 "Mr. Doherty has produced an invaluable reference volume for everyone involved in disaster response/disaster preparedness field. It represents the ultimate A-to-Z 'How to Do It' manual in this difficult, complicated field.--John G. Jones, Ph.D.
Rorke's Drift and Isandlwana Springer
 '...it should be made standard reading for those dealing with disaster/survival situations, it is also very informative in helping the general reader understand the psychology of survivors...The text makes compulsive reading and the book is hard to put down. It is worth examining, no matter where your professional interest lies.'- Duncan MacPaul, Nursing Times. Why do so many people die without need? How can an exceptional few survive extraordinarily harsh conditions sometimes after months or years of deprivation? Recent years have seen remarkable improvements in survival training and technology, yet most people still perish quickly in the face of adversity. In this book John Leach seeks to answer these questions by considering the psychology of human survival; how groups and individuals behave before, during and after life threatening events. Both short and long-term survival are addressed as well as the psychological consequences of hunger, thirst, cold, heat, crowding, isolation, fatigue and sleep deprivation. The essence of this work is distilled into a set of principles for psychological first-aid for use in the field.

 NEW! Goats are wonderful creatures; enigmatic, paradoxical, mischievous, inquisitive and fun. They appear robust in health but can quickly become dangerously ill and lose the will to live if not treated promptly and correctly. This eBook provides homeopathic treatment information for most conditions likely to be met, whether on a farm, a smallholding or a single-goat household.
Aide-mémoire to the Military Sciences Soffer Publishing

Oxford Dictionary of English Routledge
 Essentials of Sea Survival contains original scientific research and investigations from two internationally recognized experts on cold-water survival. In addition to having practical personal experience with cold water immersion, Frank Golden and Michael Tipton regularly lecture at various international conferences about water survival, and they are frequently called on for expert commentary on television and radio. The majority of books on this subject are personal survival accounts; few relate to scientific

studies. This book is different: Using reader-friendly language, two leading environmental physiologists present the facts and dispel the myths of surviving a sea accident. The book, thanks to the real-life stories and easy-to-read format, will appeal primarily to the layperson who works or plays on or near the water. The text will also be of interest to an academic audience, who will appreciate the original research and up-to-date physiological and medical information Essentials of Sea Survival is a compelling, informative, and comprehensive guide to open-water survival. Drawing from classic maritime disasters and personal accounts of near-miraculous survival, as well as carefully controlled laboratory experiments, it offers practical advice for avoiding as well as surviving a cold-water accident. It's an important reference for anyone associated with open-air aquatic activities, such as members of the Coast Guard, Navy, and Marines; offshore oil rig employees; fishermen; divers; amateur and professional sailors; water safety instructors and life guards; water rescue personnel; boaters; water skiers; outdoor survival course instructors; and other recreational water sports enthusiasts.
Homeopathic First Aid for Domestic Fowl: Accidents, Emergencies and Common Ailments Springer Publishing Company
 There is controversy as to whether psychological interventions in the aftermath of disaster are helpful or not. This book addresses these controversies and describes the responses that psychologists have made in different parts of the world to disaster.
Questions and Answers for Dental Nurses Lulu Press, Inc
 The story of Isandlwana, the battle that shocked the British empire at its zenith, and Rorke's Drift, which immediately followed it and went some way to restoring wounded British pride: how they were fought, how they have been remembered, and what they mean for us today.
A Journal of Hope and Healing (Vol. II, No. 1) Loving Healing Press
 This quarterly journal explores the themes of recovery and healing through poetry, memoir, essays, fiction, humor, media reviews, and psycho-education. Areas of concern include aging, disabilities, health, abuse recovery, trauma/PTSD, anxiety, and depression.
Cumulated Index Medicus Lulu Press, Inc
 NEW! An eBook providing extensive information about the treatment of donkeys for common ailments, accidents and emergencies. Donkeys are all-too-often treated as small horses or ponies or as 'weak sisters' to horses. They are not. The donkey is a species of its own and deserves special consideration appropriate to its needs.
Report Lulu Press, Inc

