### **Celestina** Harper Collins

"Breathtaking in its scope and wonderfully illuminating. . . . one of the most powerfully convincing characters in recent historical fiction." —Alberto Manguel, *The Guardian* Gossip was rife in the capital about the poetess of Qazvin. Some claimed she had been arrested for masterminding the murder of the grand Mullah, her uncle. Others echoed her words, and passed her poems from hand to hand. Everyone spoke of her beauty, and her dazzling intelligence. But most alarming to the Shah and the court was how the poetess could read. As her warnings and predictions became prophecies fulfilled, about the assassination of the Shah, the hanging of the Mayor, and the murder of the Grand Vazir, many wondered whether she was not only reading history but writing it as well. Was she herself guilty of the crimes she was foretelling? Set in the world of the Qajar monarchs, mayors, ministers, and mullahs, this book explores the dangerous yet luminous legacy left by a remarkable person. Bahiyyih Nakhjavani offers a gripping tale that is at once a compelling history of a pioneering woman, a story of nineteenth century Iran told from the street level up, and a work that is universally relevant to our times. "Mordant and seethingly intelligent." —Sam Sacks, *Wall Street Journal* "An engrossing story." —Gayatri Devi, *World Literature Today* "Haunting . . . reminds us all that whether Tudor, Qajar, or Clinton, behind every throne is a queen mother, wife, and sister who runs the show." —Davar Ardalan, *Washington*

Independent Review "Nakhjavani offers a philosophically complex yet lyrically wrought examination of the eternal struggle for women's rights." —Carol Haggas, *Booklist* "Nakhjavani deftly transforms an incomplete history into legend. . . . An expertly crafted epic." —*Kirkus Reviews*

**Structures** Createspace Independent Pub

Goldie Roth is a trained thief and a skilled liar. Along with her friend Toadspit, she's supposed to be one of the Keepers of the mysterious Museum of Dunt. But although she desperately wants to be a Keeper, she will not leave her sick parents to do so. But when Toadspit's sister Bonnie is stolen, he and Goldie are forced to follow the child-stealers to the neighboring city of Spoke. Along the way, Toadspit too is captured, and Goldie is caught up in the Festival of Lies, where every word she says means something else and no one can be trusted. There, Goldie discovers some dangerous secrets—secrets that the child-stealers will kill to protect. She will need all her skills as a thief and a liar if she is to survive and save her friends.

This book examines how new scientific developments in understanding how the brain works can help educators and educational policy makers develop new and more efficient methods for teaching and developing educational policies.

**Oxford Bookworms Library: Starter: Robin Hood** Academic Press

Approximately 500,000 bridges in the

National Bridge Inventory (NBI) are built over streams. A large proportion of these bridges span alluvial streams that are continually adjusting their beds and banks. Many, especially those on more active streams, will experience problems with aggradation, degradation, bank erosion, and lateral channel shift during their useful life. The purpose of this document is to provide guidelines for identifying stream instability problems at highway stream crossings. Techniques for stream channel classification and reconnaissance, as well as rapid assessment methods for channel instability are summarized. Qualitative and quantitative geomorphic and engineering techniques useful in stream channel stability analysis are presented. This publication is an update of the third edition published in 2001. The HEC-20 manual covers geomorphic and hydraulic factors that affect stream stability and provides a step-by-step analysis procedure for evaluation of stream stability problems. Stream channel classification, stream reconnaissance techniques, and rapid assessment methods for channel stability are covered in detail. Quantitative techniques for channel stability analysis, including degradation analysis, are provided, and channel restoration concepts are introduced. Significant new material in this edition includes chapters on sediment transport concepts and channel stability in gravel bed streams, as well as expanded coverage of channel restoration concepts.

The Elements of Color Virago Press  
Showcases the Celtic civilization by presenting its art, from exquisite jewellery to weapons of war.

**The Time Machine and Other Stories**  
Stanford University Press

A useful simplification and condensation of Johannes Itten's major work. *The Art of Color*, this book covers subjective feeling and objective color principles in detail. It presents the key to understanding color in Itten's color circle and color contrasts.

The Turncoat's Widow A Revolutionary War Mystery

First published in 1202, Fibonacci's *Liber Abaci* was one of the most important books on mathematics in the Middle Ages, introducing Arabic numerals and methods throughout Europe. This is the first translation into a modern European language, of interest not only to historians of science but also to all mathematicians and mathematics teachers interested in the origins of their methods.

*Tables for Statisticians* Thorsons Publishers

The area of food toxicology currently has a high profile of interest in the food industry, universities, and government agencies, and is certainly of great concern to consumers. There are many books which cover selected toxins in foods (such as plant toxins, mycotoxins, pesticides, or heavy metals), but this book represents the first pedagogic treatment of the entire range of toxic compounds found naturally in foods or introduced by industrial contamination or food processing methods. Featuring coverage of areas of vital concern to consumers, such as toxicological implications of food adulteration (as seen in ethylene glycol in wines or the Spanish olive oil disaster) or pesticide residues, *Introduction to Food Toxicology* will be of interest to students in toxicology, environmental studies, and dietetics as well as anyone interested in food sources and public health issues. The number of students who are

interested in toxicology has increased dramatically in the past several years. Issues related to toxic materials have received more and more attention from the public. The issues and potential problems are reported almost daily by the mass media, including television, newspapers, and magazines. Major misunderstandings and confusion raised by those reports are generally due to lack of basic knowledge about toxicology among consumers. This textbook provides the basic principles of food toxicology in order to help the general public better understand the real problems of toxic materials in foods.

