Emile is a treatise on the nature of education and on the nature of man written by Jean-Jacques Rousseau, who considered it to be the "best and most important of all my writings". Due to a section of the book entitled "Profession of Faith of the Savoyard Vicar," Emile was banned in Paris and Geneva and was publicly burned in 1762, the year of its first publication. During the French

Revolution, Emile served as the inspiration for what became a new national system of education. The work tackles fundamental political and philosophical questions about the relationship between the individual and society— how, in particular, the individual might retain what Rousseau saw as innate human goodness while remaining part of a corrupting collectivity. Its opening sentence: "Everything is good as it leaves the hands of the Author of things; everything degenerates in the hands of man." Rousseau seeks to describe a system of education that would enable the natural man he identifies in *The Social Contract* to survive corrupt society He employs the novelistic device of Emile and his tutor to illustrate how such an ideal citizen might be educated. Emile is scarcely a detailed parenting guide but it does contain some specific advice on raising children.[5] It is regarded by some as the first philosophy of education in Western

culture to have a serious claim to completeness

NTA UGC NET/JRF/SET Teaching & Research Aptitude Paper 1 2021 Elsevier Health Sciences

Imparting knowledge is one thing and measuring the same is another. Similarly, perfect teaching is one thing and evaluating the learners is another. In fact, for measurement and evaluation of the level of knowledge of learners requires a particular acumen and a different skills. In today's educational world, the scholars have accorded the status of an art to the capability of an educator or teacher, which he or she possesses and exhibits in testing and ranking his or her pupils at various intervals of time. Now, we find expert evaluators and examiners, who specialise in conducting different tests, and examinations. In fact, all teachers, should master this skills. However, this is a new stream, which demands flawless methods and techniques for carrying out the exercises, known as Evaluation and Measurement.

MH-SET Paper 1 Guide for Assistant Professor with Past Questions Abhishek Poddar

This book, now in its Third Edition, is revised as per the feedback received from our valuable students and readers. It is exclusively prepared for the students who wish to appear for campus recruitment screening test and graduate/post graduate students appearing for various competitive examinations in Quantitative Aptitude and Reasoning. The main objective of this volume is to guide the students to solve the problems within the stipulated time and that too with the higher degree of accuracy. Organized in two parts—Quantitative Aptitude (Part I) and Reasoning (Part II)—it helps students to apply basic mathematical and reasoning concepts to a range of quantitative and reasoning problems. The separate sections are devoted to verbal and nonverbal reasoning. It sharpens the ability to apply analytical and logical thinking while gathering and analysing information, designing and testing solutions to problems, and formulating plans. This book is a valuable resource for conducting training programmes/workshops

to train students in problem solving techniques in Mathematical Aptitude. It would equally be useful to the candidates appearing for quantitative aptitude and reasoning test conducted in various competitive examinations of graduate level. NEW TO THIS EDITION • Numerous Reasoning questions (with explanatory answers) asked in recent placement tests and competitive exams • New topics on • Four figure series • Choosing one element of a similarly related pair • Choosing set of similarly related figures • Detecting one element of each of the two related pair • Detecting the relationship and choosing the correct substitute • Choosing the odd figure • Choosing a similar figure • Rule 4 [(i) and (ii)] in Rule detection

PISA Take the Test Sample Questions from OECD's PISA Assessments Upkar Prakashan

ABC of Learning and Teaching in Medicine is an invaluable resource for both novice and experienced medical teachers. It emphasises the teacher's role as a facilitator of learning rather than a transmitter of knowledge, and is designed to be practical and accessible not only to those new to the profession, but also to those who wish to keep abreast of developments in medical education. Fully updated and revised, this new edition continues

to provide an accessible account of the most important domains of medical education including educational design, assessment, feedback and evaluation. The succinct chapters contained in this ABC are designed to help new teachers learn to teach and for experienced teachers to become even better than they are. Four new chapters have been added covering topics such as social media; quality assurance of assessments; mindfulness and learner supervision. Written by an expert editorial team with an international selection of authoritative contributors, this edition of ABC of Learning and Teaching in Medicine is an excellent introductory text for doctors and other health professionals starting out in their careers, as well as being an important reference for experienced educators.
