Cultivating Charismatic Power SteinerBooks

Islam and China are topics of relevance and contention in today's economic, political and religious climate. In this work, Tiffany Cone makes an important contribution to these contemporary discourses through an ethnographic case study of Islamic leadership and the cultivation of charismatic power by Sufi disciples at a shrine site in Northwest China. Though this volume focuses on a specific religious community, it carries valuable insights into religious unity, syncretism and religious legitimacy, materialism and religious integrity, and the stability of religious institutions in light of rapid economic growth. *Cultivating Charismatic Power* speaks to global concerns about the rise of a militant Islam and an increasingly aggressive Chinese State. As such, it will appeal to scholars and practitioners across a range of fields including anthropology, philosophy, religious studies, Islamic Studies, and Chinese Studies.

A New View of Women's Sexual Problems Catapult

The pioneering debut novel by one of Turkey's most radical female authors tells the story of an aspiring intellectual in a complex, modernizing country. In English at last: the first novel by a Turkish woman to ever be nominated for the Nobel. *A Strange Woman* is the story of Nermin, a young woman and aspiring poet growing up in Istanbul. Nermin frequents coffeehouses and underground readings, determined to immerse herself in the creative, anarchist youth culture of Turkey's capital; however, she is regularly thwarted by her complicated relationship to her parents, members of the old guard who are wary of Nermin's turn toward secularism. In four parts, *A Strange Woman* narrates the past and present of a Turkish family through the viewpoints of the main characters involved. This rebellious, avant-garde novel tackles sexuality, the unconscious, and psychoanalysis, all through the lens of modernizing 20th-century Turkey. *Deep Vellum* brings this long-awaited translation of the debut novel by a trailblazing feminist voice to US readers.

'Regenerative Medicine' is an innovative concept representing a unique approach to the regeneration of functional tissues and organs. This book reveals the scientific principles behind this newly discovered practice while instructing the reader in the procedure of Moist-Exposed Burns Treatment (MEBT) and offering compelling examples of tissue and organ regeneration from ordinary cells incubated in potent nutrient baths. Prof. Xu - the inventor of MEBT and MEBO (Moist-Exposed Burns Ointment) - gives an in-depth description of how healthy and pathological tissues behave in varied treatment environments. Further, he demonstrates that ordinary cells can differentiate into varied organ tissues and, for the first time, introduces MEBT including the use of MEBO to the western scientific community. This publication will add a new dimension to the discussions on burns treatment, stem cells, immunology and cell biology. Burns specialists will learn of the new gold standard in burns treatment, and cell biologists of the potential of ordinary cells.

An occult classic and a Dion Fortune bestseller of strongly growing interest. Fortune was one of the first to bring this "secret tradition" to a wider audience with her clear and comprehensive exploration of the Qabalah tradition. The Mystical Qabalah remains a classic in its clarity, linking the broad elements of Jewish traditional thought—probably going back to the Babylonian captivity and beyond—with both Eastern and Western philosophy and later Christian insights. The Qabalah could be described as a confidential Judaic explanation of the paradox of "the Many and the One"—the complexity and diversity within a monotheistic unity. Whereas the Old Testament outlines the social and psychological development of a tightly knit "chosen group" culture, the supplementary Qabalah provides a detailed plan of the infrastructure behind the creative evolutionary process. The Mystical Qabalah devotes a chapter to each of the ten schematic "God-names," the qualities or Sephiroth which focus on the principal archetypes behind evolving human activity: the Spiritual Source; the principles of Force and Form; Love and Justice; the Integrative principle or the Christ Force; Aesthetics and Logic; the dynamics of the Psyche; and, finally, the Manifestation of life on Earth in a physical body.

