 We spell out the policy settings necessary for the rapid adaptation and market re-coordination that is required to resuscitate the economy. We explain why a return to business as usual is simply not enough to get everyone working again. A period of high growth prosperity will be imperative to deal with the costs of the freeze. This

book tackles the tough questions and fills some of the current void of ideas and thinking about economic recovery. We develop a framework and principles for an institutional re-build, presenting a path to recovery based on the ideas of private governance, permissionless innovation, and entrepreneurial dynamism. "Economies are not like video games that can be paused and then unpaused with no effect. Freezing an economy causes systematic problems, and unfreezing it requires systematic solutions. This book is a much needed well-researched study on what it will take to get the world up and

running again." ~ Jason Brennan

“Profitability development” could just as well be the title of this book. It takes a completely new perspective on economics, focusing on how the four foundations of profitability can be utilized to increase the profitability in a company. The primary advantage of the model introduced is its simplicity, making it easy to involve everyone in the company when using it. This is important since the author has a profound conviction, based on decades in management, that the most important factor for creating success is to involve your entire staff. To do so, you need to be able to discuss complicated economic terminology (like leverage, NPV, WACC etc.) in a simple way. The book provides that simplicity and it contains plenty of practical, real life examples of how significantly increased profitability can be achieved with simple measures. This is explained with reference to different industries where the model has been used. In today’s business with global competition, it is high time for a new profession, “profitability developers”, to replace business developers. This book offers all the tools necessary to succeed in that profession. INGEMAR FREDRIKSSON has 30+ years’ experience in top management, business development, profitability development and marketing. He has worked with plenty of SMEs in different industries and also with Fnatic, IKEA, Invest Sweden, Miss Sweden and the Swedish government. He has also been vice chairman of The Swedish Federation of Business Owners. Since a few years back, he lives and works in the UAE. All

four books by Ingemar Fredriksson, in their original Swedish edition, have featured on top lists together with names like Steve Jobs, Daniel Kahneman, Thomas Piketty, Sun Tzu and even the Fifty shades-series. Search on YouTube for “Ingemar Fredriksson’s books – Bestsellers for 15 years!” for a full video of random list positions over the years.

It is huge step when you make the decision to become a trader. Most brand new traders are getting into this business because they think they can make quick money and become rich beyond their dreams. While that may be true, it is not as easy as one thinks and certainly will not happen as soon as one thinks. There are only two groups of people who are doing business in the markets, the professionals and the retail investors and traders. What is that lyric in that one song? "The lure of easy money has a very strong appeal".
