climate and energy  
policy and international security. In the  
context of China's growing role in global  
governance and of EU-China  
cooperation, these contributions  
emphasize strategies, prospects and  
objectives of both actors. They outline  
possible avenues for an enhanced  
partnership in light of the changing  
global order, which implies a rethinking  
of the existing multilateral structures.  
This interdisciplinary study will appeal to

researchers and scholars interested in global governance, European foreign policy, Chinese foreign policy, EU\_China relations, as well as trade, the international economy and climate change policies. Postgraduate students in international relations, international political economy, European studies and Chinese studies, as well as policymakers in the areas of external relations and EU\_China relations, will also find much to interest them in this book.

This book uses the theme of 'debatable

lands', to explore aspects of writing in the Romantic period. Walter Scott brought it to a wider public, and the phrase came to be applied to debates which were intellectual, political or artistic. These debates are pursued in a collection of essays grouped under the headings such as 'Britain and Ireland'. Barricades and Borders Oxford University Press, USA

This is a comprehensive survey of European history from the coup d'etat of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo, which led to the First World War. It concentrates on the twin themes of revolution and nationalism, which often combined in the early part of the century but which increasingly became rival creeds. Going beyond traditional

political and diplomatic history, the book incorporates the results of recent research on population movements, the expansion of markets, the accumulation of capital, social mobility, education, changing patterns of leisure, religious practices, and intellectual and artistic developments. The work falls into three chronological sections. The first, starting in 1800 (rather than the more usual 1815) follows the build-up of the revolutionary currents which were eventually going to erupt in the Year of Revolutions' 1848. The second, from 1850 to 1880, deals with the golden age of capitalism, the successful culmination of struggles for national unification, and the threat of anarchism.

This volume analyses and compares different forms of nationalism across a range of European countries and regions during the long nineteenth century. It aims to put detailed studies of nationalist politics and thought, which have proliferated over the last ten years or so, into a wider European context. By means of such contextualization, together with new and systematic comparisons, *What is a Nation? Europe 1789-1914* reassesses the arguments put forward in the principal works on nationalism as a whole, many of which pre-date the proliferation of case studies in the 1990s and which, as a consequence, make only inadequate reference to the national histories of European states. The study reconsiders

whether the distinction between civic and ethnic identities and politics in Europe has been overstated and whether it needs to be replaced altogether by a new set of concepts or types. *What is a Nation?* explores the relationship between this and other typologies, relating them to complex processes of industrialization, increasing state intervention, secularization, democratization and urbanization. Debates about citizenship, political economy, liberal institutions, socialism, empire, changes in the states system, Darwinism, high and popular culture, Romanticism and Christianity all affected - and were affected by - discussion of nationhood and nationalist politics. The volume investigates the significance of such controversies and institutional

changes for the history of modern nationalism, as it was defined in diverse European countries and regions during the long nineteenth century. By placing particular nineteenth-century nationalist movements and nation-building in a broader comparative context, prominent historians of particular European states give an original and authoritative reassessment, designed to appeal to students and academic readers alike, of one of the most contentious topics of the modern period.

FOR MOST people Bismarck is the man of "blood and iron"; he coined the phrase himself and he lived up to it. But he was much more; he had an intellectual ascendancy over all the

politicians of his day, and his superiority was acknowledged not only by his own people, but by all European statesmen. The unification of Germany, the defeat of Austria, the fall of the Second Empire, the defeat of France, the alliance of the German Empire and the Habsburg Monarchy, the dismemberment of Denmark—these are his most obvious achievements; no less important was the transformation in the national consciousness of the German people, for which Bismarck was also responsible. Dr. Eyck has analyzed not only the personality but also the accomplishments of a statesman whose influence on Europe in the latter half of the nineteenth century was more far-reaching than that of any other man in his time.-Print ed. "Authoritative,

illuminating and easy to read....Dr. Eyck, in his excellent book, has exposed the many fallacies of which Bismarck legend is compounded. His analysis is tragic and austere.”—The Observer

This brief narrative survey of political thought over the past two millennia explores key ideas that have shaped Western political traditions. Beginning with the Ancient Greeks' classical

emphasis on politics as an independent sphere of activity, the book goes on to consider the medieval and early modern Christian views of politics and its central role in providing spiritual leadership. Concluding with a discussion of present-day political thought, W. M. Spellman explores the return to the ancient understanding of political life as a more autonomous sphere, and one that doesn't relate to anything beyond the physical world. Setting the work of major and lesser-known political philosophers within its historical context, the book offers a balanced and considered overview of the topic, taking into account the religious values, inherited ideas and social settings of the writers. Assuming no prior knowledge and written in a highly accessible style, A

This fascinating book examines how the past pervades French public life, how the French both commemorate their past triumphs, heroes, and martyrs and attempt to erase the more violent events in their history. The book surveys the ways that various political communities in France during the past two centuries have manufactured different versions of the past in order to define their identities and legitimate their goals. Beginning with a discussion of the bicentenary of the French Revolution in 1989, Robert Gildea moves backward in time to show how rival factions have used various elements of French political culture--

from the grandeur of the ancien régime to Catholicism, Jacobinism, Anarchism, and Bonapartism--to further their ends. Gildea shows how proponents of revolution and counterrevolution, church and state, centralism and regionalism, and national identity and nationalism campaigned to achieve the widest possible acceptance of their own view of the past. He describes the continuing battle between Left and Right for association with national heroes such as Joan of Arc and Napoleon. He exposes the reworking of collective views of the past by political communities, in order to increase or recover political legitimacy. Written in clear and trenchant prose, the book offers a new perspective on French history and political culture.