Current Debates in Public Relation, Cultural & Media Studies Simon and Schuster

A Publishers Weekly Best Book of 2018 "Brilliant, necessary reading on the ways we talk—and, more importantly, don't talk—about rape and rape culture." —HelloGiggles "What We Talk About When We Talk About Rape is brilliant, frank, empowering, and urgently necessary. Sohaila Abdulali has created a powerful tool for examining rape culture and language on the individual, societal, and global level that everyone can benefit from reading." —Jill Soloway In the tradition of Rebecca Solnit, a beautifully written, deeply intelligent, searingly honest—and ultimately hopeful—examination of sexual assault and the global discourse on rape told through the perspective of a survivor, writer, counselor, and activist After surviving gang-rape at seventeen in Mumbai, Sohaila Abdulali was indignant about the deafening silence that followed and wrote a fiery piece about the perception of rape—and rape victims—for a women's magazine. Thirty years later, with no notice, her article reappeared and went viral in the wake of the 2012 fatal gang-rape in New Delhi, prompting her to write a New York Times op-ed about healing from rape that was widely circulated. Now, Abdulali has written What We Talk About When We Talk About Rape—a thoughtful, generous, unflinching look at rape and rape culture. Drawing on her own experience, her work with hundreds of survivors as the head of a rape crisis center in Boston, and three decades of grappling with rape as a feminist intellectual and writer, Abdulali tackles some of our thorniest questions about rape, articulating the confounding way we account for who gets raped and why—and asking how we want to raise the next generation. In interviews with survivors from around the world we hear moving personal accounts of hard-earned strength, humor, and wisdom that collectively tell the larger story of what rape means and how healing can occur. Abdulali also points to the questions we don't talk about: Is rape always a life-defining event? Is one rape worse than another? Is a world without rape possible? What We Talk About When We Talk About Rape is a book for this #MeToo and #TimesUp age that will stay with readers—men and women alike—for a long, long time.

Chanel Solitaire City Lights Books

An "enormously informative and entertaining" history of Western sex law which covers cases from ancient times to the 19th century (Boston Globe) The "raging frenzy" of the sex drive, to use Plato's phrase, has always defied control. However, that's not to say that the Sumerians, Victorians, and every civilization in between and beyond have not tried, wielding their most formidable weapon: the law. At any given point in time, some forms of sex were condoned while others were punished mercilessly. Jump forward or backward a century or two (and often far less than that), and the harmless fun of one time period becomes the gravest crime in another. Sex and Punishment tells the story of the struggle throughout the millennia to regulate the most powerful engine of human behavior. Writer and lawyer Eric Berkowitz uses flesh-and-blood cases—much flesh and even more blood—to evoke the entire sweep of Western sex law, from the savage impalement of an ancient Mesopotamian adulteress to the imprisonment of Oscar Wilde in 1895 for "gross indecency." The cast of Sex and Punishment is as varied as the forms taken by human desire itself: royal mistresses, gay charioteers, medieval transvestites, lonely goat-lovers, prostitutes of all stripes, London rent boys. Each of them had forbidden sex, and each was judged—and justice, as Berkowitz shows, rarely had much to do with it. With the light touch of a natural storyteller, Berkowitz spins these tales and more, going behind closed doors to reveal the essential history of human desire.

Practical Aspects of Rape Investigation Harper Collins

The prevailing attitude in modern medicine is that illness should not exist. Consequently, millions of research dollars pour each year into medical science and technology in the hope of eradicating various sicknesses and diseases. Patients and doctors alike suffer the terrible consequences of this impossible quest for material perfection. Yet, there is an alternate view—that human beings and human evolution are great enough to include "illness" as an essential part of existence. In the first part of *Blessed by Illness*, the author traces the history of our changing concept of healing, from the so-called temple sleep of ancient Egypt—when spiritual science tells us that human beings still had a living connection with the spiritual hierarchies—through the herbal lore of ancient Greece and the healings of Christ, to the rise of modern medicine, based primarily on treating symptoms. The practice of modern medicine focuses merely on removing discernable symptoms and ailments. The author, however, asserts that this does not really heal at all. Rather, true healing considers the whole human being. And, to do this, doctors must learn the language of our natural, healing life forces, which affect not only the body, but also nature and the greater cosmos. From this perspective, illness is actually a gift, a blessing that urges both patient and doctor to work together with our illnesses for the sake of something infinitely greater—true healing. *Blessed by Illness* is a powerful introduction to "alternative" methods of healing.