STOMATOLOGIE ANGLIÉTINA PRO ZUBNÍ PRAXI UĚEBNICE A CVIĚBNICE Oxford University Press
 Presented work is a textbook and exercise book of medical English in the branch of stomatology and at the same time a reading book of professional texts taken from the newest original sources. The material can be used by dentists and dental hygienists who encounter English-speaking clients in their surgeries. Professionals and students who are going to work or study in English-speaking countries as well as teachers of medical English at high schools and universities will find this book a useful aid for theoretical subjects and a valuable manual for everyday practice. All exercises contain correct answers, and the keys can also be used by students whose native language is English. The topics covered are preventive and community dental practice; history taking and examination; dental radiology; psychological aspects of dental care; paediatric dentistry; general medicine of relevance to dentistry; emergencies in dental practice; analgesia, sedation, and general anaesthesia; oral medicine; oral and maxillofacial surgery; periodontology; restorative dentistry; operative dentistry; minor oral surgery; orthodontics; removable prosthodontics; dental materials and conservation instruments. The author wishes a lot of success to all motivated and hard-working students.

I love my World John Wiley & Sons
 NEW! Priced with sensitivity to the level of altruism shown by those who rescue and help sick or injured wild creatures, this eBook covers the major conditions one is likely to encounter.

Whether it is a fledgling bird fallen from a nest, a swift or pigeon exhausted from flight, an animal injured at the roadside, a victim of a bungled shooting or any other emergency situation, this eBook should provide the 'good Samaritan' with the medical know-how to make a positive difference and increase the chances of the victim's survival. Christopher Day has 43 years of experience in veterinary practice and his childhood also encompassed such wildlife rescue work.

Journal of The Institution of Mining Engineers Lulu.com

This is much more than just a 'first-aid' book. It details many common diseases and problems that a horse is likely to encounter, with suggested homeopathic treatments, gleaned from Christopher Day's 43 years of experience in equine homeopathy and holistic medicine. There are no fewer than 75 homeopathic medicines described. Almost 300 pages of practical help and guidance.

Peace Journalism explains how most coverage of conflict unwittingly fuels further violence, and proposes workable options to give peace a chance.

The Photographic Journal Springer

NEW! Probably the most comprehensive guide to the homeopathic treatment of birds that is currently available, this eBook is a first-aid guide to the treatment of accidents, emergencies and common ailments in domestic fowl (poultry). All species respond well to homeopathy and birds are no exception. However, little has hitherto been written about their homeopathic treatment. Homeopathy sits well with organic enterprises, in which the residues of conventional drugs are discouraged where compatible with animal welfare. All species are covered, including chickens (cockerels and hens), geese, ducks, turkeys, guinea fowl, pheasants, partridge, quail, bantams, peafowl, budgerigars, canaries, birds of prey (raptors), doves, racing pigeons and carrier pigeons.

The IOC Manual of Sports Injuries Hawthorn Press

A guide for parents, outdoor educators, play rangers, forest school leaders and teachers, 'I Love My World' is full of practical

ideas which can be used to rekindle the naturally playful spirit and develop a deep connection with nature from an early age.

The Mining Engineer Human Kinetics

Comprehensive insight into the offshore oil and gas industry for those intending to choose it as a career Full syllabus coverage for OPITO BOSIET, FOET, MIST and IMIST courses Produced in full colour with over 180 images Basic Offshore Safety covers everything that newcomers to the offshore oil and gas industry need to know prior to travelling offshore or when attending OPITO's Basic Offshore Safety Induction and Emergency Training (BOSIET), Minimum Industry Safety Training (MIST), Further Offshore Emergency Training (FOET) and International MIST courses. Primarily focused on the oil industry, this book introduces readers to the key safety topics in the offshore support vessel industry and common to the renewable industry. Written in easy to follow steps and including references to both the legislation and guidance where relevant, Abdul Khaliq walks the reader through the hazards they are likely to encounter when travelling to, from or working offshore, showing how to minimise risks and deal with any issues that may arise at any stage of the work.
