The BMW racing story is a fascinating tale of persistence and reward. Though initially unsuccessful in competition, the flat-twin-powered BMW motorcycle was steadily developed until it became a machine to be reckoned with. In 1939 the ultimate was achieved when Georg Meir won the Senior TT. After the War, BMW maintained a high profile on the Grand Prix scene winning no fewer than nineteen world titles from the mid-1950s to the mid-1970s in sidecar racing. But BMW: The Racing Story covers much more, including the American scene, the K-series four-cylinder, the four valve twins of the early 1990s and, finally, the great successes gained by the F650-based single in the European and British Supermono series.

328 pages, 186 black & white illustrations, size 5.5 x 8.5 inches.

This is a faithful reproduction of the 1962 Floyd Clymer U.S.A.

Edition of the same title. While the primary focus of this publication utilizes 1960's and prior motorcycles as examples, the reader is reminded that engineering theory and the laws of physics do not change and as such, the information it contains is still relevant today. Consequently, this publication is indispensable to those either contemplating modification to a current model or the construction of a 'special' for any form of motorcycle competition. Predominantly a technical work, it is written in terms easily understood by the layman. While it includes geometry and math formulae the reader will be aptly rewarded if they take a moment to comprehend the significance of the examples. Consequently, 'Motorcycle Engineering' is considered by many knowledgeable motorcycle enthusiasts to be the best book ever written on how to construct, improve, modify and fine tune a motorcycle from the 'ground up'. It is our pleasure to offer this reprint to all motorcycle enthusiasts worldwide.

Nicholas Perrot was a French-Canadian explorer who played a key role in the history of Wisconsin. This book provides a detailed biography of Perrot and examines his interactions with Native American tribes in the region, as well as his involvement in the fur trade. Stickney's analysis sheds light on the complex cultural and economic forces that shaped Wisconsin in the seventeenth and eighteenth centuries. This is a valuable resource for students and scholars of American colonial history and Native American studies. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. 164 pages, 92 black & white illustrations, size 5.5 x 8.5 inches. Originally published under the title *The Book of the Royal Enfield* by W.C. Haycraft, this book is one of *The Motorcyclist's Library* series published in the USA by Floyd Clymer by arrangement with the original publishers Pitman Ltd. of London, England. It includes

complete technical data, service and maintenance information and detailed instructions for the repair and overhaul of the major mechanical and electrical components for all Royal Enfield 250cc, 350cc and 500cc single cylinder G, J, J2, Bullet and Clipper models manufactured from 1946 through 1962. There is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete renovation. Please note that the 1957-1962 unit-construction "Crusader" type models are not covered in this publication. Information for that series of motorcycles is included in the "Second Book of the Royal Enfield" also available from [www.VelocePress.com](http://www.VelocePress.com). This publication has been Out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all Royal Enfield motorcycle enthusiasts worldwide.

This, the fifth in a series aimed at covering the careers of the world's greatest motorcycle champions, highlights the man who was the first post-war superstar on two wheels, Geoff Duke. Geoff Duke: The Stylish Champion is the story of the man who set new standards and dominated the World Championship scene, first on British Nortons and later Italian Gileros during the first half of the 1950s, gaining six titles in all. Duke was the first man to win three 500cc world titles in succession, the first motorcyclist to win the coveted Sportsman of the Year award, and only the second motorcyclist to be honored with an OBE. Additionally, he set new standards of smoothness which were to remain unsurpassed to the present day and pioneered the use of a one-piece leather racing suit. Upon his retirement from racing at the end of 1959, he was to remain closely involved in the sport and at various times carried out the tasks of consultant, team manager, clerk of the course - he was a true ambassador. Geoff Duke: The Stylish Champion is lavishly illustrated with many previously unpublished photographs making it a must-read for any motorcycling fan.

The ultimate reference for Triumph lovers and fans of British motorcycles, The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today collects all of the motorcycles from this iconic brand in a single illustrated volume. In this revised and updated edition, you'll find the all-new Bonneville lineup introduced for the 2016 model year as well as other Triumphs

through 2019. Originally formed as a bicycle company in 1885, Triumph produced its first motorcycle in 1902, which was simply a bicycle fitted with a Belgian Minerva engine. From there, the company, in various iterations, went on to build some of the most iconic motorcycles of all time. Written by respected Triumph expert Ian Falloon, this luxurious reference covers all of the major and minor models, with an emphasis on the most exemplary, era-defining motorcycles such as the Thunderbird, Tiger, Trophy, Bonneville, and new machines such as the Speed Triple, Thruxton, and Daytona 675. Detailed technical specifications are offered alongside compelling photography, much of it sourced from Triumph's archives. The Complete Book of Classic and Modern Triumph Motorcycles 1937-Today also features important non-production models and factory racing and speed-record-setting motorcycles that have become integral parts of Triumph's stellar reputation. This is a book no Triumph fan should be without!

After VE Day in 1945 the British population returned enthusiastically to the road. But the cost and availability of both vehicles and fuel led to the post-war scene being dominated by motorcycles, most of them ex-military machines, eagerly snapped up for everyday use in an age when a family car remained just a dream for many. The British industry, meanwhile, was exhorted to 'export or die', and until well into the 1950s the majority of new British bikes were sold abroad. During this period, the industry - the largest and most important in the world - continued to develop new and exciting machines, which increasingly populated Britain's roads. Mick Walker tells the story

of the British post-war motorcycle during this golden age of the industry. Machines from the big names, AMC (AJS and Matchless), the BSA Group (BSA, Triumph, Sunbeam and Ariel), Douglas, Norton, Panther, Royal Enfield, Velocette and Vincent, are here plus a myriad of smaller firms such as Cotton, Excelsior, Francis-Barnett, James and Scott. With the help of archive photographs and advertising material this book conjures up a lost age of the British bike.
