Tarot for Life Harper Collins

This important book distils the essence of developmental Transactional Analysis (TA) frameworks that are most useful to bring alive professional coaching competencies. Karen Pratt offers clear outlines of TA frameworks as well as describing how they are applied in coaching, with snippets of coaching conversations as illustrations of the theory in practice. Pratt highlights key TA frameworks in enough detail to be easily grasped but with a focus on application in coaching and other developmental conversations. A TA approach powerfully guides coaches in their listening and questioning. TA is not used as a coaching 'technique' - it offers psychological understanding of human beings and the meaning they make of who they are in the world. Such awareness is key for both professionals and clients in meaningful partnerships for development. Transactional Analysis Coaching will be key reading for professionals working within present-centered contracts for change - coaches, trainers, facilitators, supervisors, teachers, mentors and managers - seeking to understand how TA can impact their development. It will be of great interest to coaches in training and will provide a useful resource for clients in their ongoing development.

First published in 1980, this book is still considered the basic primer for understanding NLP (Neuro-Linguistic Programming). The author demonstrates all the basic techniques for change and relates these to other established schools of psychotherapy. The result is a fortunate marriage of theory and practice. Covers a wide range of topics some in depth, some only a tantalizing glimpse of possibilities which therapists dream of succeeding at. The outcome is a happy event which any therapist, novice or veteran, will find useful. From the original foreword...'This book that you are holding constitutes an important part of my integration of several contemporary psychotherapies with the orientation taught me by Milton H. Erickson and the modeling principles used by Richard Bandler and John Grinder in their work which subsequently led to their development of Neuro-Linguistic programming. This book constitutes an important piece of my understanding of psychological level communication and its use in therapy.'
