Study Guide to Accompany Krugman/Obstfeld International Economics, Theory and Policy, Fourth Edition Cambridge University Press
Essay from the year 2006 in the subject Economics - International

Economic Relations, grade: 1,3, University of Leipzig, 5 entries in the bibliography, language: English, abstract: Films can be seen as cultural products. To understand international trade of these cultural products it is necessary to reveal how industries and markets operate and evolve, furthermore analyzing the influence of industry structure, government policies and global economic conditions. International trade allows expanding markets to become certainly larger than the domestic one, as a result the consumer has the possibility to choose within a greater variety of goods and to take advantage from lower prices. Films are part of each culture. But still, films are products, first of all produced and

sold in intention to make profits. What are films? Why do we speak from US Cultural imperialism? What can be regarded as cultural diversity? Which debates and agreements should be focused on when analyzing international trade of films? And finally, why do the U.S. dominate that industry? Which economic factors play a major role in this case? How sustainable is the U.S.? That sounds interesting? These and more questions will be answered within that economic essay.

 Excerpt: Paul Robin Krugman (; born February 28, 1953) is an American economist, professor of Economics and International Affairs at the Woodrow Wilson School of Public and International Affairs at Princeton University, Centenary Professor at the London School of Economics, and an op-ed columnist for The New York Times. In 2008, Krugman won the Nobel Memorial Prize in Economics for his contributions to New Trade Theory and New Economic Geography. According to the Nobel Prize Committee, the prize was given for Krugman's work explaining the patterns of international trade and the geographic concentration of wealth, by examining the impact of economies of scale and of consumer preferences for diverse goods and services. Krugman is known in academia for his work on international economics (including trade theory, economic geography, and international finance), liquidity traps and currency crises. According to the IDEAS/RePEc rankings, he is the 15th most widely cited economist in the world today. As of 2008, Krugman has written 20 books and has published over 200 scholarly articles in professional journals and edited volumes. He has also written more than 750 columns

dealing with current economic and political issues for The New York Times. Krugman's International Economics: Theory and Policy, co-authored with Maurice Obstfeld, is a standard college textbook on international economics. He also writes on political and economic topics for the general public, as well as on topics ranging from income distribution to international...

Presents a new research program that is transforming the study of international trade. Until a few years ago, models of international trade did not recognize the heterogeneity of firms and exporters, and could not provide good explanations of international production networks. Now such models exist and are explored in this volume.