Principles of toxicology  
Toxicities of chemicals found in foods  
Occurrence of natural toxins in plant and animal foodstuffs  
Food contamination caused by industry  
Toxic chemicals related to food processing  
Food additives  
Microbial toxins in foods

The Young Person's Guide to Saving the Planet BookRix

An introduction to the human heart, blood, blood vessels, and various types of blood cells.

Lengua 4 Princeton University Press  
Recently widowed, Rebecca Parcell is too busy struggling to maintain her farm in Morristown to give a fig who wins the War for Independence. But rumors are spreading in the winter of 1780 that she's a Loyalist sympathizer who betrayed her husband to the British—quite a tidy way to end her disastrous marriage, the village gossips whisper. Everyone knows that her husband was a Patriot, a hero who died aboard a British prison ship moored in New York Harbor. But "everyone" is wrong. Parcell was a British spy, and General Washington—who spent that winter in Morristown—can prove it. He swears he'll safeguard Becca's farm if she unravels her

husband's secrets. With a mob ready to exile her or worse, it's an offer she can't refuse. Escaped British prisoner of war Daniel Alloway was the last person to see Becca's husband alive, and Washington throws this unlikely couple together on an espionage mission to British-occupied New York City. Moving from glittering balls to an underworld of brothels and prisons, Becca and Daniel uncover a plot that threatens the new country's future. But will they move quickly enough to warn General Washington? And can Becca, who's lost almost everyone she loves, fight her growing attraction to Daniel, a man who always moves on?

Quick Minds is an exciting, six-level course for young learners in Spain that enhances your students' thinking skills, sharpening their memory while improving their language skills. This Level 4 Pupil's Book includes visualisation exercises to develop creativity, cross-curricular (CLIL) thinking and lively stories that explore social values, designed specifically to fulfil the needs of the Spanish curriculum and Spanish-speaking learners. A unique Augmented Reality app (downloadable separately) allows access to extra resources by scanning pages of the Pupil's Book with a tablet or a smart phone. The online interactive activities complement the Pupil's Book and are intended for pupils to use at home, with games, story animations, songs with karaoke versions for the pupils to record and play back their own voice, and videoke activities.

In the first of L. Frank Baum's time-

honored Oz novels, country girl Dorothy Gale gets whisked away by a cyclone to the fantastical Land of Oz. Dropped into the midst of trouble when her farmhouse crushes a tyrannical sorceress, Dorothy incurs the wrath of the Wicked Witch of the West. Dorothy is desperate to return to her native Kansas, and, aided by the Good Witch of the North, she sets out for the Emerald City to get help from the legendary Wizard. On her way, she meets three unlikely allies who embody key human virtues—the Scarecrow, the Tin Woodman, and the Cowardly Lion.

**City of Lies** Read Books Ltd

A collection of ten stories featuring admirable girls in both familiar and exotic settings.

THE CLASSIC WORK OF ARCHIMEDES

The Sand-Reckoner *Dimensio Circuli* of Archimedes Translated by Thomas L. Heath (Original publication: Cambridge University Press, 1897). The Sand Reckoner is a work by Archimedes in which he set out to determine an upper bound for the number of grains of sand that fit into the universe. In order to do this, he had to estimate the size of the universe according to the contemporary model, and invent a way to talk about extremely large numbers. The work, also known in Latin as *Archimedis Syracusani Arenarius* and *Dimensio Circuli*, which is about 8 pages long in translation, is addressed to the Syracusan king Gelo II (son of Hiero II), and is probably the most accessible work of Archimedes; in some sense, it is the first research-expository paper. Archimedes died during the Siege of Syracuse when he was killed by a Roman soldier despite orders that he should not be harmed. Cicero describes visiting the tomb of Archimedes, which was surmounted by a sphere and a cylinder, which Archimedes

had requested to be placed on his tomb, representing his mathematical discoveries. Unlike his inventions, the mathematical writings of Archimedes were little known in antiquity. Mathematicians from Alexandria read and quoted him, but the first comprehensive compilation was not made until c. 530 AD by Isidore of Miletus in Byzantine Constantinople, while commentaries on the works of Archimedes written by Eutocius in the sixth century AD opened them to wider readership for the first time. The relatively few copies of Archimedes' written work that survived through the Middle Ages were an influential source of ideas for scientists during the Renaissance, while the discovery in 1906 of previously unknown works by Archimedes in the Archimedes Palimpsest has provided new insights into how he obtained mathematical results.

**Proyecto curricular para la Educación Primaria, Galicia**

In this intense and brilliant book Bowles focuses on Morocco, condensing experience, emotion, and the whole history of a people into a series of short, insightful vignettes. He distills for us the very essence of Moroccan culture. With extraordinary immediacy, he takes the reader on a journey through the Moroccan centuries, pausing at points along the way to create resonant images of the country, its landscapes, and the beliefs and characteristics of its inhabitants.

**The Wonderful Wizard of Oz** Springer Science & Business Media

This book is a collection of eight short stories written by H. G. Wells. "The Short Stories of H. G. Wells" constitutes a must-have for lovers of the short storm

form and is not to be missed by fans of Wells' fantastic work. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as "The Time Machine" (1895), "The Invisible Man" (1897), and "The War of the Worlds" (1898). "The Father of Science Fiction" was also a staunch socialist, and his later works are increasingly political and didactic. The stories include: "The Time Machine", "The Empire of the Ants", "A Vision of Judgement", "The Land Ironclads", "The Beautiful Suit", "The Door in the Wall", "The Pearl of Love", and "The Country of the Blind". Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.
