What is TensorFlow? The machine learning library explained ...

Tensorflow TensorFlow is an end-to-end open source platform for machine learning. It has a comprehensive, flexible ecosystem of tools, libraries and community resources that lets researchers push the state-of-the-art in ML and developers easily build and deploy ML powered applications. TensorFlow TensorFlow makes it easy for beginners and experts to create machine learning models for desktop, mobile, web, and cloud. See the sections below to get started.

Introduction to TensorFlow |

TensorFlow TensorFlow is an open source machine learning framework for all developers. It is used for implementing machine learning and deep learning applications. To develop and research on fascinating ideas on artificial intelligence, Google team created TensorFlow. TensorFlow is designed in Python ... TensorFlow Tutorial - Tutorialspoint TensorFlow is a free and open-source software library for dataflow and differentiable programming across a range of tasks. It is a symbolic math library, and is also used for machine learning applications such as neural

networks. TensorFlow -

Wikipedia TensorFlow is a Python-friendly open source library for numerical

computation that makes machine

learning faster and easier. TensorFlow is
