Bran Slocum stands out from the moment he arrives at Ridgewood High, with his oddly unfocused eye and his unusual mode of dress. The immediate target of bullies, he seems strangely aloof and untouched. Sixteen year old Molly Pepper, herself an outsider, is intrigued by his attitude and sets out to befriend him, persuading her best friend David to join her in reaching out to him. Molly and David begin to see that Bran is hiding some sort of secret, but they have no idea how shocking the secret is until the truth hits Ridgewood's headlines that put Bran and his new friends in terrible danger, as the whole town turns against them. Events spin out of control and fear spreads like a deadly contagion. Their friendship deepening as they face the plague of hatred together, Bran, Molly and David can only hope they will be able to stand against it.

Textbook of Geriatric Dentistry John Wiley & Sons

This book provides dental professionals with a clear understanding of current clinical and scientific knowledge on the various aspects of pulp treatment for both primary and young permanent teeth. Diagnostic parameters are clearly presented, along with step-by-step descriptions of clinical procedures, including indirect and direct pulp treatments, pulpotomy, and pulpectomy. The rationale for the materials used in each technique and their individual merits and disadvantages are examined in detail. In the case of pulpotomy, all the materials used since the introduction of this treatment modality are discussed (e.g., formocresol, glutaraldehyde, ferric sulfate, and MTA) and the roles of sodium hypochlorite, electrofulguration, and laser therapy are elucidated. Special attention is devoted to pulpectomy and root canal treatment, with consideration of debriding and obturation techniques, rinsing solutions, and root-filling pastes. A further individual chapter is dedicated to restorations of teeth treated with the different types of pulp therapy. The various conservative treatment modalities are also presented, including specific treatments for immature nonvital permanent teeth. The concluding chapter looks to the future and the potential value of stem cells in pulp therapy.

There are times when what a youngster does or says is absolutely baffling to mom or dad. How can 15-year-old Sarah spend hours prepping her hair and not give one second to cleaning her room? Likewise, what's wrong with 10-year-old Mark who knows he shouldn't bully his little brother but does so anyway? Certainly parents want answers, and no one is surprised when a parent falls back on interrogating a child or teen with repeated "Why?" or "What were you thinking?" questions. Unfortunately, searching for the reasons children behave as they do by asking the ubiquitous "Why?" is ultimately unsuccessful and, frankly, irrelevant. "I don't know," "Because," or "I wasn't thinking," is the usual child response, resulting in frustrated parents and youngsters who feel embarrassed, stupid or annoyed. Drs. Charles C. Larson and John B. Dockstader, each with more than thirty years of experience working with parents and youngsters, advise parents to step

back from situations such as those described and offer, instead, techniques for evaluating and solving family problems without needing to know "Why?". The authors counsel parents how to determine if a problem exists, who owns the problem and who is best equipped to solve it. Numerous real-life examples are presented to illustrate the problem-solving process and solutions. In Parenting Without Guilt, parents learn not only to solve family problems, but also why the challenges parents and youngsters face today are more demanding than ever before. In addition, parents are guided through each stage of child development, from birth to young adulthood, with attention to typical problems any parent may anticipate. Resources that parents can use to help them resolve family discords are discussed, to include working with educators, clergy, pediatricians, private practitioners and others. With compassion, humor and wisdom gained through practical experience, Drs. Larson and Dockstader offer information and advice that provides any parent with the skills to raise successful children without guilt, anxiety or distress.
